Block Introduction

The Paper-II is titled as Vedânga comprises three subjects, viz. *Nirukta* (Chapter I (1-11) and Chapter VII(1-13), *Rkprâtiœîkhya* and Essay in Sanskrit. *Nirukta* composed by Yâksa, is a book on etymology on the vedic words. There are fourteen chapters in the *nirukta*. In your syllabus only a few portions from the two chapters are recommended. As a Vedânga literature, *Nirukta* is related with the Vedas. So, in the first unit of this paper a brief discussion on Vedic literature has been made. *Veda* is the most ancient literature, called Vedânga, was composed. As such Vedânga is an auxiliary type of literature. Among the six Vedângas, *Nirukta* occupies a prominent place. In the second unit of this paper, a general characteristic feature of *Nirukta* and its importance have been delineated in the next unit.

Under *SZiksâ* Vedânga two types of composition, viz, *Prâtioâkhya* and *SZiksâ* have come down to us. Prâtioâkhyas are the most important and authentic treatises on the ancient Indian science of phonetics. Among the Prâtioâkhyas, the oldest one is the Rkprâtioâkhya. The fourth unit help you to acquaint with the Prâtioâkhyas in general and the Rkprâtioâkhya in particular. The Vedic metres are very essential to understanding the Vedic mantras. The principal Vedic metres are seven in numbers. In the fifth unit, three major Vedic metres, viz., Gâyatri, Usnik and Anustup have been treated. Sanskrit composition on various topics ancient as well as modern have been dealth with in the last unit. This will help you to compose few lines on different themes.

There are six units in this paper. Distributions of each unit is as follows :

- Unit 1 : Introduction to the Vedic Literature
- Unit 2 : The Vedânga Literature
- Unit 3 : The Nirukta of Yâksa: Chapter I (1-11) & VII (1-13)
- Unit 4 : Prâtioâkhya Literature: Rkprâtioâkhya
- Unit 5 : Rkprâtioâkhya : Vedic Metres-Gâyatri, Usnik and Anustup
- Unit 6 : Essay in Sanskrit

Unit-2

The Vedānga Literature

Contents

- 2.0 General Introduction to the Vedānga literature.
- 2.1 Objectives
- 2.2 Meaning of the word Vedānga
- 2.3 Style of the Vedāngas
- 2.4 Contents of Vedāngas
- 2.5 Importance of the Vedāngas
- 2.6 Summing Up

2.0 General Introduction to the Ved ga literature :

The Ved gas are a class of literature closely connected to the Vedas. While the Vedas are the revealed texts, the Ved gas are the compositions of some celebrated scholars of post-Vedic period. The six Ved gas viz, the Sikṣā (Phonetics), Kalpa (Ritual), Vyākaraņa (Grammar), Nirukta (Etymology), Chandas (Metres) and Jyotisa (Astronomy), are originally six distinct subjects revealed in the Brahmanas. The complex prose passages of the Brahmanas were tried to be simplified by these wisemen. As the Vedas are the source of valid knowledge, as these are the source of Indian religion, culture and philosophy and many other things so with a view to know the meaning of Vedas as well as for the protection of this knowledge, the above mentioned six subjects have been developed considerably to make them as separate treatises. Thus the six Vedāngas have been emerged as complementary to Vedic knowledge. The style, in which this literature, has been composed is the sūtra or aphoristic style. Shortness is the feature of this style. It was such a compressed style that the grammarians of the time felt extreme happiness by reducing a half of a *matra* of a syllable in their compositions.

2.1 Objectives

In this unit you are going to be introduced to a very special branch of literature and that is none other than the Vedānga literature. The Vedāngas are regarded as bridge between the Vedas and the classical Sanskrit literature. It is a prose literature peculiar to see anywhere in the world. It is called as *Sūtra* composition. Its date goes back to the last era of the vedic revelation and prior to the Christian era. These are authored by illustrious seers of post Vedic period. A vast literature comes out of the Vedānga literature. All these texts are invaluable source of knowledge of the Vedic and post Vedic Indian society, religion, philosophy and many more things. For the protection of Vedic knowledge these were composed and these have great impact on the post Vedic Sanskrit language and literature. By this write-up you will be able to learn :

- (a) The meaning of the word Vedānga
- (b) Style of the Vedāngas
- (c) Contents of Vedāngas
- (d) Importance of Vedāngas

2.2 Meaning of the word Vedānga :

The word 'Vedānga' consists of two words viz, *Veda* and *anga*. The word *Veda* means the different texts of the *Veda* and the word '*anga*' denotes parts. So after the combination of the two words it means a kind of literature that is the part of the Veda. This is a general concept of the word 'Vedānga'. But scholars have explained it in a different way. According to them Vedāngas are very useful books for the study of Vedas. Their explanation is put forward as follows. Angyante j āyante amībhiriti angāni, i.e., as because taking the help of these books Vedas can be known properly, therefore these are called as Vedāngas. In Indian tradition the six Vedāngas are called as six limbs of the Vedapurusa i.e., the Veda. The verse in which such an idea is ex**fr**essed with a view to show its importance, is expressed in the Pāninīyas ziksā written by the great grammarian Pā nini. It runs as follows :

chandaḥ pādau tu vedasya hastau kalpo' tha paṭhyate jyotiṣāmayana cakṣur nirukta śrotramucyate// s zikṣā ghrāṇa tu vedasya mukham vy karaṇa smṛtam// tasmāt sāṅgamdhītyaiva brahmaloke mahīyate// (P ṇinīyaśikṣ ,41-42)

i.e., the *Chandah* is called the feet of the Veda, the *Kalpa* is the hands, the *Jyotisa* is the eyes, the *Nirukta* is the ears, *SZikşa* is the nose or breathe, the *Vyā karana* is called the mouth of the Veda. Thus by studying the Veda along with the Ved gas one attains the *Brahmaloka* or the place of Supreme Reality. By this composition P nini, the greatest grammarian of all times, wanted to show the importance of this literature that comprises six distinct books. According to him

metre (Chandas) is a very important subject to get the knowledge of Veda. With the help of the metres, a knower of Veda can easily proceed in his pursuit of knowledge. The Vedic metre is determined by numbers of syllables. So it has been rightly called as the feet of the Vedapurusa. The Kalpa Veda ga has been said as hands of the Vedapurusa. Just like with our hands we can do anything so also the Kalpa, and its different texts related to Vedic rituals help a knower of the Veda or a sacrificer to perform Vedic sacrifices in proper way. If the sacrifices are properly performed then the sacrificers can expect to get their desired objects. The Jyotisa is a subject that involves the observation of the position of the stars and planets on the sky. For a correct observation of the stars and their positions and movements the eyes are the best means. So also the knowledge required for the performance of Vedic sacrifices the sacrificers shall go through the texts of the Jyotisa i.e., astronomy. This book helps a lot in the proper performance of the sacrifices and other activities. Therefore the astronomy has been said as eyes of the Vedapurusa. The ears are the parts by which one can hear and learn things easily. So also the *Nirukta*, the science of etymology is a book on the science of semantics. Semantics has the sense 'of meaning in language'. The Nirukta was composed with a view to give the meaning of Vedic words. The meaning of word is understood at the moment of its utterance and that too after its hearing. So the Nirukta has been given the status of ears. Just without ears one cannot understand the meaning of words or anything so also without the *Nirukta* or etymology, nobody is able to learn the Veda properly. The *Siksā* is the breathe of the Vedapurusa. Just without the breathe one is unable to live or sustain, so also without the knowledge of the accent, letter, matra, etc. one is unable to go through the proper meaning of Vedas. Vyākaraņa or the grammar is the mouth of the Vedaparuşa. By the grammar is meant the analysis of words. The analysis of words is necessary in the process of learning the meaning of words or in the process of the utterance of verses in the Vedic sacrifice. Just without the mouth one is unable to take anything for life sustenance, so also without proper knowledge of the grammar a person cannot learn the Veda. Pata jali the great exponent of the Veda, also the illustrious commentator of the Astadhyāyi written by Pāņini also lays emphasis on the study of the Veda gas along with the Veda. He says : 'Brahmanena nişkarano dharmah şada go vedo' dhyeyo j eyasca (Paspasāhnika, Mahābhāşya).

2.3 Style of the Vedāngas :

As is already expressed that Vedāngas were written in the 's tra' style or aphoristic style. This style is quite different from the metrical as well as accented Vedic style. The scholars of ancient India described this style as highly enigmatical. According to them a 's tra' style is that wherein the ideas of an author are expressed in a few syllable, unambiguous in sense, substantial in disseminating knowledge to all, unsurpassed in expression, and that are too undoubtedly faultless. The expression of these ideas is made in the following way :

alpākṣaramasandigdham sarāvadvisvato mukham astobhamanavadyañca sūtra sūtravido viduh //

Regarding this style V.S. Sukthankar very rightly observes thus, "The grammar aphorisms of पाणिनि are the most typical product of the सुत्र style. Brevity was valued more than everything else. The saving of but one syllable was regarded as a matter of greater joy than even the birth of a son." (V.S. Sukthankar : Ghate's Lectures on Rgveda, pg., 42-43). He thereby argues that the Br hmanas and related works on sacrifices became so voluminous and bulky that it became almost impossible to remember them and utilize them. Hence arose the necessity of short and convenient treatises which could be easily committed to memory.

2.4 Contents of Vedāngas

Content of Vedāngas can be dealt with separately as each of these six texts holds different subject matter.

The *Siksā* Vedānga deals mainly with the correct pronunciation of Vedic sounds, accents, *matra* (correct measure of time of pronunciation of syllable), and other related things. The first occurrence of the word *Siksā* in its primary meaning is seen in the *Taittirivopanisad* (1.2). Here it is said that the *Siksā* consists of six things viz., varņa (individual sound), svara (accent), mātrā (quantity), bala (organ of pronunciation), sāman (delivery), and sāntāna (euphonic laws). Siksā contains mainly two types of texts viz the *Prātisákhya* and *Sikṣā*. There are texts of Pr tisakhya and Siksā attached to each of the four Samhitās. While the Prātisákhya works deal extensively with accents, the features of Samhitāpātha, kramāpatha, pragrhya vowels, padapātha belonging to different schools of Vedas the *Sikşā* texts are confined merely to the general rules of pronunciation of words, m tr s, accent, metres and so on. There are, different Pr tisakhya works of the four Vedas. Among these, the Rgvedapratisakhya (Rgveda), Vājasaney i Prātisākhya (White Yajurveda), Taiātirīyaprātisākhya (Black Yajurveda), and the Atharvavedaprātisākhya are worthy to mention. Besides, Sikşā works like the Yājñavalkya Sikşā, Vyāsasikşā, Bharadvājasíksā are important.

The *Kalpavedānga* deals exclusively with the minute details of the sacrificial paraphernalia of Vedic times. As because the performances of sacrifice should be done with the rules laid down by these texts therefore these are called as 'Kalpa'. The word 'Kalpa'expresses the sense of support. Thus goes the saying – "Kalpo *Vedavihitānām karmanāmānupūrvyeṇa kalpanāsāstram.*" There are four types of Kalpas and there are the Srautas tras, Grihyas tras, Dharmas tras and Sulvas tras. In short, the Kalpas deal with the rules for the

performance of Vedic sacrifices, duties of Aryan householders, rules to be obeyed by the Aryans in their day today life and the rules for correct measurement of land of sacrifice, the sacrificial house etc. There are a great number of Kalpa texts available in the Sanskrit literature.

The analysis of Vedic languages begins in a systematic way with the composition of the *Vyākarana Vedānga*.

This book is a masterpiece in the analysis of both Vedic and classical Sanskrit literature. This *Vedānga* is undoubtedly the best of its type. This *Vedānga* serves the purpose of protecting the Vedic language with its accent, helps in the understanding of the meaning of Vedas, helps in understanding Vedas by directing separately the root, suffix, nature of words, inflection of words both nouns and verbs and many other things. A special Rgvedic verse conveys the importance of analysis of words in the following way.

catvāri srīngāh trayo'sya pādā dve sīrse sapta hastā so'sya/ tridhā vaddho vīrsabho roravīti mahādevo martyamāvivesa //

i.e., the *vrṣabha* (i.e., *Vyākaraṇa*) has four horns i.e., four words (*nāma*, *ākhyāta*, *upasarga*, *and nipāta*), it has three feet (i.e. present tense, past tense and future tense), two heads (i.e *sup* suffix and *tin* suffixes), seven noun suffixes are its seven hands. And with its neck and chest, the *vrṣabha* having three fold forms is tied. Such a subject shall be read compulsorily. For the protection of the *Veda* it shall be studied.

The *Vedānga Nirukta* written by Y ska deals extensively with the etymology of Vedic words. It mainly aims at giving meaning to Vedic words. This Vedānga will be treated in a separate unit. The word '*Nirukta*' is derived from the \sqrt{vac} , to speak with the prefix *nir*, meaning completely. Thus the word expresses the sense of speaking or explaining words completely so that no meaning can remain unexplained. Y ska is the author of this *Vedānga* that comprises twelve chapters. Two additional chapters are found to be appended to it.

The '*Chandas*' *Vedānga* discusses at length the Vedic metre, their character and importance. The only representative work of this *Vedānga* is the *Pingalachandahsūtram*. Pi gala is the author of this book. Besides, this book treats the classical Sanskrit words too. Vedic chandas are determined by the number of letters and not m tr s. There are seven principal metres found in the Veda. These are *Gāyatrī*, *Usnik*, *Anustup*, *Brhatī*, *Panktī*, *Tristup* and *Jagati*. These have also other sub varieties. The knowledge of metres is necessary for proper pronunciation of Vedas. The scholars have maintained that without the proper knowledge of metres, if a person studies Vedas, or he sacrifices or take the task of conducting sacrifices, then this person will fail in attaining desired results. Such an idea is expressed beautifully by the author of *Sarvānukramani*,

i.e Kātyāyana, (Sarvānukramaņi, 1/1)

Jyotişam (Astronomy) is the last *Vedānga* that deals with the rules of time for the performance of various sacrifices. The scholars who were engaged in the study of the position of stars and planets thought that the success of the institution of sacrifice did not depend on the rules that are followed during the performance but on the correct time and the position of a particular star in the sky. The four Vedas have their own astronomical *Vedānga*, but the astronomical book belonging to the *Sāmaveda* is unavailable. Tradition ascribes the authorship of all these books to the great scholar 'Lagadha'. It has been beautifully expressed in the following verse as :

"Praṇamya śiras k lamabhivadya sarasvatim

K laj na pravaksy mi mahātmānah lagadhasya"

(rcajyotisa verse.2)

2.5 Importance of the Vedā gas

This six Vedāngas are important works in the bulk of the Sanskrit literature in many ways. At first it may be pointed out that the Ved gas helped a lot to know the meanings of the *Veda* in a very simple way. Although these are written in a very compressed style yet these were proved to be easily memorised by Vedic students. There was a very well-known dictum during the Vedic age that the Vedas are to be recited and studied along with the Vedāngas . There goes the saying like this made by Pata jali in the beginning of his work *Mahābhāṣya* as follows :

brāhmaņena niskāraņo dharmaķ

sada go Vedo' dhyeyo

j eyaśca (Paspaszāhnika, Mahābhāsya).

Besides, the recitation of Veda was compulsory to the Vedic students. The oftquoted statement carrying this idea is *svādhyāyo adhyetavyaḥ*. Like the Vedas,

the Ved gas were also subjects of recitation.

Secondly, the importance of Vedāngas is felt in the performance of the Vedic sacrifices. The Vedic sacrifices were instituted and performed to obtain desired objects by Aryans. The desired fruit of the sacrifice can be obtained only through the correct process of functioning of the sacrifice. A sacrifice was performed with the recitation of verses from the Vedas. With a view to get the fruit of the sacrifices, a priest had the great responsibility of performing the rites following the ritual books like the Srautas tras. The recitation of the verses need proper knowledge of accent, metres, language etc. So also a sacrificial priest is sought to be well versed in the Arthasástras like the *Nirukta*. In this way the knowledge of the Vedāngas are felt to be very important during the Vedic age.

Thirdly, the importance of the Vedāngas are felt in the study of the Indian history of religion, philosophy and culture. In this way it may be viewed that the Vedānga literature is very important to trace the Indian heritage.

2.6 Summing up :

A study of the Vedāngas or Vedānga literatue shows that this literature holds a very important position in the bulk of the Sanskrit literature. Although this literature is developed out of the Veda, yet it deals with the systematic studies of certain important subjects already revealed in the Veda, without this knowledge, the knowledge of Veda cannot be acquired. The Vedāngas are also taken as bridge between the Vedas and classical Sanskrit literature. The style of this literature is also very peculiar. It is known as the *sūtra* style. It is a style characterised of compressed prose style. You are also aware of the fact that the separate texts of the Vedāngas are invaluable records of Indian language, society as well as culture.

Check Your Progress

- 1. Write a note on the meaning and scope of the word *Vedānga* (in 200 words)
- 2. What is meant by the word '*Sūtra*'? Give an account of the *Sūtra* style'. (in 200 words)
- 3. Assess upon the importance of the *Vedānga* literature. (in 200 words)

Unit-1

Introduction to the Vedic Literature

Contents :

- 1.0. General Introduction
- 1.1. Objectives
- 1.2. Meaning and definition of the 'Veda'
- 1.3. Contents of the Veda
- 1.4. Vedic Language
- 1.5. Vedic Accent
- 1.6. Vedic Metre
- 1.7. Greatness and importance of the 'Veda'
- 1.8. Summing up

1.0. General Introduction :

Towards the end of the revelation of Vedas there emerges a class of literature auxiliary to the proper cultivation and und standing of the Vedas. This literature has been named as Vedāngas or the Vedānga literature. This literature comprises six distinct books viz the Sikṣā (Phonetics), Kalpa (Ritual), Vyākaraṇa (Grammar), Nirukta (Etymology), Chandas (Metres) and lastly Jyotiṣa (Astronomy). This literature was written in S tras or aphoristic style. Of these six texts, the Nirukta written by Yāska is a representative work of the fourth Ved ga i.e., the Nirukta. The period in which these were composed is known as the S tra period. Scholars of the world opine that this style is very peculiar and it stands unrivalled in the history of all the literatures of the world. As the Vedāngas were written as auxiliary texts of the Vedas therefore it is here necessary to go through the meaning and importance of the Veda. But before going to this discourse, the objectives of this write- up will be mentioned as follows.

1.1 Objectives :

In this unit we are going to introduce you to the Vedas, the source of Indian religion and philosophy. It is here intended to show that the Vedas are not ordinary texts. Indeed they are characterized of Divine revelations. Besides, the Vedas were handed down in accented forms. By this write-up you will be able to learn

(a) The meaning of the word 'Veda'

- (b) The definition of the word 'Veda'
- (c) Greatness of the Veda
- (d) Vedic Accent
- (e) Vedic Language
- (f) Contents of the Veda
- (g) Importance of the Veda

1.2. Meaning and definition of the word 'Veda':

The word 'Veda' is derived from the \checkmark vid, to know with the suffix 'ac'. – Veda means knowledge. The knowledge as it is derived with the help of eyes, ears, nose, tongue and skin, is called as earthly knowledge. But the knowledge that cannot be attained through these sense organs is called as Supernatural. This type of knowledge can be attained only through this revealed text i.e., the Veda. This has been very aptly stated by Y j avalkya as follows:

pratyakseņānumityā vā yast pāyo na vidyate/ enam vidanti vedena tasm d vedasya vedat

Thus it is clear that the Veda means knowledge revealed by seers who were credited with intuitive powers. Besides, the Veda is stated as the revelation of both essence of religion and knowledge of Brahman, i.e. Supreme Reality. Thus there goes the saying like this – "*dharmabrahman Vedaikavedye*." i.e., the dharma (religion, duty etc.) and Brahman, these two are to be known from the Veda. The Veda is the source of religion or duty – thus expresses the author of the Manusa hitā, a Smriti work composed by the celebrated seer Manu. (Manusa hitā, II-6) By the Veda one can learn religion, the different duties assigned to the householders belonging to different castes, in ancient India. Moreover the Veda is the source of the knowledge of the Ultimate Reality.

The word 'Veda' has certain synonyms such as Śruti, Tray , Āgama, Chandas etc. But as a literature the Veda has been defined as the sum total of the Mantra and Brāhmaṇa. The definition thus put forward by two great ancient Indian seers Kātyāyana and Āpastamba is taken to be an appropriate one. It goes as follows : *mantrabrāhmaṇayor vedanāmadheyam*. Of the two parts of the Veda, the mantra is characterized of metrical composition with euphonic forms, but for which this is called by another name and that is Sa hitā. The Brāhmaṇas are the explanatory parts of the Mantras or Sa hitās. Besides, the Mantras are characterized of expressions of ideas like that of praise, eulogy of Gods (the deified Natural objects, benediction, censure, curse, oath-taking, lamentation, philosophical thoughts and so on. The Brāhmaṇas are characterized of six subjects such as the *vidhi* (injunction) *arthav da* (explanatory remarks over the meaning of word to be applied in sacrifices), *nind* (censure) *prasains* (praise), *pur kalpa* (myths and legends– or ideas relating to former creation) and *parakrti* (glorification of priests, kings, great personalities etc.). The Vedas as a literature has a distinct quality unseen in any other literature and that is its accentuation mode. The Vedas are revealed in accent mode. The Brāhmaņas have two other parts viz the Āraņyakas and Upani ads. While the Āraņyakas are forest revelations or revelations of knowledge in the dense forests, the Upani ads are mystic revelations made between teacher and pupil. These two latter texts are the most important parts of the Veda, because, the Indian religion and philosophy owe their origin to these two literatures. These two literatures too are accented texts and mostly the combination of verse and prose.

Scholars of East and West express that the Brāhmaņas are model of later Indian classical prose. As to the metre of Vedic composition this may be said that the Vedic metres are marked by the number of letters whereas the classical metres are marked by that of mātrās. In the continuation of the Indian religion and philosophy the myths and legends of the Br hmaņas play a vital role.

Thus it is seen that the Mantras and Br hamaņas constitute the Veda. In Indian tradition there are four main Sa hit s or Mantra texts viz the Rgveda or Rk Sa hitā, Sāmaveda or S ma Sa hitā, Yajurveda or Yajus Sa hitā and Atharvaveda or Atharvasa hit . Among these four Sa hitās, the Rk Sa hitā is regarded as the oldest. Each of the four Sa hitās has its Brāhmaņa texts, Āraņyakas and Upani ads. Thus, we have Brāhmaņa texts like the *Aitareya*, *Kauş i taki* (or the *Sānkhāyana*)–(both belonging to the *Rk Sanhitā*), the *Tāndya* or *Pa cavinsá*, *Sadvi sá*, *Chāndogya*, *Jaiminiya* etc. (belonging to the Sāma Sa hitā), *Satapatha* (belonging to the White Yajurveda), *Taittiriya* (belonging to the Black Yajurveda), Gopatha (belonging to the Atharvasa hit). Besides, each of these Brāhmaņas has Āraņyakas and Upani ads. The Gopatha Br hmaņa has no Āraņyaka. Some of the foremost Āraņyakas and Upani ads are as follows : Aitareya Āraņyaka and Aitareyopani ad, Brhad raņyaka Upani ad and Taittiriya Āraņyaka and Taittiriyopani ad.

All these different Vedic texts are invaluable records of Indian religion, philosophy and culture. The Upani ads are known also as Vedānta because it is the last revelation of the Vedas. In the Upani ads one will come across knowledge revealed on the *Brahmavidyā* (knowledge of the Ultimate Reality), Ātmatattva (the knowledge of the Self), Sṛṣṭirahasya (mystic ideas relating to the creation of the Universe), *Paralokatattva* (knowledge regarding the other world), *Kāryakā raṇavāda* (deliberations on the cause effect Relation) and *J va-Brahma Aikya* (Unification of the Individual soul and the Ultimate Reality or Supreme soul) and so on.

1.3 Contents of the Vedas :

Among the different Sa hitās, the Rk Sa hitā, the oldest one is a book on the eulogy of different powers of nature which are called as deity or God. Besides these, many other subjects have been revealed here. Through the verses benediction, praise, censure and certain subjects including revelations on frogs, philosophy are beautifully expressed in the Rgveda. The Sāmaveda is the Veda of sāmans i.e., the Rk verses sung with musical notes. The Yajurveda in its two texts is a book on Vedic liturgy or sacrifices. The verses of this Veda are seen to be recited in various sacrifices during the Vedic age. The Atharvaveda is the Veda of Atharvan and Angiras. The revelations of the seers Atharvan and Angiras comprise of the holy and unholy charms. It is often said as a Veda of common people. Here the life of common people is well revealed. So also the Brāhman as are revelation on the Vedic sacrifices and the other two texts Āraṇyakas and Upani ads are the texts revealing the philosophy of life of Aryans.

Now the contents of different texts of the Veda will be given below.

The Rgveda :

The Rgveda is the oldest among all the texts of the Veda. It is also known as the Rk-samhitā. This Veda consists of ten books or ten maṇḍalas. Here the word 'maṇḍala' denotes 'circumference'. As to the reason why it is called so, it can be said that the collection of revelations of poet-seers of the Veda are enclosed in certain particular method in this veda. It is a book practically of prayers of different powers of nature. Also other things are revealed here. The work 'rk' is derived from the \checkmark rc meaning to praise, extol, or celebrate. As because this is a book mainly of praise and exaltation or prayer, therefore it is called as the Rgveda. This Veda is handed down in two different forms. One is called the Rgveda of *mandala* division and the other is known as the *astaka* division.

Of these two divisions, the *astaka* division is regarded as modern one. In this particular division we see that the contents of this Veda are arranged in eight parts, each part of which consists of eight chapters. Each chapter consists of several *vargas* and each *varga* consists of five rks (verse) or sometimes more than five rks. Thus there are in total, 65 adhyāyas in the astaka division and several vargas.

The *mandala* division of the Rgveda shows that this Veda consists of ten mandals, which are again devided into of certain anuvākas (sections) and each *anuvāka* consists of certain sūktas (hymns) and each sūkta consists of certain rks (verses). There are altogether 1028 hymns in the Rgveda. This division is said as suitable to the recitation purpose.

Each of the verse of this Veda has its seer, metre, and deity. These are to be known compulsorily by a Vedic student.

Now we shall describe the contents of this Veda according to its mandala division.

We come across here the revelations of different revealers of Vedic age. The Rgveda is full of praise for the Gods Agni, Indra, Sūrya, Usā, Varuna, Vāyu, Mitrāvarunau, Aśvins, Rtavah (seasons), Kālah (Time), Grāvānah (stones), Chandramāh (Moonbeam), Dyāvāprathivi (Heaven and Earth), Parjanyah (Rain deities), Pusā, Prthivi, Vāk, Viśvedevāh, Sarasvati, Soma, and many more. Besides, the seers have revealed the knowledge of bad effect of playing the game of dice (Aksasūktam), about the utility of the frogs (Manduka sūktam), Praise of knowledge (Jñānasūktam). the creations of the creator God (Hiranyagarbhasūktam) etc. Certain philosophical ideas also are seen being revealed in this Veda. Here we see the greatness of a God Viśvakarma (R-VX. 81-820) Besides, dialogue hymns also form a great revelation in this Veda. This Veda is full of mythological ideas. Through the praise of Gods, many myths have been revealed. These are interesting source of Indian religion. The marriage of Sūryā, revealed in the tenth Mandala is an important revelation regarding the ancient Indian marriage ceremony.

Among the different gods praised in this Veda Agni stands at the head from the view point of utility. But the god Indra is praised in highest number of verses. The revelations on the god Sūrya bears a great significance among the revelations of the Rgveda. The famous Gayatri mantra occurs in this Veda. This is as follows :

(ओं) तत्संवित्वर्रेण्यं भर्गो देवस्य धीमहि। धियो यो नं: प्रचोदयांतु।

"The seer of this verse is Visvāmitra, the metre is Gāyatri, and the god is Savitā. The meaning of the verse is this, he is the god Savitā who inspires our actions and we meditate upon the great laudable lustre of the God." The idea is this it is known to all that the Sun is the source of energy. It is also the source of light and heat. Without this star there will be no leaving things on the earth. Knowing these aspects of the Sun, the revealers of ancient India worshipped it to get its inspiring lustre so that they can be inspired to do their activities regularly like the Sun. The two words वरेण्यं भर्गः need explanation. The word वरेण्यं as an adjective denotes the sense of "to be wished for" desirable, or eligible. Or it may mean 'best', most excellent, pre-eminent and so on. The word 'bharga' has been interpreted as the lustre of the Sun equal to that of 'Brahma', the 'Purusa' hymn is also a very important hymn of this Veda from the view point of sacrifices. It is here worth noticing that the Rgveda is a fine example of poetic beauty. Most of the verses of it are revealed with exquisite beauty, specially the hymns addressed to the Deity Dawn (Usa). Varuna is the personification of the sky.

In this way the Rgveda may be said as the most important scripture from the viewpoint of religion and philosophy of Aryans of ancient India. There are certain hymns remarkable for their revelation on the donations of the kings towards poet seers who praised their lords for their gifts. These are called as the Danastutis. The conflict between the Aryan and Nonaryan people was seen being revealed in the famous battle of ten kings (non Aryan) with the Aryan king Sudas. This

battle is called as *Dāsarāj ayuddhaḥ*. (Rgveda, VII.33) The appeal for unification of different people living in the society is seen in the revelation of the seer Samvanana. This is the last hymn of this Veda.

The Sāmaveda :

The Sāmaveda has been handed down in many recensions. The word 'recension' denotes 'branch' or school. Whenever it is applied to the Veda, it will mean the different branches or schools, under which a particular text has been preserved, delivered and so on. The Sāmaveda is said as being handed down under different recensions among which, the Sāmaveda of the Kauthumas consists of two parts, the 'Ārcika' or the 'verse collection' and Uttarārcika, the 'second versecollection'. In all there are 1810 verses collected in this Veda, out of which 75 verses have been said as untraceable to other three Samhitas. Most of the verses of this Veda is said to be taken from the Rk-samhita. From the collection of verses in this, it is understood that these are collected will a view to sing in the sacrifices with melody. The very name 'sāma' is explained as a verse of the Veda with 'melody'. Most of the verses here in this 'Veda' are in 'Gayatri'metre and Pragāthas, i.e. the mixture of 'Gāyatri' and 'Jagati' verses. The great sage Jaimini, the author of the great work Pūrvamimāmsā, explained the word sāma as follows : 'gitişu sāmākhyā (Jaiminisūtram. II.1.36). It is here notable that the Ā rcika part of this Veda contains 585 single stanzas, to which the various melodies or tunes belong, which are used at the sacrifice. Each of these verses (stanzas) is said as the 'Yoni'i.e the womb, out of which melody comes forth. That is 'melody' cannot be reparated from the verses of the Arcika. The verses herein it is, as per direction, sung to about double the number of different tunes. The Uttarārcika part of this Veda consists of four hundred verses mostly of three verses. These are in general sung at the chief sacrifices of the Vedic age. Besides, it is to be noted here that verses of the first part of this Veda are arranged partly according to the Vedic metre and partly according to the gods. The verses of the second part are arranged according to the order of the principal Vedic sacrifices. There are, in all seven tunes or melodies in which the verses are sung. These are, of course, controversies regarding the number of Vedic tunes. Some hold it to be of four types such as sadajah, rsabhah, and nisād ah, and some hold it be sadajah, gāndhārah, and pa camah. But in a later stage of the Vedic period, the scholars have identified these as seven in numbers and there are sadajah, rsabhah, gā ndhārah, madhyamah, pa camah, dhaivatah, and nisādah. The famous scholar Sāyaņa, the commentator of the Veda, took the seven Sāman tunes as prathamah, dvitiyah, trtiyah, Caturthah, Pa camah, sasthah and saptamah. Whatever it may be, the scholars of ancient India have recognised seven tunes of the Sāmaveda such sadajah, rsabhah, gāndhārah, madhyamah, pa camah, dhaivata and nisā dha which are in short called as सा, रि, गा, मा, पा धा, and नि.

Regarding this Veda, another important thing is to be noted down. The priests of

this Veda have followed four auxiliary song books at the time of performing different sacrifices or at some other occasions. These are as follows : Grāmageyagāna, Araṇyageyagāna, Ūhagāna and Ūhyagāna. In the book ग्रामगेयगान, village songs are collected, in the Araṇyagāna, that of forest songs are seen being collected, in the Ūhagāna and Ūhyagāna books the songs to be sung at the Vedic sacrifices are collected according to the process of singing of both grāmya and āraṇyagānas.

The Yajurveda

This Veda has been handed down traditionally into two texts viz the White Yajurveda or Vājasaneyi Samhitā, and Black Yajurveda or the Taittiriya Samhitā. The chief difference between these two 'Vedic texts' lies in the fact that the former one is revealed in verses and contains revelations on Vedic sacrifices, the latter one is revealed in both mantras and prose passages having theological discussion on the Vedic sacrifices. The contents of the two texts could be best understood merely by the contents of the Vājasaneyi Samhitā.

The Vājasaneyi Samhitā, which has been found revealed under the schools of Kāņva and Mādhyandina, consists of forty chapters. The first two chapters reveal about minute details of the New Moon and Full Moon sacrifices (Darsapūrņamā sayāga) with the oblations to the Fathers (Pindapitr vaj a). The third chapter reveals about the Agnihotra and Cāturmāsya sacrifices. The Chapter IV to VIII deal with the Soma sacrifices and animal sacrifice. The chapters IX and X are revelations on the prayers for two Soma sacrifices the Vajapeya and the Rajasū ya. In the chapter XI-XVIII are revealed numerous prayers for the Agnicayana sacrifice. The Sautramoni sacrifice has been revealed through verses in the chapters XIX to XXI. The chapter XXII to XXV contain the prayers for the Horse sacrifice, one of the most popular sacrifices of Vedic age. In the chapters XXVI to XXXV are regarded as supplementary to the previous revolutions. The chapter XXX is revelation towards the things subject for human sacrifice. The chapter XXXI also contains prayers meant for Purusa who offers himself to the cosmos. The creator God Prajāpati is identified with the Purusa and the Brahman and such ideas are revealed in the chapter XXXII. The chapter XXXIV consists of prayers whose six verses are taken as a SZivasamkalpa Upanisad. All other verses are recited at the 'Sarvamedha' sacrifice. A few funeral hymns, collected from the Regreda and which are applicable in the Vedic sacrifices like Pindapitri yaj a forms the revelation of the chapter XXXV. The following four chapters viz XXXVI to XXXIX contain the prayers for the sacrifice 'Pravargya' in which a cauldron is made red-hot on the sacrificial fire, to represent symbolically the sun in which, again milk is boiled and offered to the Asvins. The last chapter, i.e. the XL, is an excellent Upanisad, known as the Isa Upanisad, which reveals the idea of the philosophy of life and that is too, to live the life of hundred year with a sense of renunciation i.e. the sacrifice.

The Atharvaveda

The Atharvaveda, also known as the Atharvasamhitā, is a Veda propounded by two seers Athravan and Angiras. Scholars take this Veda as the source of knowledge of Magic Formulas. You will be surprised to know that here in this Veda you will be acquainted with subjects manifold in character.

It is important to note here that the two words atharvan and angiras designate two different species of magic formulas. While the 'atharvan' is taken as the holy magic, bringing happiness, the 'angiras' is taken to mean the unholy magic brining unhappiness.

Taking into these two types of hymns, the Atharvaveda seers reveal in its twenty chapters subjects like, the Bhaisajya hymns, Āyuṣya hymns, Pauṣṭika hymns, Prāyascita hymns, hymns relating to duties of women, duties of a king and so on. This Veda contains 731 hymns and is full of revelations for a householder in ancient India. There are some synonyms of this Veda such as Kṣatraveda, Brahmaveda, the Atharvāngiras Veda etc. The importance of this Veda lies in the fact of its being the source of knowledge for the common lives of ancient India and also being the source book for the Āyurveda Sāstra and Governance in ancient India. Certain philosophical hymns are also revealed in this Veda.

The Brāhmaņas

The Brāhmaņas are the other part of the Veda. These are regarded as explanatory part of the Samhitās. But that is not true. The importance of the Brāhmaņas are realized in understanding the implications lying under the performance of Vedic sacrifices and thereby understanding the socio-cultural lives of ancient Indian people. Winternitz has rightly pointed out the importance of this literature in the following words : "The Brāhmaņas are as invaluable authorities to the student of religion, for the history of sacrifice and of priesthood, as the Samhitās of the Yajurveda are for the history of prayer". (Winternitz, M., *History of Indian Literature*, pg., 164)

The word 'Brāhmaņa' at first revealed the sense of explanations of the verse of Saṁhitāpart of the Veda. But later on it is used to denote the collection of these explanations. Thus the Brāhmaņas are regarded as explanation of the words of the Saṁhitās. But in the process of explanation of words, this literature shows certain unique characteristics of its own such as : vidhi (rule relating to the performance of sacrifice etc), arthavāda (explanations regarding the meaning of Vedic verses in the context of Vedic sacrifices), nindā (censure), praśaṁsā (praise), purākalpa (discussion on sacrifices performed by Gods), and Parakṛti. (revelations on the achievements of priests of Vedic age)

Each of the four Samhitās has one or more than one Brāhmanas. Thus, the leading Brāhmana texts available in the tradition are as follows :

- Rk-Samhitā: Aitareya Brāhmaņa & Kauşitaki Brāhmaņa (also known as Sankhyāyana Brāhmaņa)
 Sāma–Samhitā: Tāņḍya or Pañcavimsá Şaḍvimsá Chāndogya Jaiminiya or Talavakāra Sāmavidhāna Ārṣeya Vansza and Devatādhyāya
 Yaius–Samhitā:
- 3. Yajus-Samhitā:
 - (a) Vājasaneyi Samhitā Satapatha Brāhmaņa
 - (b) Taittiriya Samhitā-Taittiriya Brāhmaņa
- 4. Atharva Samhitā:
 - (a) Gopatha Brāhmaņa

The Brāhmanas are revealed in prose style and these have been regarded as the first specimen of prose style in the Indian Literature.

Āraņyakas

This literature reveals the deliberations made on spiritual knowledge, theory of self, theory of knowledge of Brahma, mystic ideas of the creation of the Universe. These knowledges had been revealed in the forests during the Vedic age. The sacrifice of material objects performed in the sacrifices had been replaced by that of knowledge. Here in this literature everything has been seen to be revealed under the knowledge. The word आरण्यकम् has been defined as अरण्ये उक्तमित्ति i.e. that 'which has been told in the forest'.

The chief subject of this literature is not to explain the Vedic sacrifices but to reflect on the philosophical implications behind the performance of the sacrifices. For example the $Pr\bar{a}navidy\bar{a}$ can be referred to. Pr $\bar{a}navidy\bar{a}$, the knowledge of the vital air is revealed in many ways in the $\bar{A}ranyakas$. For a clear understanding of the greatness of Pr $\bar{a}na$ as revealed in the Brhad $\bar{a}ranyaka$ you may acquaint yourself with such a revelation as follows–

प्राणो वै ब्रह्मेति यथा मातृमान्पितृमाना चार्यवान्ब्रूयात्तथा तच्छौल्वायनोऽब्रवीत्प्राणौ वै ब्रह्मेत्यप्राणतो हि किं स्यादित्य ब्रवीन्त..... इति।

As the revealed mother, father, Acārya say that Prāṇa or the vital air are Brahma, so also Saulvāyana spoke that Prāṇa is Brahma, and from that which is devoid of Prāṇa nothing can be derived – thus say others.

(Brhādrānyakopanisad, 4/3)

Almost all the things worshiped and revealed in the Brāhmaņa has been philosophised in the \bar{A} raņyaka. All the Brāhmaņas except the Gopatha has \bar{A} raņyaka texts.

Upanișads

The Upanişads are the last part of the Brāhmaņas. The Āraŋyakas or the Upanişads are closely related to the Brāhmaņas or the Brāhmaņa literature. The style of this literature (the Upanişad) is a mixture of both verse and prose. While the Āraŋyakas reveal mainly the philosophy behind the performance of sacrifice etc., the Upanişads reveal chiefly the philosophy behind the creation of the Universe, the Relation between the creator and created things, the Jīva-Brahman relation, the knowledge about the Supreme Reality, the Ātmatattva and so on. You shall know that this knowledge had been delivered by teachers to their students who were keen to know about the Brahma and the causes of liberation etc. in dense forests during the Vedic age. With a view to this, the word has been explained as follows : i.e. the knowledge which had been taken by a student by sitting at the feet of the preceptor. The root implies to sit. The other explanation of the word is :

the knowledge is called as Upanişad because by this knowledge the teacher tried to destroy ignorance of the students and cutting of them from the bondage of worldly miseries or existences. There are one or more Upanişads of the Brā hmanas and we come across a large number of Upanişads. But from the viewpoint of subjects there are as many as ten Upanişads which were commented upon beautifully by the great philosopher Acārya Sankarācārya. To name a few Upanişads are as follows

- (1) the Aitareyopanisad and the Kausitaki Upanisad (belonging to the RK Samhitā)
- (2) Chāndogya, Kena (belonging to the Sāma Samhitā)
- (3) Katha, Szvetāśvatara, Taittiriya (all belonging to the Taittiriya Samhitā)
- (4) Brahādaranyakopanisad, Īśa (belogning to the Vājasaneyi Samhitā)
- (5) Praśna, Mundaka, Māndūkya (belonging to the Atharva Samhitā)

The greatness of this literature lies in its being the source of all the six systems of Indian philosophy that advocate the existence of a Supreme Reality and also the theory of the Soul. One sweet expression from the Īs´a upaniṣad will show you that the Supreme lord or the Supreme Soul or the Brahma governs this entire Universe. Knowing this, everybody shall lead his life with a sense of sacrifice and he shall never be covetous of other's wealth. The words in this Upaniṣadic expression are as follows :

ईशा वास्यमिदं सर्वं यत्किञ्च जगत्यां जगत्। तेन त्यक्तेन भुञ्जीथा मा गृध: कस्य स्विद्धनम्॥ (ईशोपनिषत् १।१)

1.4 Vedic language

The language in which the Vedas are revealed is very peculiar. This language is an accented language. It was Y ska, the author of the Ved ga work, Nirukta, who for the first time draws a distinction between the Vedic language and popular language. But he sees a good similarity between the two languages. (Nirukta, 1.4.). P nini, the author of the Ast dhy yi, a book on grammar of both Vedic and classical languages, also a Ved ga work, has drawn many similarities and dissimilarities between the two. In fact he has formulated special rules for analysis of Vedic words. He admitted that Vedic words are mostly of archaic and these may be analyzed from this view point. Among the ten verbal forms (lak ras) the verbal form '*let*' is absent in the classical literatum. The use of this verb is seen in Vedas only.

1.5 Vedic Accent :

Accent occupies a prominent place in the Veda. All its texts are accented texts. Such a thing is rare to see in other literatures of the world. Both Mantras and Br hmanas are revealed with three types of accent. These are Ud tta (acute accent, a high or sharp tune), Anud tta (grave accent, not elevated or raised), and Svarita (sounded as a note). The importance of these accents are realized particularly in the prose passages delivered at the time of sacrifices. Without the correct pronunciation of Vedic words, nothing can be attained, because meanings of words are guided by accents. Correct pronunciation of Vedic words are particularly necessary for smooth conduct of sacrifices and obtaining desired result. This has been stated by P nini who views that very often it is very difficult to get the appropriate meaning of Vedic verses without proper knowledge of accents. This has been referred to by Prof. Jogir j Basu as follows:

svaro varņo' kṣara m tr viniyogo'rtha eva ca/ mantraṁjij sam nena veditavya pade pade// (Basu Jogiraj, *Vedar Paricaya*, pg., 84) The *udātta* accent has been defined as *uccairudāttah* by P nini (Astādhyāyi, I.2.29). He is of opinion that when at the time of utterance of a syllable the body rises up, then that syllable will be accented as the *Udātta*. Saunaka calls it as ' \bar{a} *yāma*' in his Prātisākhya book (cf. Rgvedaprātisākhyam, III.1, उदात्तश्चानुदात्तश्च स्वरितश्च त्रय: स्वरा: । आयामविश्रम्भाक्षेपैस्त उच्यन्ते । 2 ॥). The other two accents are called by him as the *viśrambha* and *āksepa*. *Anudātta* accent has been defined as the '*nīcairnudāttah*' (P nini, I.2.30), that is the vowel when uttered with a low tone, it is called *Anudātta*. The accent Svarita has been defined as *samāhā rah svarita* i.e. when a vowel is uttered in both high and low tones, then it is said as Svarita As a rule, the first half of a Svarit accent is known as *Udātta*. P nini has pointed out another accent used in the Veda. It is called as *Ekasíruti*. When someone addresses another from a distance, then the tone is called as *Ekasíruti*. The authors of the Pratisākhya works call it as *pracayah*. The utterance of the '*pracayah*' is equal to an '*udātta*'.

As to the importance of the svaras in the Veda, a story is very often referred to. Indeed in the revelation of seers, it is expressed beautifully that a reciter of verses should know very well about the use of svaras and its movement. As per rule, the verses, accented with three accents a reciter must maintain it. This is, because accents guide the meaning of words or meaning of words are determined by accent. With even a silly mistake in the utterance of words with its accent, a reciter or a performer of sacrifice is deprived of its desired fruit. This has been expressed through a verse as found in the Nirukta as follows :

> मन्त्रो हीन: स्वरतो वर्णतो वा मिथ्याप्रयुक्तो न तमर्थमाह। स वाग्वज्रो यजमानं हिनस्ति यथेन्द्रशत्रु: स्वरतोऽपराधात्॥

> > (This has been quoted from the Vedar Paricayah, p.85)

That is : a verse uttered without accent and uttered with fault accent never reveals the actual meaning. Such a word acts like a thunderbolt and harms a sacrificer just like the injury caused to the father of Vrtra who uttered the word 'Indrasatruh' wrongly. Actually, this word is uttered in the veda in two fold meanings. When it is uttered with acute accent in the last vowel of the word then it will mean the enemy of Indra (i.e. इन्द्रस्य शत्रु: - इन्द्रशत्रुं:). But when the word is uttered with acute accent in the first vowel of the word then it will mean 'one whose enemy is Indra' (इन्द्र एव शत्रुर्यस्य = इन्द्रशत्रु:). Tvastā, the father of Vrtra uttered the word with acute accent in the first vowel. His desire was to make his son mighty, and to kill Indra, but his own son was killed by Indra, who received the oblation to become mighty. Ultimately Indra killed Vrtra and Tvastā lost his son. This story is indicative of the worst result of uttering Vedic words with wrong accent.

There are certain varieties of the three principal accents of words revealed in the Veda.

Special care was taken during the Vedic age regarding the maintenance of correct pronunciation of words with accents. It was a mechanism developed by Vedic seers with a view to preserve the Samhitā texts, Padatexts and Brāhmaņa texts. But in the compilation period of Vedas it is seen that the texts like all the Vedic samhitā, the Brāhmana texts like the Taittiriya and Satapatha and their Āranyakas were compiled with accents and other Vedic texts are compiled without accents. The Vedic accents have their special marks. The Anudātta is marked by the sign '—' under the vowel and the Svarita is marked by the sign '] ' above the vowel. The udātta has no 'mark'. Generally there is one udātta in a single word. It is followed by the 'anudātta' accent. The first verse of the 1st Sūkta of the 1st Mandala of the Rgveda is cited as an example of accented vedic text–

अग्निमीळे पुरोहितम् यज्ञस्यं देवमुत्विजम् होतारं रत्नधातमम्। (R.V. I. 1.1)

1.6 Vedic Metre

Metre is the fifth part of Vedas. It is regarded as most essential for the recitation of vedas. Without the correct knowledge of metre it is impossible to recite Vedic verses correctly. Showing the necessity of the knowledge of metre along with that of the seer and god, Kātyāyana, a celebrated grammanrian of ancient India, who also wrote vārttikas, (explanatory notes) to supplement the sūtras of P nini, very apply says as follows : \overline{a}

```
यो ह वा अविदितार्षेयच्छन्दोदैवतब्राह्मणेन
मन्त्रेण याजयति वा अध्यापयति वा
स्थाणु वर्च्छति गर्ते वा पात्यते
यो पापीयान् भवति (सर्वानुक्रमणी॥)
```

That is, an Aryan who performs sacrifice for others or teaches others Vedic verses or prose passages without knowing the seer, metre, and deity his works become futile or he falls into ditch or becomes a sinner. Such a necessity of the study of metre is also seen in the writing of other scholars both past and present.

As to the probable reason of composing or revealing ideas in metre the scholars express differently. Most of the revelations of Vedas are in metre.

The scholars are of opinion that the ideas, if expressed in metres, are easily understood than those expressed in prose. Besides, the Vedic seers, preferred mostly the metres because Vedic verses were revealed for sacrificial purposes, and that is too with a view to propitiate the gods. Thus they thought that the metrical composition could please the gods better than the prose formulae. Another reason, behind the expression of ideas in metre is thought to be of practical purpose and this is for preserving and remembering easily the ideas of seers, expressed by them. The word छन्दस् is derived from the \checkmark छद् 'to please'. This is a widely accepted derivation of this word. Yāska, the author of the Nirukta, has traced this word to the \checkmark छन्द 'to cover'. As because the ideas of the Vedic revealers were covered by number of syllables, therefore it is called as छन्द: . As because, the ideas of seers and metre are inseparable therefore the Veda has been often said as the छन्दस् | There comes the oftquoted expression, छन्दोमयवेद: |Thus the chandas became a synonym of 'Veda'. From the viewpoint of its importance in the Vedic literature it has been developed into a Vedānga work, which has been represented by the work of sage Pingala, and it is titled as the Pingalachandahsūtram.

There are altogether seven metres in the Veda. There are as follows : Gāyatri, Uşnik, Anuştup, Brhati, Pańkti, Tristup and Jagati. The Vedic metre has been characterised of numbers of letters which is not seen in the classical literature. The metre in later literature is characterised of three mātrās viz. hrasva, dīrgha and pluta. It is notable that Vedic metres are much less regular than the classical metres.

The seven metres with the numbers of letters are mentioned below :

गायत्री –	24 syllables
उष्णिक् –	28 syllables
अनुष्टुप् –	32 syllables
बृहती –	36 syllables
पंक्तिः –	40 syllables
त्रिष्टुप् –	44 syllables
जगती –	48 syllables

There are many subvarieties of there metres formed by the alteration made in the order of various feet.

Generally Vedic metres are of four feet. Here the word 'feet' denotes 'sentence'. Each of these seven metres are differentiated by 4 letters. Thus the metre Gāyatri consists of 24 letters and the next metre Uşnik is of 28 letters. In this way each of the following metres is attached with 'four' more letters. The authorities on Vedic metres like Saunaka, the author of the Rgveda Prātišakhya has pointed out that the Vedic metrical revelations possess certain specail characters which are to be carefully observed. Thus he has laid down that if a metre of fixed syllables are seen to be less or more in numbers then they are to be specified. Because if metres of Vedas are determined by number of letters, then in the revelations this is to be maintained. But actually this is not maintained. This is because the Vedas are only revealed texts, so metres or metrical compositions show certain irregularities. Hence, different names have been given to these metres, where syllables are seen to be less or more in numbers, such as Nicrt Gāyatri or Bhurik Gāyatri. If the number of syllables of the Gāyatri metre is seen to be less than

24 syllables, then it is called as the Nicrt Gāyatri and if the Gāyatri metre, which consists of 24 syllables is revealed with two more letters then it is called as the Bhurik Gāyatri. This is applicable to other six metres also. Besides, SZaunaka has pointed out the different Gods and colours attached to these seven metres. (Rgvedaprātisākhya Written by SZaunaka, Patala – 17-18, Chandaḥ Patala, 2 & 3)

In this a lot of knowledge has to be gathered regarding the metres of Vedas.

1.7 Greatness of Vedas :

The greatness of Vedas is expressed variously by scholars both ancient and modern. The text of the Veda itself expresses it beautifully. In the Satapatha Brāhmaṇa we come across the idea that by the study of Vedas a man can get as much result as by the donation of the earth. Even more he gets it by the study of Vedas. Such a person attains the supreme place of Brahman. Knowing thus a person studies Vedas everyday. Therefore all should study the Vedas. (cf. यावन्तं ह वै इमां पृथिवी वित्तेन पूर्णा ददत् लोकं जयति–त्रिभिस्तावन्तं जयति; भूयांसं च अक्षय्यम्; च य एवं विद्वान् अहरह: स्वाध्यायमधीते तस्मात् स्वाध्यायोऽध्येतव्य: । शतपथब्राह्मणम्, ११।५[६]३). Manu, the great sage of ancient India, also the reputed author of the Manusaṁhitā , asserted it by saying that the Veda is the source of all religion. (cf. Manusaṁhitā , II.6, वेदोऽखिलो धर्ममूलम्) By the word dharma he means the 'conduct'. He further expressed that a man, versed in the meaning of Vedas, even living in a hermitage, if executes his duties, he realizes the Brahman by staying on this earth. Here Manu hints upon the merit of a knower of the meaning of the Vedas. His words are as follows :

वेदशास्त्रार्थतत्त्वज्ञो यत्र कुत्राश्रमे वसन्। इहैव लोके तिष्ठन् स ब्रह्मभुयाय कल्पते॥

(Manusmrti, 12/102)

It is clear from the above mentioned statements that the study of the Vedas is most essential for the knowledge of Vedic religion. The greatness of the Vedas lies in the fact that it reveals, in such a remote past, about the essential things of Indian civilization and also the human civilization. This civilization was based on the principle of enjoying the earth with sharing the happiness and sorrows of entire community. It believes in the leading of life with a sense of sacrifice for others. The Sruti thus expresses : तेन त्यक्तेन भूञ्जीथा: मा गृध: कस्य स्विद्धनम् । (Īszopanişad, V.N.1). One of the main aims of a particular literature is to codify the cult of a nation in it. So also the Veda reveals very faithfully the culture of Aryan people. It is here observed that the Aryans were great admirers of nature. They showed their full faith upon the nature by eulogizing the different powers of natures. They conveyed the message to the human that everybody should love nature. Because it is such a thing by which human as well as the creatures in general are created, and sustained. Its greatness is released through its revelations as to what a man should do or do not. When in the problem sometimes a man doesnot find the way to overcome the problems, the Veda guides him to come out of such problems. The Veda also advocates that for a better life on this earth all people should go forward together, should speak in oneness, and should maintain oneness in their thinking too. Otherwise sense of separateness would destabilise them. (Rgveda, X.191)

From the viewpoint of language too, the language of the Vedas is taken as one of the most important languages of the world. The scholars find a little difference between the Vedic and non Vedic languages. As the Veda is a revealed text, so the language shows certain features unseen in later developed classical Sanskrit language. In fact, the latter language is a refined form of the Vedic language. This language has shown certain peculiarities of Indo-European and old-Indo-Aryan languages too. This has been brought out by the stalwarts of comparative philology. Besides, the antiquity of the Vedic language has been accepted by the philologists of the world. This language is seen to be ornamented with accents. Without a little knowledge of the accent, the meaning of the Vedas cannot be known. It was Yāska, the author of the Vedānga work 'Nirukta' who maintained that both the Vedic and non Vedic languages are meaningful words. (Nirukta, Chapter I)

In this way, the greatness of the Vedas is realised differently by different scholars of the world.

It is needless to say that the Veda is an important text not only to the Indian history but also to the human history. It is a revelation that covers thousand of years. Its probable period of compilation may be 2500 B.C. In this context the view of Prof Max Muller who held that 'whether the Vedic hymns were composed in 1000, or 1500, or 2000, or 3000 B.C., no power on earth will ever determine' (Gilford Lectures on Physical Religion, 1889) can be taken into account.

Importance of the Vedas :

The Veda is regarded as a Divine revelation. The revealers of the Veda were scholars of great intuition. The great importance of the Veda lies in the fact that the religion, philosophy, ritualistic practices, civic conduct, and even religion of India are beautifully revealed in the Veda. In short it is the source of everything that has been necessary for Indians. Therefore, with a view to know the history of India, the study of Veda is necessary. But as this is an accented literature therefore it is very difficult to understand it and feeling this as a great inconvenience, the seers of post Vedic period felt the necessity of composing certain auxiliary texts for proper study of Vedas and get their meanings in a easier way.

1.8 Summing up :

In this unit you are aquainted with the meaning and derivation of the word Veda; Besides, the contents of different divisions of the Veda, its language, accent, metre are also given to you so that you can have a comprehensive account of this literature. The greatness and importance of this literature is also introduced to you.

Check Your Progress :

(Attempt answers on these topics about 500 words on each)

- 1. Show the derivation of the word 'veda' with its meaning.
- 2. Write on the contents of the Veda.
- 3. Show your aquaintance with the language and accent of the Veda.
- 4. Write in short about the Vedic Metre.
- 5. Give an account of the greatness and importance of the Veda.

 - 3.7.5 Views of the Nairuktas on the classification of Vedic gods into three only
 - 3.7.6 Appearance of Gods
 - 3.7.7 Shares and companions of three chief gods viz Agni, Vāyu or Indra and Sūrya
 - 3.7.8 Etymologies of important words related to certain Vedic synonyms and Vedic divinities
 - 3.7.9 Summary

3.1 Introduction to the Nirukta written by Yaska :

Y ska's Nirukta has been regarded as the representative work of the Nirukta Vedānga among the six Vedāngas. Traditionally, it is given the fourth place and it has been said as the *śrotras* or ears of the Vedapuruşa. It is because the Nirukta is written as running commentary on certain Vedic vocabularies and as because it relates itself to the science of meaning, therefore, it has been described as ears and by ears only something can be heard. The meaning of Vedas can be heard and understood easily by this Vedānga and as such it has been called by the word srotras. The Nirukta comprises twelve chapters and these chapters have been divided into three great parts viz the *Naighantuka k nda*, the Naigama k nda and the Daivata k nda. The first part deals with the explanations of Vedic synonyms, the next part with that of the homonyms and the third deals with names of Vedic divinities. Two more chapters are found to be appended to the main text. The Nirukta has been commented upon by many erudite scholars of India. But the commentary written by *c* rya Durga is regarded as the best one. The simplicity of *c* rva Durga's commentary made it easy in understanding the text in a very good way by the scholars. Different scholars around the world have remarked over the merit of this text. Prof Lakshman Sarup, the author of the book titled The "Nighantu and the Nirukta" remarked that "Y ska's work is important for the history of philology and etymology. And as the representative record of the researches of ancient Indians, it is of considerable interest for a comparative study of the Indian and Greek achievements in those two branches of knowled be in the earliest period of their history" (Sarup. L., The Nighantu and the Nirukta, Introduction, pg. 54).

SAQ:

Why the introduction part of a subject is useful to a learner in distance education?

3.1 Objectives :

In this unit under the Block II, we are going to introduce you to the book *Nirukta* written by Y ska. Y ska flourished during the period of seventh century B.C. The Nirukta was written as a running commentary on certain lists of Vedic vocabulary which were collected from time to time during the Vedic age. These lists of words were known as the *Nighantu* or the *Samāmnāya*. Y ska has clearly hinted upon the nature of his work at the beginning of his work that the *samāmnāya* will be explained by him and this *samāmnāya* is called as the *Nighantu*. The Nirukta consists of 12 chapters which are broadly divided into

three great divisions which are given the little, the *Naighanțuka kānda* the *Naigama kānda* and the *Daivata kānda*. Thus taking into account all the important subjects discussed in this book including its characteristics and importance you will be tried to acquaint yourself with this masterpiece of the Sanskrit literature. This work was written in the s tra style. Hence after going through this write up which is divided into two units, you will be able to

- (a) understand the meanings of the Samāmnāya and the Nighantu
- (b) the fourfold division of words viz the noun, verb, preposition and particles.
- (c) Discourse on the meaning of vedic words
- (d) Characteristics of the Nirukta.
- (e) Characteristics of vedic divinities
- (f) Nature of vedic divinities
- (g) Summary.

3.3 The Nighantu and the Samāmnāya :

The Nighantu is a Vedic lexicon. It is also known as the samāmnāya. The Nighantu, upon which Y ska had commented upon is a book consisting of five chapters. Y ska had clearly stated that the *Nighantu* is called the *samāmnāya*. He thus said, tamimam samāmnāyam nighaņtava ityācaksate (Nirukta: 1.1) Although Y ska does not define the word samamnaya in his work yet the definition of the word is available in its tradition. Skandswami has defined it as follows: "samāmnāya sabdenātra gav dirdevapatnyantah sabdasamud yah ueyate na vedah, i.e by the word sam mn ya is understood a list that begins with the word gauh and ends with the word devapatni, and not the veda". But Y ska has explained the word 'Nighantu' in the very beginning of his work. He put forwarded threefold explanations of this word. According to Y ska the word Nighantu denotes lists of vedic words taken in a book form. These lists of words are called so because these words are taken directly from vedas with their meanings. Indeed these are meaningful words which were collected from time to time during the vedic age. Secondly, the collection of words are called the Nighantu because these were compulsorily made to be recited by vedic students. Thirdly, as because the words of the *Nighantu* were collected from vedas, therefore, these are called as the Nighantu (Nirukta, 1.1). Thus the roots from which this word is derived are the \sqrt{gam} , to know with the suffix *tun*, and with the prefix '*ni*' or the \sqrt{han} , to recite, with the prefixes sam and \bar{a} and the suffix tun, or the \sqrt{hr} , to collect, with the prefixes sam and a, and the suffix 'tun'. These explanations of the word 'Nighantu' put forward by Y ska seems to be logical as it is in conformity with Panini's rules "aunādika tun' and 'prsodā radini yathopadistam'

The *Nighantu* or the *Samāmnāya* consists of five chapters, since it is a Vedic lexicon it is seen to be a collection of three types of vedic words viz synonyms, homonyms and names of Vedic gods. The first three chapters, called as the Naighantuka K nda, consist of Vedic synonyms. The next division that contains other three chapters (i.e the fourth) contains the Vedic homonyms or single underivable Vedic words, and it is called as the *Naigama*. The fifth chapter is a collection of names of Vedic gods and it is called the *Daivata*. The feature of the fifth chapter is that here names of gods are mentioned according to three spheres viz earth, atmosphere and the heaven.

Regarding the authorship of the *Nighantu*, scholars are not unanimous. Some scholars hold that Y ska, the author of the Nirukta was the author of the *Nighantu*. Other scholars opine that *Prajapati Kas'yapa* was the author of the *Nighantu*. But it must be admitted that there was more than one author of the Nighantu. This is supported by Y ska who referred to many Nighantus by using the plural form of the word. (*Nirukta* 1.1) and once he made a passing reference to the author of the *Nighantu*. (Nirukta, 1.2.0)

Regarding the authorship of the Nighantu Prof Lakshman Sharup thought that it is not the compilation of a single author but of authors of several generations. He thus expressed : The Nighantu is probably not the production of a single individual, but the result of the united efforts of a whole generation, or perhaps of several generations. (Introduction to the Nighantu, The Nighantu and the Nirukta, pg, 14). Besides, the division of the chapters of the Nighantu, according to him, maintains some sort of a principle discernible in the arrangement of the synonyms in the first three chapters (I bid, pg, 13). He stated that the compilation of the Nighantu is the earliest known attempt in lexicography. In India it marks the beginning of the kos'a literature, and later kos'as have sometimes been called Nighantavas. (Ibid., pg, 14) He is of opinion that the Nighantu contains only a small number of the words of the Rgveda, and it does not contain any explanations of the words collected in Sanskrit or any other language, the modern term 'dictionary' cannot be applied to it, although the kos'as can be so called. It should rather be called a vocabulary, which is a book 'containing' a collection of words of a language, dialect, or subject'-when they are given without explanation, or some only are explained, or explanations are partial (loc cit.)

SAQ:

Prepare a note on the concepts of the word Nighantu and Samamnaya and show their difference with modern concept of 'dictionary.'

·····

3.4 Contents of the Nirukta

Before going to the contents of the Nirukta, let us have an introduction to the author of the Nirukta.

3.4.1 Author of the Nirukta

Little information has been gathered by scholars about Y ska, the author of the Nirukta. Y ska has frequently mentioned names of certain authorities on the school of grammar and etymology with a view to support his opinions in matters of establishing theories relating to language. Y ska has been said as predecessor to P nini, as the latter has referred to the name Y ska in his sūtra 'yaskādibhyo gotre'. This aphorism is made with a view to show that there are some gotras such as Yaska etc. and in this sense the word looses its affix. When 'Y ska' denotes a name then it will be Yaska + an = Y ska. Otherwise it will be Yaska only. As this word along with other words in the sūtra II.4.63 (Astādhyāyī) written by P nini is featured therfore scholars tried to establish that Yaska was familiar to P nini. At the same time it is also not just that the references to the authorities of grammar made in the Nirukta are enough to state that P nini was known by Y ska. Y ska infact was well versed in grammar and he categorically stated that the knowledge of the Nirukta fulfills the knowledge of grammar (Nirukta, I.15). At the end of the Nirukta, there is a statement like 'namo yāskāya'. This occurs sometimes after the twelvth chapter of the Nirukta and sometimes after the fourteenth chapter (appendix) of the *Nirukta*^a Regarding the personality and scholarship of this celebrated scholar of ancient India, Prof Lashman Sarup writes as follows: "On the contrary, he has been acknowledged to be the preeminent authority on etymology." (The Nighantu and the Nirukta, Introduction to the Nirukta, pg.49) Nothing can be deduced from the external as well as internal references about the personal life of Y ska. Yet it can be said that Y ska is the patronymic name of the Yaska gotra. Ācārya Durga also refrained from commenting upon the authorship of the Nirukta. However, scholars have put the date of Y ska sometime between seventh century and the six century B.C.

3.4.2 Contents of the Naighanțuka Kānda

The *Naighanțuka Kānda* of the Nirukta comprises three chapters. i.e. the first, the second and the third. The first chapter is an extensive introduction to Vedic words, – their classification, definitions, compilation of Vedas and Vedāngas, praise of knowledge, the verbal origin of nouns, Kautsa cantrovercy on the meaningful character of Vedic words, the aim and objectives of the Nirukta, and the threefold character of the Vedic words. At the beginning his work, Y ska refers to the traditional list of Vedic words i.c *Samāmnāya*, upon which he wrote his *Nirukta* as a running commentary. This '*Samāmnāya*' has a synonym which is called as the '*Nighantu*' Y ska has given threefold derivation of the word '*Nighantu*' which expresses that the term was originally used in the tradition

as a synonym of the word '*veda*'. Durga too clearly stated that the word '*nighantu*' means the vedic word or word belonging to the veda.(Durgvrtti, I.1.) He further opines that the words collected in the *Nighantu* are called Nigamas. This is so because when these Nighantu words whose meaning is altogether hidden are fully comprehended, they make us know with certainty the meanings of Mantras (Rajavade. V. K. Yāska's Nirukta pg 217). Nirukta, Durga's commentary, niścayen rdhika v niskrsya nigudh rth etc parij t h santo mantr rth n gamayanti j ap yanti, tato nigamasa j ime bhavanti.

To support his explanation he quoted the views of the Aupamanyava, the disciples of the sage Upamanyu, who held that the words in the Nighantu are collected from Vedas repeatedly. Here it is necessary to know the etymology of the word *'nighantu'* as putforwarded by Y ska.

The Etymology of the word Nighntu :

Y ska has traced the word *nighantu* firstly to the \sqrt{gam} , meaning to know. Taking the prefix ni, meaning completely, and the affix 'tun' belonging to the Un disutras, the word is formed as follows : ni + gam + tun. Thus it becomes nigantu. After changing the dental 'n' and 't' to nasal sound n and 't' it becomes 'nigantu'. Y skas hereby justifies the explanation by saying that as because, the collected words of the Nighantu are meaningful words therefore these are called as the Nighantu or 'Nigantavah' Later on it has been uttered as Nighantu Nighantavah. Justifying this inpretation, Prof V.K. Rajavade states that "The word Nighantu conveys the idea of (1) being fetched, (2) compiled or classified and (3) being guides in the interpretation of Rks. Durga calls these three ideas as समाहरण, समाहनन and निगमन; the explanation given by औपमन्यव conveys these three ideas; but prominence is given by him toनिगमन "(Y ska Nirukta volume-I, written by V.K. Rajavade, Bhandarkar Oriental Research Institute, Poona, 1940, pg 217). Another important subject discussed in the first chapter is the *"इन्द्रियनित्यं वचनमौदुम्बरायण:*।" (Nir. 1.1) It is a statement made by the disciples of the sage-cum-teacher Udumbara who held that "speech or words are premanent only in relation to sense organs only." Here an opinion was raised as to the permanent character of words and Y ska had discared this view by saying that words could not be related to sense organs and these are eternal utterances. Words are permanent and they existed even without the very existence of creatures like men.

In the second chapter of the Nirukta Y ska discusses about the principles of etymology, phonetic rules, and he deals with derivation of single, double or compounded words separately at length. Actually Y ska begins explanation on etymology of vedic words only in the fifth section of the second chapter. From the fifth section of the second chapter upto the last of the third chapter he deals with the explanation of the Vedic synonymous terms only. Some of the important

words explained in the second chapters are, *gauh*, *Nirritih*, *Vak*, *udaka*, *hiranya*, *apatya*, *yaj ah*, and *striyah*. The important subject discussed here in the third chapter is division of paternal poperty i.e d yavibh ga.

In the third chapter Y ska putforwarded the derivation of some important vedic words such as *karma, apatya, manusya, khala*, all the sanskrit numerals such as *eka, dvi* etc, *medhāvī, yaj a* and *striyaḥ*. The most important subjects discussed here is related to the word *apatya* and this is nothing but the division of property among the legal children of Aryan householders. The discussion on the ancient Indian numerals as well as the figure speech used in the vedic verses also occupy important place in the third chapter of the Nirukta.

3.4.3 Cotents of the Naigamakānda

The *Naigamakānda* of the *Nirukta* comprises three other chapters viz the fourth, fifth and the sixth. In these three chapters Y ska deals with the etymology of the Vedic homonymous words as well as single underivable words. This k nda is also called as the *Aikapadikakānda*. This is because here single underivable vedic words are explained. Y ska calls the homonymous words as *anekārāthāhsábdāh*. The peculiarity of the explanation of vedic words here in this k nda is that Y ska discusses the etymology of single words having different meanings individually. Seeing the nature of explanations, *Durgācaryā* says that in the previous *kānda*, words are mentioned and explained in groups and in the present *kānda* words are explained individual**f** and that is why this *kānda* is named also as *aikapadikakānda*. Y ska, the author, explained the words according to their utterance in the original Nighantu. (Durga's commentary on the Nirukta, IV.4)

Under this $k\bar{a}nda$ Y ska has discussed about the underivable vedic words whom he called as *anavagatasamskāranigama*. This word means a word whose formation cannot be shown or made. Durga says – *anavagatasamskārān avijnātasamskārānityarthahyesām prakrtipratyādisamskāro na sākalyena jnāyate*. (Nirukta, IV.3) Out of the 278 words collected in the original Nighantu under the fourth chapter, Y ska has explained almost all words. Among these, the following are mentioned with their meanings :

jaha: it means 'killed'. This word is called as underivable word. But by comparing the probable meaning of this word with other words where it occurs Y ska says that this word means 'having killed'. This is expressed as जघान 'killed'. Thus Y ska explained this word as being traced to the \checkmark h or \checkmark han 'to kill'.

nidhā means 'net':

This is also another underivable word. According to Y ska this word is called by this name because something is caught by it. He says *nidhā pāsýā bhavati*, *yannidhīyate*. (Nirukta, IV. 2.8)

dāvane/akupārasya :

These two words are underivable as well as homonyms. According to Y ska d vane was used in the veda in the sense of 'payable', and Ak para has the sense of \overline{A} ditya, Samudra, and Kaccha (tortoise).

3.4.4 Contents of the Daivatakānda

This k nda comprises six chapters in which names of Vedic gods have been fully explained by Y ska. These explanations are of immense value to the study of religion and society of ancient India. Among the chapters under this k nda, (from the seventh to the twelfth chapter) the first i.e the seventh chapter is an introduction to the nature and features of Vedic gods. This k nda gets its name 'Daivata' because here characteristics of Vedic gods have been expressed by following certain principles. According to Y ska, as 'Agni' is the nearest god for people on earth therefore this god shall be explained first. With a view to know his character, the derivation of the word is most essential. He thus etymologised this word differently. Among the subjects discussed in the seventh chapter, the definition of the words 'mantra', 'devat', threefold nature of vedic verses, subjects of vedic verses and Br hmans, determination of god's in verses where they are not revealed, the greatness of vedic gods, their classification according to their place and action, the anthropomorphic character of vedic gods are noteworthy. From the later part of the seventh chapter up to the end of the ninth chapter, the earthly gods, other deified objects have been beautifully explained by Y ska. The chapter tenth and eleventh deal at length with the atmospherie divinities and the twelfth chapter is an entensive study made by Y ska in regard to the celestial divinities. In all, the entire third k nda of the Nirukta is a great contribution towards the vedic divinities which are the guiding force behind the Indian religion and philosophy. Here we come across the vedic concept of pluralistic worship together with the monism.

Stop to Consider :

The word 'deva' has been traced to three roots by yaska. These are : deva is called so because it makes gift ($\sqrt{d\bar{a}}$) or because it is brilliant (\sqrt{dip}) or from being radiant (\sqrt{dyut}), or because his phere is heaven)

SAQ:

Give a brief sketch of the contents of the Nirukta.

.....

3.5 Characteristic of the Nirukta

The Nirukta written by Y ska is one of the finest works in the world literature. Due to its manyfold characters and merits it has been studied, edited and commented upon by different erudite scholars around the world. Prof Lakshman Sarup has for the first time, transtated the Nirukta into English language, and edited cretically the text with Introduction, Exegetical and critical Notes, Indexes and Appendices. In the eyes of the scholars, the Nirukta has a twofold character. On the one hand it is the first systematic study of ancient Indian phonetics and is credited with certain principles of etymology and on the other hand it is a beautiful piece of work that reflects on the vedic divinities. Thus by way of etymologising vedic words and vedic divinities the Nirukta contributed generously to the study of Indian religion, culture and philosophy. The following are the notable features of the Nirukta.

(a) Although the *Nirukta* of *Yāska* is a vedānga work written in *sūtra* style, yet the prose of the work is as simple as the classical Sanskrit, because the Nirukta was written as a running commentary on the ancient lists of vedic vocabulary, which is known as the Nighantu or the Sam mn ya.

(b) The principles of etymology as putforwarded by Y ska are noteworthy contributions to the science of philology. The phonetic principles as pointed out by Y ska are Syncope, Metatheses, Anaptyxix, haplology and so on.

(c) Y ska also advocates certain principles of etymology. The word etymology has been rendered by him as 'nirvacanam' or 'vyatpattih'. He shows his concern in the explanation of words by pointing out the root of a particular word keeping intact the similarity between the root and the derived word. He clearly states that not all words are subject to derivations. Only the words whose accent and grammatical forms are regular and are accompanied with a radical modification in the usual manner i.e in accordance with the laws of phonology, are to be etymologised. In doing so accents shall be maintained, because the vedic words are only 'accented' words. This is to be maintained and Y ska has maintained it. The second principle advocated by him is that in case the accent and grammatical form are not regular, and are not accompanied with a radical modification, one should always take his stand on the meaning of the word and endeavour to derive it from some similarity of forms, or if there is no such similarity of form, even from the similarity of a single letter or syllable. One should not give up the attempt at etymologising words. Otherwise the real sense of the word uttered will remain unintelligible. The third principle formulated by Y ska is that one should derive words in accordance with their meanings.

(d) It was Y ska who, for the first time, put forward the theory of verbal origin of nouns.

(e) Y ska classified the vedic divinities into three parts and this is made in regard to the spheres where the activities of these gods are confined and the nature of their services rendered to the earthly creatures. Here in the Daivatak nda which consists of six chapters, Y ska has reduced the innumerable vedic gods into

only three gods viz the Agni, the Indra or V yu and the Surya, all of these are taken as the lords of three spheres of the universe i.e the earth, the atmosphere and the heaven. His interpretation of the Vedic gods is seen to be based on the nature.

These are some of characteristics important to note with regard to the Nirukta written by Y ska.

3.6.0 Fourfold division of words

Y ska was a follower of the school of etymology. The advocates of this were called as the Nairuktas. These scholars aimed at the interpretation of vedic words on the basis of the meaning of words. Meaning, therefore, has taken utmost priority in the hands of these scholars who were best known authorities on grammar too. The main distinction between the Nirukta and Grammar lies in its treatment of the explanation of words. While the followers of the *Nirukta* aimed at interpreting vedic words from the viewpoint of meanings, the Grammarians or the followers of the school of grammar aimed at the formation of words in their interpretation. The followers of the school of the Nirukta are called as *arthavādin* and that of the grammar are called as *śabdavādin*. Y ska as a Nairukta first of all advocated the theory of the verbal origin of words. According to him all words are derived from verbs or roots. He viewed that the words colleted in the Nighantu are of four types. These are the nouns, the verbs, the prepositions and the particles. He thus expressed – tad y ni catv ri padaj t ni n m khy te copasarganip t scat nim ni bhavanti. (Nirukta, I.1)

3.6.1 Discourse on the Akhyāta (Verb)

Y ska defines *ākhvāta* i.e verb as a word where becoming as its fundamental notion predominates. *Akhyāta* is a big process which begins sometime and ends as so. The *ākhyāta* or the sense of becoming predomionates in a sentence. For example, he goes, she eats etc. According to V rsy yani, there are six modifications of becoming. These are genesis (जायते), existence (अस्ति), alteration (विपरिणमते), growth (वर्धते), decay (अपक्षीयते) and destruction (विनश्यति). Yāska has explained each of these six modifications and tries to express their importance. According to him genesis is such a modification of verb where only the commencement status of the becoming is indicated. It neither affirms nor denies its later stage. Existence affirms a being that has been produced. Alteration is a modification of elements of a non-decaying being. Growth denotes the increase of one's own parts or limts of objects associated with it. For example a man grows by means of victory or with his body. The next modification i.e. decay denotes its antithesis. The last modification is vin sah or destruction. It indicates the commencement of a later state, but neither affirms nor denies the former. There are certain other modifications that are developed from these six. (modifications)

3.6.2 Discourse on the nāma or Noun

Nouns are such words where 'being' is taken as their fundamental notion. But where both 'being' and 'becoming' exist, the becoming gets the predominence. Examples of being are 'man', 'cow', horse etc. In being the number and gender get priority. But in the becoming, case, number and time get priority. In the course of discussion on verbs and nouns Y ska refers to the view of the disciples of the sage Udumbara who held that words are permanent only in relation to its sense organs. His statement in this context goes as follows :

"इद्रियनित्यं वचनमौदुम्बरायण" (Nirukta, I.3.1)

3.6.3 Discourse on the statement

-इद्रियनित्यं वचनमौदुम्बरायण :

The meaning of the statement is that *Audumbarāyana*, or the disciples of the sage Udumbara regarded speech or word as subject to the permanence of sense organs. That is, speech exists as far as the sense organs exist or in other way, speech exists as far as the sense organs or life is there in persons. That is to say the speech is a impermanent thing like the imparmanent human life. Audamrbaras sought to establish that words or speech are imparmanent.

Y ska has refused and discarded this view of Audumbaras on the ground that if words are taken as imparmanent then the fourfold division of words will not exist. Besides, the gramamatical connexion and the mutual reference of sounds not produced simultaneously will not hold good.

After discarding the view of Audunbara, Y ska has very beautifully reflected on the character of words. He thus stated that words are used to designate objects, with regard to everyday affairs in the world. This is possible because of their comprehensiveness and minuteness. Like the word– beings the words used by human– belonging to vedas are too used to designate the deities and many more things. Those days (during the Vedic age) it was thought and realised that human knowledge was subject to disappearance and that trancendital knowledge, was also apprenended of disappearance. Therefore, with a view to preserve this knowledge, the seers had compiled it in the form of mantras and later on taken in the form of books such as Vedas and Ved gas. Here the compilation of the Vedic knowledge has been hinted upon.

3.6.4 Discourse on the Upasargas (Prepositions)

Among the four words, as pointed out by Y ska, the prepositions occupy a prominent place. Y ska has discussed about the vedic Upasargas by referring to the view of \vec{S} kat yana, an ancient scholar cum grammarian. \vec{S} kat yana expressed that the prepositions when not connected to the nouns and verbs, do not express any meaning. But they express the subordinate meanings only. The

upasargas thus do not have individual meaning. When these will be prefixed to verbs and nouns, then only they express the meaning of these words. Thereafter Y ska refers to the view of another scholar, G rgya by name, who held that the Upasargas have different meanings. These Upasargas bring about modification in the sense of the nouns and verbs to which these are prefixed. Y ska seems to support the view of G rgya, a great grammarian of ancient India, as because he is found to express the individual meaning of the prepositions expressed in the Veda. The Vedic preposition has the character of being expressed sepearately or being affixed to the nouns and verbs, which is not seen in the classical Sanskrit literature. The different uses of preposition as pointed out by Y ska are as follows means 'hiltrto' or hither ward, pra and par are its antitheses, abhi denotes 'towards', prati is its antitheses; ati and su denote the sense of approval; nir and dur are its antitheses' ni and ava have the sense of downwards, 'ud' is its antitheses; 'anu' denotes 'similarity' and 'succession'; api expresses the sense of 'contact'; upa is that of 'accession'; pari denotes the sense of 'being all around'; adhi is a upasarga that expresses the sense of 'being above', or 'supremacy'. In this way it is seen that the upasargas (prepositions) have different meanings and uses in the Vedic literature.

3.6.5 Discourse on Vedic particles

Y ska derives the word 'nip ta' meaning particle from the \checkmark pat, meaning to use with the preposition ni, meaning completely. There are a great number of nip tas mentioned in the Nighanțu. Therefore Y ska has taken the task of explaining the nip tas very carefully in his Nirukta. Accroding to him the nip tas have various uses. Y ska has classified these Nip tas mainly into three. He thus says : *apyupamartheapi karmopasam grahārthe apipadapīranāh* (Sarup. L., The Noghantu and the Nirukta, pt III, pg 30) i.e. both in a comparative sense, in a conjunctive sense and as expletives. (The Nighantu and the Nirukta, pt II, 7). Among these, the nip tas used to mean the sense of comparision are called the *upamārthiyanipātah*. Thus, Y ska has mantioned four nip tas. They are iva, na, cid and nu. These four are seen to be revealed in the Veda in the sense of comparison. Following are example of these nipātas–

(a) *iva*- अगिनरिव इन्द्र इव meaning 'like Agni and like Indra'. In the classical literature too 'iva' is used in the same sense.

(b) *na*-durm daso *na* sur y m, meaning is, like hard drinkers of wine, but in classical Sanskrit literature 'na' is used in the sense of negation. Also, the same particle is used in the sense of both (i.e comparison and negation) in the vedic literature. e.g., नेन्द्रं देवमगंसत i.e they did not recognise Indra as a god.

(c) *cid*: Although this particle is used in the sense of comparison in the Veda, yet it is used variously. The Vedic expression where 'cid' is used in the sense of comparison is, \overline{afafaq} - meaning is 'like curd'. The other uses of the particle '*cid*' are as follows:

(1) आचार्यश्चिदिदं ब्रूयात्। इति पूजायाम्।

Here the cid is used in the sense of honour. The important of the expression is that a teacher, who is an object of honour is requested to speak.

(2) कुल्माषांश्चिदाहर इत्यवकुत्सिते।

i.e. bring even the sour (waste) gruels. Here in this expression a sense of commtempt is expressed when someone asked a beggar to take the sour gruels only.

(d) nu = it is a nip t (particle) that expresses primarily the sense of comparison. For example,

वृक्षस्य नु ते पुरुहूत वयाः।

i.e. Oh, widely invoked Indra, your (arms) are like the branches of a tree. Here, the word 'nu' is used in the sense of comparison. Besides, the word is used in other senses also. Thus,

(1) in the expression इदं नु करिष्यति इति हेत्वपदेशे।i.e. in the expression 'therfore he will do it' nu is used in the sense of reasons.

(2) 'कथं नु करिष्यति' इत्यनुपृष्टे

च 'नन्वेतदकार्षीत् ' इति च।

in the two expressions such as, "how he will do it and has he really done it", nu is used in the sense of asking questions.

ħ

(2) Karmopasa grāharthiyanipātah :

The word 'karma' is used here in the sense of 'artha' i.e sense. By the word कर्मोपिसग्रहार्थीयनिपात: we understand the particle that is used to conjunct more than one sense of words. Therefore these words are called conjunctive particles. Y ska explained it in a different way. He says that these are the particles by whose advent or use, the separateness of senses are recognised. Thus he says, "अथ यस्यागमादर्थपृथक्त्वमह विज्ञाते न त्वोद्देशिकमिव विग्रहेण पृथक्त्वात् स कर्मोपसंग्रह: ।" That separation in the senses is not like an enumerative one i.e. separation made by way of isolation. Y ska has mentioned the following conjunctive particles– 'ca', 'v 'aha 'ha', 'u', 'hi', kila, m , khalu, śaśvat and n nam, etc. Following are some of its uses in the vedas.

(a) ca = ca' is a conjunctive particle. e.g., aha ca tva ca vrtrahan. i.e. oh, Indra, the killer of vrtra, I and you; here 'ca' is used twice, i.e. after the pronoun $\Im \vec{e}$ and $\overline{ca \mu}$.

(b) is also used to denote conjunction or combination. e.g. devebhyaśca pitrbhyas ety k rah, here is used once only.

(c) v = this particle is used in the sense of consideration. e.g., hant ham

prthivimim \dot{m} nidadh n ha vehaveti, the particle v is twice mentioned here. The underlying idea is that a pereson could not decide whether he would take on the earth here or in some other place.

 $v \;\;$ is used as the conjunctive particle in the following sentence– $V \;\;$ yurv $\;$ tv manurv $\;$ tveti.

(d) Aha and ha are two particles that denote 'mutual opposition' and these are combined with the former word. e.g.

ayamaheda karotvayamidam.

ida ha karisyatida na karisyatiti

(e) the particle 'u' is too used in the sense mentioned above, i.e mutual opposition. e.g. mrseme vadanti satyamu te vadanti ti.

This particle is used in the sense of pada pūrana i.e to fillup the p das or sentence. Here the word pada purana or p dapūrana is used to mean that as the Vedic metres are determined by number of letters, and as these verses were traditionally handed down, sometimes the sentences lack certain letters or sometimes they are of excess letters. With a view to make the sentences under metres some letters are to be inserted into vedic verses. These additional letters or words are called as padapūrana words. Sometimes particles are used to make a complete sentence or complete sense. e.g.

idamu/tadu. etc.

ĥ

(f) $h\bar{i}$ = This particle has different uses e.g.

(1) it is used to denote the sense of reason. e.g. ida h karişyati.

(2) Katha h karisyati ityanuprste, here h is used in the sense of asking question.

(3) Katha h vy karisyati tyas y y m, here 'h ' is used to denote the sense of jealousy.

(g) Kila-this particle is used in the veda to mean the excellence of knowledge. e.g., eva kileti.

When it will be used with the two words 'na' and 'nanu' then it will denote the sense of 'asking question'. e.g. *na kilaivam*, *nanu kilaivam*

(h) m denotes prohibition. e.g.,

m karsih

m harșiriti.

meaning "do not do it", and "do not take";

(i) Khalu means too prohibition. e.g.,

Khalu krtv, enough of doing this,

Khalu krtam, have done with it,

Besides, khalu is used to fillup the vedic sentences (padap rana) e.g., eva khalu tad babh va eti. meaning, Thus it happened.

(j) Śaśvat- it is used to interrogate something e.g., शश्वदेवम इत्यनुपूष्टे but in the classical Sanskrit it is used to denote uncertainty. e.g., eva śaśvat. i.e; was it ever so. The interrogation type of sense in not towards oneself.

(k) n nam is a particle that has also the sense of uncertainty in the classical Sanskrit. It is to be noted here that the sense of uncertainty and that of expletive is seen in the Veda. e.g.,

na n namasti no ś vah kastadveda yadudbhutam.

meaning is : there it seems, it does not exist; there is no to-morrow; who knows that which is not past? It is used here in the sense of uncertainty, Besides, it also used in the sense of expletive or padapūraņa.

(3) Padapuran rthiyah Nip tah :

According to Y ska those Nip tas which are used, as well as to fill up a sentence in a poetic compositions, are called as expletives such as kam, im, id and u. These will be discussed as follows :

(a) *Kam*- this particles is used in the following vedic expression only as an expletive.

bibhyasyanto vav śire

śiśira j van ya kam,

The second p da of the Rgvedic verse (8.8.19.1) ends with the word 'kam'. Here, this last word 'kam' is used or uttered with no sense. Only for *padapurana* it is uttered as such. Y ska considers it as अनर्थक (i.e. meaningless).

(b) ईम्- This is also another Vedic expletive. e.g. in the following Vedic expression,

emena srjat sute.

meaning is he emitted it for pressing (of soma juice)

(c) इद्

tamidvardhantu no girah

i.e. may our hymns make him grow.

(d) u =

ayamu te samatasi

i.e., this person, whom thou approachest, is for thee. Sometimes 'iva' is used as expletive. e.g. su *viduriva/su vijñāyeto iva*

(e) Sometimes 'na' and 'id' – these two particles are used to mean apprehension. e.g.

nejjihmāyanto narakam patā ma.

i.e., lest we should fall into hell.

(4) Y ska has discussed, under the content of the use of vedic particles, the issue of taking 'tva' as a particle. Also he discussed about the word sim.

(a) Sim has the sense of totality (*parigrahārthiyah*) and sometimes is used as expletive (*padapuraņo* vā).

e.g., (i) parigrah rthiyah pra simāditya asrjat. i.e Āditya sent them forth.

(ii) or the word sim is used as an expletive. This word is used with ablative case. i.e. vi sīmātah suruco vena āvāh, itica.

Thus it may be used in this sense in its different forms such as,

simatah - simatah - simatah which mean 'form the boundary'. For sima means boundary, i.e., it forms the seam between two countries.

From the exposition of Y ska it seems that Y ska was not confirmed about the use of the word as a vedic expletive.

(b) Tva.

ā

According to Y ska '*tva*' is a pronoun with the sense of 'opposition', and it is an unaccented word. Some hold it be a synonym of 'half'.

(i) tva as a pronoun is revealed in the following vedic expression -

rcām tvah posamāste pupusvān

gāyatram tvo gāyati sakvarīsu

Here in it, the word 'tva' is seen to be revealed in unaccented form, 'tva' has the sense of 'one'.

(ii) Some take the word 'tva' as a particle. As such there arises a doubt as to the nature of this word.

It is rather seen being clearly inflected. Y ska further states that this can be solved by citing a vedic expression where *tva* is used as a 'particle' meaning 'aggregation'. e.g.

paryāyā iva tvadās vinam.

meaning is : recurrences and possession of As vins. i.e., possession of As vins and recurrences.

SAQ:
1. Show the features of nāma and ākhyāta.
2. Write an account on the vedic upasargas and nipātas.

3.7.0 An Introduction to Vedic Divinities : It nature and Characteristics

Y ska has putforwarded an important introduction on the vedic divinities covering their nomenclature, nature, classification, greatness and anthropomarphic aspects under the seventh chapter of his work.

The names of vedic gods are seen to be collected in the fifth chapter of the book on vedic vocabulary, that is known as the Nighantu or the Sam mn ya. With a view fo explain the names of gods, Y ska at first wants to appraise that the gods are invoked in verses with certain desires. Through these verses the worshippers wishes to obtain their desired objects. Here Y aka speaks about three types of vedic verses.

3.7.1 (1) Three types of Vedic Verses :

 $Y_{\rm s}$ ska says that there are three types of vedic verses. His expression goes as such –

t strividh rcah/parokşakrt h pratyakşakrt h/ dhy tmikyaśca

i.e. the vedic verses are of three types viz parokṣakṛta i.e., indirect verses, pratyakṣakṛt h, i.e. direct verses and the dhy tmikyaḥ i.e., self expression or self made verses. Now let me explain all these expressions to you one by one.

(a) Pārokşakrta rcah :

As has already been said that the vedic verses are invocation to gods who are expected to bestow the desired objects to the invokers. As such we see some invocations that are made in indirect manner. These expressions are chacterised of having the use of the verb in its third person and the subjects are in all seven case endings of noun inflection. Following are the examples of various uses –

(i) इन्द्रो दिव इन्द्र इशे पृथिव्या: ।

i.e. Indra is the lord of heaven and earth.

(ii) इन्द्रमिद्गाथिनो बृहत्। i.e.,

The worshippers (chanters) invoke alone the god Indra.

(iii) इन्द्रेणैते तृत्सवो वेविषाणाः । i.e.,

The Tritsus being active with Indra.

(iv) इन्द्राय साम गायत। i.e.,

Chant the s maverses for Indra.

(v) नेन्द्राढृते पवते धाम किं चन। i.e.,

Without Indra, no place is seen to be pure.

(vi) इन्द्रस्य नु वीर्याणि प्र वोचम्। i.e.,

Now I will reveal the heroic exploits of Indra.

(vii) इन्दे कामा अयंसत। i.e.,

Our desires rest on Indra.

In all these seven invocations made by vedic seers, the god Indra has been seen to be invoked in all seven singular case endings. Thus these expressions are said as indirect expressions of vedic seers. \bar{a}_i

(b) Pratyakşakrta rcah :

By this expression we understand that vedic verses are sometimes revealed directly. These are expressions made by the poetseers to the Gods. These are characterised of verbs in their second person and the subjects are in their pronoun form i.e 'yuvan'. i.e., you. Thus Y ska says :

"atha pratyakṣakṛtā madhyamapuruṣayogāḥ/tvaniti caitena sarvanāmnā" (Nirukta VII. 2).

Example of these verbs are :

(i) tvamindra balādadhi

(ii) vi na indra mṛdho jahi etc.

In the first sentence Indra has been directly addressed by the seer as being born of strength. The words '*tvam*' and adhi ($j\bar{a}yase$) are expressed in the pronoun form and in second person singular respectively. So also in the second sentence, Indra has been asked by the seer to kill the enemies.

There are certain verses where the worshippers are directly addressed by gods and these gods became objects of indirect invocation. For example,

(i) mā cidanyadvi sa sata.

(ii) kaņvā abhi pra g yata

(iii) upa preta kusikascetayadhvam

(i) In the first sentence, the gods who are objects of worship addressed the seers not to praise other deities than themselves.

(ii) In the second sentence, kanvas, certain ancient vedic poets, are asked by gods to sing for them.

(iii) Kuśikas, some other seers, are asked to approach to them– (gods) and asked to be careful.

(c) *Ādhyātmika Ŗcaḥ (Self invocations)* :

There are certain vedic verses where self invocations are made by gods. Here in these verses the use of the pronoun '*aham*' and the verb in its '*first person*' are seen. The following are the examples :

(i) pra v t iva doghata

unmāpitā aya sata

kuvitsomasyāpāmiti (R.V.X. 119.2)

i.e. Indra expresses his feeling as such - like the shaking air, the soma drinking shatters me. Here, Y ska mentions the first verse of the Labas kta, as

iti v iti me mano

ħ

g maśva sanuyamiti

kuvitsomasy p miti. (R.V. X.119.1) i.e.,

Taking the form of Laba Indra drank severly; after that he realised that the seers were looking at his drunken face and behaviour, therefore he felt ashamed of it and said to himself—"my mind is not within my control (Therefore, my condition is not so good. My mind is not cooperating me). As such I said I shall give cow I shall give horse etc." As because Indra had gone through heavey drinking many times, therefore he had a mind to give cow etc to other with a view to favour them.

Here the word 'aham' is in the sixth case-ending therefore it is called as self invocation.

(ii) an example is given from the Indra Vaikuntha hymn by Y ska, it runs as follows : (Indra Vaikuntha hymn. R.V., X. 48-50) one expression from R.V.X. 48.1., as :

aha bhuva vasunah

p rvyaspatiraha etc. i.e.

I became the chief lord of wealth. Y ska has referred to another famous self invocation and that is known as v g mbhrneyam etc. In this hymn the speech

deity praises herself. So she is the revaler as well as the deity of the hymn.

Among the three types of vedic verses, the direct and indirect verses are more in number than the self invocations.

SAQ: Prepare a note on the types of Vedic divinities.

3.7.2 Subjects revealed in the Vedic verses :

In the three types of vedic verses various subjects have been revealed. These are discussed below for your better information.

1. Y ska has pointed out that the vedic seers have revealed mostly about the eulogy of vedic gods. Thus, eulogy is a subject of most of the vedic verses.

e.g., in the following expression the seer has alogised the god Indra and he maintains that he will describe the heroic activities of Indra. He thus says :इन्द्रस्य तु वीर्याणि प्रवोचम्।

2. In some verses the seer is seen to seek benediction or blessing of gods. e.g.,

sucaks ahamaks bhy

bh y sam/suvarc mukhena

suśrutkarn bhy mbh y sam etc.

i.e. it means : may I see well with my eyes, may I be radiant in my face, may I hear well with my ears.

3. Oath taking and curse are the subjects revealed in the veda. e.g.,

अद्या मुरीय यदि यातुधानो अस्मि।

```
अधा स वींरैर्दशभिर्वियुया:।
```

(i) The first sentence reveals the act of taking oaths. It says that – if I am a evil spirit then I will die today.

(ii) The second sentence reveals the act of cursing others. It says that 'he may be deprived of ten sons.'

4. Y ska has pointed out that some verses of vedas have expressed some kind

of special thought. Or some special querries regarding certain things occupy prominent place in vedic verses. e.g.,

na mrtyur s damrta

na tarhi/tama sittamas

g hamagre (R.V.X. 129.2,3)

the meaning is of this revealation is : "then there was no death, nor indeed immortality. In the beginning of creation, there was darkness, everything remained hidden in darkness."

5. In some vedic verses, paridevan i.e lamentation has been revealed. This lamentation was due to some serious thought. The seer thus says, about the lamentation made by the king Pururavas in a particular verse of the *Rgveda*. It is revealed as follows :

(i) Sudevo adya prapatedan vrt.

"The god shall favour me, so that I can falldown from the mountain and never alive"– thus lamented the king Pururavas who was separated from his nymph wife Urvasi. Without her he could not live. This was his lamentation.

(ii) na vij n mi yadi vedamasmi.

or na vij ni mi yadi v ida asmi. 🖬

i.e., here the lementation of the seer Dirghatamas is revealed. The hymn is known as the 'Asyav miya'. The great sage Dirghatama lamented over the issue whether he was a Brahmarsi or not. He was a great devout scholar of ancient India.

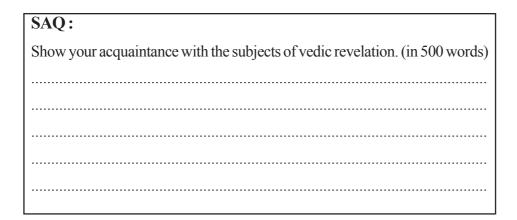

6. Praise and censure are too revealed in the veda. Following are examples by which we come to know that the vedic seers revealed subjects like praise and censure.

(i) Kev lagho bhavati keval di:

It means 'he who eats himself becomes a sinner.' By this revelation we understand that a man shall not be too much selfish. He shall share everything of his life with his fellow beings. Thus this is a subject that mattered with censure.

(ii) bhojasyeda puskariņiva vesma.

it means : A person who eats or shares with others had a free and fare life, just like a transperant lake. Similarly, censure of the game of dice and praise of the plough work have occupied a prominent place in the vedic revelation.

3.7.3 अनादिष्टदेवता मन्त्राः

Examination of deities in vedic verses where gods are not revealed directly.

Y ska has called some vedic verses as an distadevat mantr h. The word $\bar{a}dista$ means that which is revealed. It is sadi as 'an $\bar{a}dista$ ' when it is used to mean that which is not revealed. The expression 'an $\bar{a}dista$ mantr \bar{a} ' means verses where gods are not directly revealed. In the course of study of the Rgveda Y ska found that there are certain verses in the Rgveda where no deity has been revealed. With a view to determine the deity of these verses he has proceeded for close scruting of these verses and after due scrutiny he arrived at certain conclussions which are expressed by him as follows–

(i) yad devatah sa yaj ov yaj āng mv taddevat bhavanti/ath nyatra yaj tpr j paty .

The deity of such the verses will be the deity of a chief sacrifice or part of main sacrifice. That is, if a verse does not have a deity then the deity of a main sacrifice or related sacrifice in which such a verse is applied, will be the deity of such a verse.

(ii) if such a verse is not applicable to the sacrifice, then the deity of such a verse will be Prajapati. This is the view put forwarded by the authorites on the sacrifices.

3. According to the etymologists (nairukt h) the deity of such verses is the Nar sa śa i.e Agni. This is viewed so because Agni is the presiding deity of all vedic sacrifices. Without the kindling of fire, no sacrifice can be performed.

4. Or the deity may be a optional one or it may be according to the desire. Y ska thus says, 'api v s k madevat syāt.' or even a group of deities. That is the deity of such verses may be a group of deities.

The word '*prāyodevatā*' mentioned in the context needs explanation. Durg c rya, the commentator of the Nirukta, explains the word *prāya* firstly as the *adhikāra*, i.e. subject to the contextor the superintendedness. e.g. if a अनादिष्टदैवत: मन्त्र: i.e. a verse in which the deity is not mentioned, belongs to a ceremony like the beginning of veda study presided over by a deity, then this (presiding) deity will be the deity of such a verse. Thus the deity varries according to the context. So also the deity of such verses varies according to different context. Like the uses of different subjects in vedic verses, so also in everyday life, there is a prevalent practice in the world that this is the deity of this thing, the presiding of this thing is *atithi*, the presiding deity of this thing is fathers, in the way after separate directions of separate deities of things on the earth, the things that will be left have their deity as all gods. Thus all gods will be the deity of the verses where gods are not mentioned. Here the word 'pr ya' has been explained by Y ska as bahula i.e. many e.g अनुतप्राय is अनुतबहुलम्

5. Finally Y ska concluded on the context by stating that the presiding deity of sacrifices i.e Agni or Nar sa śa will be the deity of the vedic verses where gods are not revealed. He thus expresses–

yājñadaivato mantra iti. (Nirkuta VII.4.7)

SAQ: Tell about the reasons by which the presiding deity of verses of vedas, that do not have deity, can be ascertained with the help of this write up. (in 500 words)

3.7.4 Supereminence of Gods

माहाभाग्याद्दिवताया एक आत्मा बहुधा स्तूयते।

With a view to introduce the nature of vedic gods, Y ska has very beautifully showed the superminent personality of gods revealed in the veda. When Y ska had thoroughly studied about the gods, he found that the gods are revealed as sentient things. For example Indra is described as a great king of the Heaven or Atmosphere who was used to ride on his two tawny horses and he travelled the three *lokas* freely. He had his wife Saci, a benevolent lady. She was the beauty of the house and so on soforth. But interestingly Y ska found that insentient things as well as mortal things were also worshipped in the veda as deified objects as well as insentient things. He thus referred to sentient creatures. Besides, eight pair of words that are mostly insentient objects were also invoked as deified objects. The Nighant records these earthly things as revealed in the Sruti. (Nighantu, V chapter, 3).

Thus the words numbered as 22 ari aśva, śakuni, mand ka, aks h, grāvāṇaḥ, narāśa saḥ, rathaḥ, dundubhiḥ, isudhiḥ, hastaghnaḥ, abhiśavaḥ, dhanuḥ, jy , isuḥ, aśv jani, ul khalam, vṛṣabhaḥ, drughaṇah, pituḥ, nadyaḥ, paḥ and oṣadhayaḥ.

So also the eight pairs of words are–ul khalamusale, habirdh ne, dy v prthiv, Vip tcchutudri, \overline{Artni} , sun \overline{sirau} , devijostri and dev rj huti.

After going through these two lists you will feel that most of these words are familiar to you. But interestingly these objects are deified in the veda along with other gods. Here Y ska felt the necessity of exposing the true character of vedic gods. He told the readers that these deified earthly objects both sentient and insentient should not be taken as adventitious as it were. Here the word ' $agant \bar{u}n \bar{v}arth \bar{a}n$ ' is to be understood carefully. All earthly things are subject to two things i.e, birth and death. But when these will be worshipped along with gods then these shall be treated as immortal only. In the earthly life the horses are all additional things to the mortal human beings. If all these mortal things be attached to the immortal gods then the prayers will be meaningsless – thus opines Durg c rya. If mortal things such as the horses etc will be taken as so then everything will be meaningless. Apprehending this Y ska made the people aware by saying that there is a great distinction between men and gods. He thus expressed

```
माहाभाग्याद्देवताया एक आत्मा बहुधास्तूयते।
```

एकस्यात्मनोऽन्ये देवाः प्रत्यङ्गानि भवन्ति॥

As because the gods are attached with supereminence therefore one single soul has been extolled in many ways. The gods are as if parts of that great soul. That the gods like Agni, Indra, V yu, S rya, Varuna, Us are parts of that soul and each of these gods is worshipped as soul of the Universe. This is idea is beautifully laid down in a verse of the Rgveda. It is revealed as, (R.V.1.164.46)

इन्द्रं मित्रं वरुणमग्निमाहुरथो दिव्यः स सुपर्णो गरुत्मान्।

एकं सद्विप्रा बहुधा वदन्त्यग्निं यमं मातरिश्वानमाहु:॥

the meaning of the verse is : "the wisemen call the yonder sun as Indra, Mitra, Varuna and Agni. That sun is divine and it can go everywhere and has rays as its wing. The wisemen call this Āditya or S rya, (the Supreme Soul), in many ways. That Supreme Surya is the soul of the Universe and is called as Agni, Yama and M taris v i.e V yu (Vital Air)."

Stop to consider :

Lokas : This word implies three words

There goes the saying "*ekaiva vā mahānātmā devatā sa sūrya ityācakṣate*" By this verse the seer intends to say that there is no difference between the Brahma and Sun. The Sun is the soul of this Universe.

Here is this context the word '*Māhābhāgyād*' needs explanation. This word is formed of two words viz., mah n and bh ga. The former word denotes the sense of 'great' and the later denotes 'ai varyam' i.e. Supermacy. The gods are credited with superme power and that is why they are worshippable. Durg c rya expresses it as: *bhajyate sevyate it bhāga aisvaryam*.

As because the gods are attached with supreme power therefore one soul is invoked variously. The idea is this Y ska takes the words tm , parames/vara and devat as synonāyms. The soul is one, but as because this soul is one and it is attached with supreme power therefore it is worshipped variously in the veda.

All other gods are regarded as its (soul's) parts only. By this we understand that as the limbs are attached with the body, so the gods are intimately attached to the Soul. Thus Agni, Indra, V yu, S rya are attached to the great soul of the Universe, i.e. Brahma or Supreme Reality. Y ska thus says : *ekasyātmano'ney devā*h *pratyangāni bhavanti*.

(ii) Y ska refers to the view of the \bar{A} tmavi dins with a view to show the necessity of worshipping sentient and insentient earthly things in the veda. The \bar{A} tmavi dins are the advocates of the supreme entity of the soul in the Universe. These wise men view that all the created things in the Universe are manifold forms of the nature. Nature is mainly responsible for creating things in the earth. Here the word '*prakrti*' is used in the sense of *paramātmā*. All the things created in the Universe are only modifications of the Nature. Taking into account this idea, the seers worshipped the earthly things like horse, mortar and pestle as deity in the Veda. They saw no difference between the creator and the created things in the Universe.

(iii) Y ska has referred to another view putforwarded by naturilists. The naturilists are the advocates of accepting the Nature as the supreme entity. According to these advocates *prakrti* or *Parames'vara* is the cause of the entire creation of the Universe. Here the word *Prakrti* connotes the *Parameswara* i.e. the supreme soul. In this sense every created things can be called as *prakrti* related things. As because there is no difference between the prakrit and its created things therefore the seers worshipped the created objects like the horse, motar-pestle as deified objects in the veda. By worshipping horses and others actually the seers aimed at worshipping the creator God of all these objects. This is really a way to look at the creator god in all created things.

(iv) The gods are attached with certain supreme powers. With a view to show it in a befitting way Y ska has felt the necessity of putting the characters of gods as such – the gods are produced from one another and they mutually are dependent on one another. Besides, it is also maintained by Yaska that the gods are gifted with the quality of originating owing to their duties. And they can give birth to

themselves. The idea behind this is that gods are created out of themselves. They do not depend on others. Also they were created due to their activities, these two things are not seen in earthly things. An earthly object is subject to birth and death. Such an object can not be the cause of some other things. Indeed the created thing expects and depend on other things on the Universe.

In order to show the inseparableness of the soul and gods, Y ska has quoted a vedic sentence that reveals thus

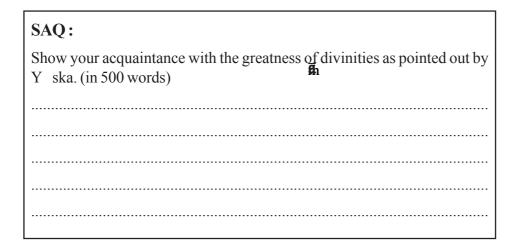

atmaivais ratho bhavati tm

as'va tm yudham tmesava

tm sarva devasya devasya.

i.e., ātm (soul) eva () es (of these) rathaḥ (chariot) bhavati (is or becomes). tm (soul) is as'va (horse), atm (soul) is their yudham (weapon) atm (soul) is their isavaḥ (arrows), tm is sarvam (everything) of gods, gods. The meaning of this sentence is this :

The soul is the chariot of gods, the soul is their as'va i.e. horse driving force, the soul is their weapons, the soul is the arrows of gods, the soul is everything for gods.

$\mathbf{3.7.5}$ Views of the Naruktas on the classification of Vedic gods into three only

It is known to all that the vedas are revealing innumerable gods and their nature has been beautifully laid down by the vedic seers. Y ska has reduced all these innumerable gods into three categories viz the earthly gods, atmospheric gods and the heavenly gods. He thus says –

''तिस्न एव देवता इति नैरुक्ताः।

अग्निः पृथिवीस्थानो वायुर्वेन्द्रोवान्तरिक्षस्थानः सूर्येा द्युस्थानः ।''

i.e. The Nairuktas held that there are only three gods. Agni belongs to this earth,

 $V\ \ yu$ or Indra belongs to the atmosphere and the S $\ \ rya$ belongs to the heavenly reason.

The word *nairukta* means *nirukta kartārah* i.e. the author who are used to explain vedic words from the viewpoint of etymology. The two words 'nirukta' and 'Vyutpattih 'are synonyms.

As to the reason for classifying the vedic gods Y ska holds that the gods are attached with supreme powers and because of this each of these three gods hold many names.

(ii) or owing to the discharge of different duties, each of these three gods holds separate appelations. This has a similarity to the duties of a person, who although one, yet he had to discharge the duties of four priests viz Hotā(Rgvedic priest), Adhvaryu (Yajurvedic priest), Brahm (Atharvavedic priest) and Udg t (S mavedic priest) and by virtue of these duties that one priest held the four names such as the Hot ,Adhvaryu, Brahm and Udg t .

(iii) Y ska here, refers to a view made by the $\overline{Atmavids}$. The *Atmavids* were advocates of the Supremacy of the soul. These authorities held that the gods differ among themselves, because they are worshipped separately. Each god is separate from the other because of separate eulogy. And thus they have different appellations. But they are created by the Greator God, and there is no difference between the creator and the created thing. As such by the eulogy of different things actually the creator God or the Soul is worshipped.

Y ska was against the separate entity of gods. Therefore, criticising the view of the authorities on the sacrifices, he mantains that the view that gods have their different appellations due to their different activities is not hold good, because different gods or many gods can do their duties by sharing their duties among themselves.

He thus expressed his view as follows-

```
तत्र संस्थानैकत्वं सम्मोगैकत्वञ्चोपेक्षितव्यम्।
```

i.e. here in this matter observation should be made on the community of jurisdiction and enjoyment of the three spheres by the gods.

The two words संस्थानैकत्वं and सम्मोगैकत्वम् need explantion. स्थानेन सह वर्त्तमानं संस्थानम् i.e. living in the same place. एकत्वं means sameness. Thus by the first word we understand that if there is sameness regarding habitate among different things or objects or creatures then the matter shall be called as that there is संस्थानैकत्वं among these things.

By the word सम्भोगैकत्वं we understand sameness regarding the nourishment of something by something else. This word is formed of two words सम्भोग and एकत्वम्. Here the word सम्मोग means complete or good enjoyment. The word 'एकत्व' means sameness. Thus when there is sameness in the act of enjoyment of some object by some other objects then that act is called 'सम्मोगैकत्वञ्च'

The underlying idea of the sentence तत्र संस्थानैकत्वं सम्मोगैकत्वञ्चोपेक्षितव्यम् is that although there are many gods and although one god has many appellations due to their manifold activities as revealed in the veda, yet the matter of संस्थानैकत्वं and सम्भोगैकत्वं of the gods are to be considered. With a view to show the unity in the diverse activities of gods Yaska has expmplified it as follows :

''यथा पृतिव्यां मनुष्याः पशवो देवा इति

स्थानैकत्वम्। सम्मोगैकत्वं च दृश्यते। यथा पृथिव्याः पर्जन्येन च वाय्वादित्याभ्या च सम्भोगः। अग्निना चेतरस्य लोकस्य।"

There is community of jurisdiction among men, animals and gods on the earth. That is men, animal, gods like plants, etc live together on the earth. This is called संस्थानेकत्वम् ISo also there is seen community of enjoyment or nourishment among these things on the earth. As for example, the god *Parjanya* (rain) *Vāyu* and Āditya enjoy the earth mostly. This is called सम्भोग of the these things of the earth. The god Agni infact enjoys the other worlds viz the atmosphere and the heaven.

Such type of community of jurisdiction and enjoyment is seen not only on the earth and related gods but also on the other two spheres of the world i.e. the atmosphere and heaven. Therefore Y ska concludes by saying that 'तत्रैतन्नरराष्ट्रभिव।' (Nirukta VII.5). This sentence may be read as, तत्र एतत् नरराष्ट्रम् इव.

 \bar{a} i.e. this types of community (in respect of jurisdiction and enjoyment) is seen in the case of people and its state. As the state without its subjects is inconceivable and vice-verse, so also the Brahma is inconceivable without the natural objects like the Agni Indra S rya and V yu, and also the earth is conceivable without its surrounding things like light, air, water etc. Therefore, it can be concluded that although there are innumerable gods worshipped in the veda, yet these can be known from the worship of the three gods mentioned above.

SAQ:

Assess the statement of Y	ska as to the three types of gods. (in 500 words)

3.7.6 Appearance of Gods

Y ska has taken up an important discussion on the appearance of vedic gods in the seventh chapter of his work. Y ska express about two diverse views in this matter. On the one hand some scholars hold that the gods are anthropomorphic and on the other hand they are unanthropomorphic.

(a) The word पुरुषविधा: in the statement पुरुषधा: स्युरिति एकम् means पुरुष प्रकारा:, i.e. the gods are revealed as human being in the Veda. They are worshipped and revealed as sentient beings. In this context, Y ska has referred to certain vedic verse where gods are revealed with all those things a man possess. e.g.

(i) the gods are worshipped as possessing limbs like that of human being. e.g.,

rsv ta indra sthav rasya b h . ऋष्वा त इन्द्र स्थविरस्य बाहू।

i.e., O Indra, your two mighty hands are very beautiful.

```
(ii) यत्सं गृभ्णा मघवन्काशिरित्ते।
```

O lord of wealth (i.e. Indra), that you have seized the earth and the heaven is thy fist.

(iii) The gods are attached with material objects like those of human being e.g.

```
आ द्वाभ्यां हरिभ्यामिन्द्र याहि।
```

```
च कल्याणीर्जाया सुरणं गृहे ते।
```

i.e. o Indra come to us with your two baysteeds, and o Indra, you have a beautiful and delightful wife in your house.

(iv) The gods are revealed as doing their activities like those of human beings. e.g.,

अद्धीन्द्र पिव च प्रस्थितस्य।

च आश्रुत्कर्ण श्रुधी हवम्।

i.e. O Indra, eat and drink (soma) placed before you, and O Indra hear our call with your ears.

(b) Some other scholars opine that gods were of unanthropomorphic, because, whatever is seen of them is unanthropo morphic. The following are some of these sentences where such idea is revealed.

(i) The gods are unanthropomorphic because it is perceived so, as for example, fire, air, the sun are not seen with similar to human physique.

(ii) As to the view that like the eulogy of sentient creatures , the insentient things are also worshipped so in the veda. For example

(iii) As to the view that the gods are worshipped as having limbs, it can be said that the insentient things are also praised as having limbs etc. e.g., अभिक्रन्दन्ति हरितेभिरासभि: इति.

i.e. the grinding stone shout with their green mouths.

(iv) As to the view that like the sentient creatures the gods are attached with certain material objects, the insentient objects are also praised as having attached to objects. e,g.,सुखं रथं युयुजे सिन्दुरश्विनम्। इति नदीस्तुति: ।

In an eulogy of the river, the seer addressed the river god who yoked the comfortable car drawn by a horse.

(v) As to the view that the gods are praised with regard to anthropomorphic actions, the same things is seen with regard to the insentient objects too. e.g., होतुश्चित्पूर्वे हविरद्यमाशत इति ग्रावस्तुतिरेव।

Which means, even before the sacrificer, the grinding stones taste the delicious oblations.

Thus after going through all these expressions revealed by vedic seers, Y ska concludes by saying that the gods are of both forms. That is, the gods must be both anthropomorphic or unanthropomorphic. In other words the unanthropomorphic gods are the guiding or working force behind the activities of the anthropomorphic gods. Actually all visible gods or powers in nature have their presiding deities. The presiding deities have actually make the anthropomorphic god to work for the earth and its creatures. This relation between the gods and their presiding deities has been illustrated by the stories of the great epic $Mah\bar{a}bh\bar{a}rata$.

ā

State with the help of this write up, about the forms of vedic gods. (in 500 words)

SAO:

3.7.7 "Shares and companions of the three lords of the three spheres of the earth.viz Agni, Vāyu or Indra and the Sūrya."

Y ska has reduced innumerable vedic gods into only three gods. These three gods viz Agni, V yu or Indra and S rya are the lords of the three places, viz the earth, the atmosphere and the heaven respectively. Now he feels the necessity of explaining the shares and companions of these three gods separately so that a clear picture of their activities and service to the world can be understood. Actually

the working forces of the nature are seen deified in the veda. He thus says-"bhaktis hacarya vy khy sy mah" (Nirukta, VII.8)

Now we shall discuss the shares and companions of the god Agni. The following are its main features.

(i) Agni belongs to the earth. To him are attached, the morning libation (प्रात: सवनम्), the vernal reason (वसन्तऋतु:) G yatr metre (गायत्रीछन्द:), Trivrt stoma and rathantaras ma. Besides, the earthly gods are attached to Agni. The goddesses Agnāyī, Prthivī, II – these wives gods are attached to the god Agni. Regarding the activities of Agni, Y ska states that Agni's primary duty is to carry the oblations offered to him to other gods and to call upon these gods to the sacrifices performed on the earth. Besides, all the splendourous activities are related to Agni, the god of light.

There are certain gods on the earth who are intimately connected to Agni and they are worshipped with him. These are – Indra, the god of lightning, Soma, Varuna, Parjanya, and Rtavas. It is here pointed out by Y ska that Agni and Vișnu are the objects of joint oblation but not that of joint panegyric. So also Agni and Pusan are offered joint oblations but not the joint panegyric.

(ii) Indra has been asrigned the atmospheric region, the mid-day libation, the summer season, the tristubh metre, the pa cadasastoma, Brhats ma, the gods belonging to the atmospheric region and their wives. The main function of this god is to shower rain and the killing of the demon Vrtra. The chief activities of Indra are related to strength. The gods who are worshipped with this god are Agni, Soma, Varuṇa, P san, Brhaspati, Brahmaṇaspati, Parvata, Kutsa, Viṣṇu and V yu. These gods are infact, jointly worshipped with Indra. Moreover, Mitra with Varuṇa, Soma with Puṣan and Rudra, Puṣan with V yu and Parjanya with V ta – all these are deified jointly in the Veda.

(iii) Regarding the share of \bar{A} ditya, Y ska informs us that \bar{A} ditya is the lord of the heaven, he is the presiding deity of the third Soma libation; the rainy season belongs to him; he is extolled mostly in the Jagati metre, the Saptadas'a stoma and Vairupa S ma are excuusively attached to \bar{A} ditya. Besides, the gods residing or extolled with respect to the heaven and the goddesses are also subject to take share with the \bar{A} ditya. The chief function of this god is to collect the essence of earth and other stars by its rays and to keep those with it. Whatever work is there for outshining other stars etc on the firmament or in the heaven that can be done by the \bar{A} ditya only. Regarding to collective eulogy of the \bar{A} ditya it is here stated that \bar{A} ditya is seen being worshipped along with Chandram , V yu and Sa vatsara.

Stop to consider :

Stomah means 'praise'. The verses belonging to the Sāmaveda are called by this name because, the verses containing praises of gods are here sung many time. Such as saptadaśastoma.

After reflecting on the share and eulogy of the three principal gods of the world Y ska also intends to reflect on the other seasons, metres, stomas or s mns which are here left but they are attached directly or indirectly to these three gods in his Nirukta. He discusses the matter with the following statement–

etesveva sth navyuhesvrtucchandah stomaprsthasya bhaklisesamanu kalpayīta. (Nirkta, VII. 11.4.)

This means that 'one should frame the remaining portions of seasons, metres, hymns etc. in accordanc with the distribution of the places i.e. three devas belonging to the three places viz., Agni, V yu or Indra and Āditya.

The word 'स्थानव्यूहेषु'in the above mentioned statement needs explanation. Durg c rya takes the word 'vy ha' to mean vistāra. i.e. extension and स्थानं to mean three worlds. But L. Sarup puts it as circumference of places. Thus he has pointed out the things that are worshipped within the circumference of the earth are, the autamn season, Anustup metre, Ekavi s'a stoma and Vairaja s ma. So also the Hemanta season, Pankti metre, Triņavastoma, Ś kvara s ma are belonging to the atmospheric region. The things that are worshippable in the heavenly region are the Śiśira season, Aticchanda metre, Trayastri śa stoma and the Raivata s ma.

3.7.8 Etymologies of certain important words related to Vedic Divinities

In the twelfth and thirteenth Pariceheda i.e. section, seventh chapter of the Nirkta, Y ska has putforwarded the etymology of the words related to vedic divinities. As the metres are an important aspect of learning the Vedas and as because the vedic verses have been revealed in metres therefore with a view to learn the vedas and get that knowledge the knowledge of metres shall be acquired. In this context he gives the etymology of certain important words as follows :

(i) $\P = Y$ ska derives this word from the root $\sqrt{\P} = Y$ to think. According to him the words or sententences that are full of thoughts are called mantras. Skandswami spoke about it as "mantavy hi te". e. g. there are to be thought of . According to Durg c rya, the thoughtful persons regarded the expressions of seers as full of philosophical ideas, these are filled up with knowledge of supreme deities as well as of knowledge of vedic sacrifices. Y ska's statement is

```
'mantr manan t.'
```

i.e mantras are derived from the \checkmark man, to think over.

(ii) छन्दांसि छादनात्। This is the derivation of the word 'chandas' meaning metre. Y ska derives this word from the $\sqrt{\Im}$ छद् to cover. This root belongs to the cur diganiya verbs or roots. Mantras are revealed in metres. Durg c rya, by quoting the view q.a Br hmana passages wants to says that the root chad is present in the word छन्द: I The sruti thus says : once the gods being afraid of death covered themselves with the vedic verses, therefore they (the revealations) are called as chandas. In fact the vedas are called *chandas*. The vedas cannot be separated from the metres. A great portion of vedas are revealed texts on metres. (cf.,*yadebhirātmānamācchādayan dev mrtyorvibhyatastacchandasām chandastvam*).

```
(iii) स्तोमः स्तवनात् (Stomah stavan t)
```

This is the etymology of the word stoma. Stoma means praise. It is traced to root \checkmark stu to praise. The word 'stoma' is very much related to the Sāmaveda. The suffix is 'man'.

(iv) यजुर्यजतेः Yajuryajateh.

The word yajus is derived from the \checkmark yaj to sacrifice. As because by this veda sacrifices are performed, therefore this is called Yajurveda or the veda of Yaju (formulae)

```
(v) साम सम्मितमृचास्यतेर्वर्चा- समं मेन इति नैदानाः
```

```
- समं मेन इति नैदानाः।
```

The analysis of the statement is साम सम्मितम् ऋचा, अस्यतेः वा ऋचा समं मेने इति नैदाना.

Here Yāska has shown threefold explanation of the word साम.

(a) S ma means the veda of S ma. But as a word, it is traced to the \checkmark m to measure with the prefix $\exists \exists \exists$. The idea is this – the verses which are equal in status to the rks are called s ma. Or by the rks, the verses of the S aveda are measured, therefore the latter is called as the s ma. The idea is that the rks, the verses of the Rgveda are sung with music or musical notes. Therefore the verses are called s ma and collection of these verses is known as the S maveda.

(b) Or, the word 'साम ' is derived from the \sqrt{as} , meaning to send forth or \sqrt{kl} meaning to complete. By the first derivation we understand that the verses which are sung by taking the contents of the Rgveda are called as s ma, or by the word we understand that as because the samans are compeleted with the RK verses, therefore these are called as \overline{kl} .

(c) The third derivation is given by Naid n \dot{h} .

The word nid na is famous for its being a book on pathology. But here it is used in the sense of knowledge. The scholars who advocate the theory of the source of uttered words are called Naid n h and the book where their views are expressed is called the Nid na. Durg c rya says like this -

nidānamiti granthah, tadvido naidānāh.

By this we understand the *Nidāna* is a book and its authors or advocates are called the *Naidānas*. It is a book that treats about the source of words.

(d) गायत्री गायतेः स्तुतिकर्मणः

This is the derivation of the word 'Gāyatrī'Y ska derives this word to the \checkmark gai to worship. Perhaps Y ska realised that as because by the metre g yatri which consists of 24 syllables, and in which metre the worship of the Sun is revealed that begins with the word om tat savitur etc, therefore Y ska traces this word to the \checkmark gai maning to worship.

Or the word may be formed out of the fact that it was originated from the mouth of a singer or it is formed of reverse utterance of the words त्रिगमना विपरीता i.e.त्रिगमना becomes गायत्री by reverse order of letters. Thus त्रिगम =त्रिगाय गायत्री Skandaswami, a commentater on the Nirkuta thus observes :

"त्रिमि: पादैर्गमनं वर्त्तनं सा त्रिगायेति विपरीताक्षरा गायत्री " (स्कन्दस्वामी) (e) उष्णिगुत्स्नाता भवति। स्निह्यतेर्वा स्यात् कान्तिकर्मण:। उष्णीषिणी वेत्यौपमिकम्। उष्णिषं. स्नायते:।

This is the derivation of the metre 'usnik' as pointed out by Y ska. According to him, the metre is so called because it is invested with four more letters. That is, the metre G yatri consists of 24 syllables and Usnik, the next one consists of 28 syllables. The word 'utsn ta' means $\exists \hat{g}$ real i.e. invested. Or, the word may be traced to the \checkmark snih, meaning to shine. The idea underlying the explanation is that this metre is the favourite one to the gods. Gods love it. Here the root is \checkmark snih, meaning to love, to favour etc. Or the explanation of the word is that it is called as *Usnik* in a comparative sense to a *Usnisa* i.e the turban or head-dress. The word *Usnisa* is traceable to the \checkmark snai, meaning to wrap round.

(f) ककुप् ककुभिनी भवति ककुप्च कुजतेर्वोब्जतेर्वा॥

Y ska explains the word ककुप differently. This word meaning splendour is same as ककुम्. Both these two words ककुप् and ककुम् are traced to the roots. \checkmark कुज् or to $\sqrt{3}$ बज् meaning to bend, to curve and to subdue.

The metre Kakup contains 24 syllable. But it contains eight syllables each in the first and third sentance, the second one has twelve letters. The excess four letters in the second sentence seems to be a *kakup* i.e. slight curve one. According to Skandaswami the word *kakup* is same as the kakud, meaning a hump. The word कुब्ज is also derived from the $\sqrt{3}$ and meaning to bent down or from the $\sqrt{3}$ and meaning to subdue.

(g) अनुष्टुवनुष्टोभनात्। गायत्रीवेव त्रिपदां सती चतुर्थेन पादेनानुष्टोभतीति च ब्राहनणम्

Y ska derives the word अनुष्ट्रम from the root स्तुभ्, meaning to enlarge, to extol

with the prefix $\exists r \exists$. In the Br hman text it is expressed that the metre which extolls the $G\bar{a}yatr\bar{i}$ metre that contains three sentences, by the fourth sentence with other eight letters is called the Anustubh metre. The idea is this, –

The $Gayatr\bar{i}$ metre generally consists of 24 letters divided into three sentences with eight letters each. The Anustup metre contains thirty two letters in four sentences with eight letters each. The root 'stubh' here denotes ' to extol'.

(h) बृहती पुरिबर्हनात्

The metre *Brhati* contains 36 letters equally divided with eight letters in three sentences and twelve letters in one sentences. The word बृहती is traced to the \checkmark brha, meaning 'to grow'. This is a metre that is quite big in numbers of letters.

(h) Pa'nktih pañcapadā.

Y ska derives the word 'pa kti' as consisting of five p das or sentences. There is a $\sqrt{4}$ प् च् which is an *ubhaya pada* root. In its *ātmanepada* form it denotes to spread. As because it is spreaded over all its previous metres, therefore Y ska seems to derive the word from the $\sqrt{4}$ पच्.

(i) त्रिष्टुप् स्तोभत्युत्तरपदा।

का तु त्रिता स्यात्, तीर्णतमं छन्दः ॥

त्रिवृद्वज्रस्तस्य स्तोभनीति वा।

यति रस्तोभत्तति ष्टुभस्त्रिष्टुपतत्वमिति विज्ञायते॥ 🛛 🗿

(a) According to Y ska the word *tristup*, which is the name of a vedic metre, is called so because it is attached to the word 'stobhati'. This word (स्रोभति) means to extol, or is extolled. The first word त्रि is said to be derived from the \sqrt{q} to spread. As because this metre is very big compared to the other previous metres, therefore people used the verb \overline{q} . The idea is this – this metre consists of 44 letters in five sentences. In one sentence there are the uses of four more letters. It is a very precise metre. Or it is a metre consisting of four sentences with eleven letters each. Y ska calles it as a most precise metre (\overline{a}) of a sentence (\overline{a}) of \overline{a} sentences is the sentence is a metre consisting of four sentences with eleven letters each. Y

(b) Or it may be formed of two words, त्रिवृद् and स्रोभ:. That is.त्रिवृद means vajra, the thunderbolt used by Indra. Infact the vedic seers saw no difference between Indra and Vajra. So the metre that extols the *vajra* may be called as *त्रिष्टुप्*i.e. that which extols the vajra is called त्रिष्टुप्. The Sruti or the veda also reveals that the metre is called त्रिष्टुप् because it worships gods in threefold ways. Thus it may be formed of the word त्रि meaning three and स्तुभ् (स्तुप्).Durg c rya explains the metre as :

तीर्णतमं स्तृततमं गायत्र्यादिग्यो बहुत्वात् सेय तीर्णतमा च स्तोभति चेति त्रिष्टुप्। the word तीर्णतम means 'crossed mostly'. The metre 'tristup' crossed mostly the previous metres such as गायत्री, उष्ण्क्, अनुष्टुप, बृहती and पंक्ति:.

(j) जगती गततमं छन्दः,

जलचरगतिर्वा, जल्गल्यमानोऽ सृजदिति च त्राहमणम्।

Y ska says that the Jagati is the gatatama i.e metre, i.e., the last among the seven principal metres of the veda. Or, it is called जलचरगति: i.e. its course is like that of an aquatie animal. There is a reveation regarding this metre that 'the creator god emitted it when he was disinclined to do anything'.

(k) विराड्विराजना द्वा। विराधनाद्वा।

विप्रापनाद्वा. विराजनात्संपूर्षाक्षरा।

विराधनादूनाक्षरा। विप्रापनादधिकाक्षरा।

पिपीलिकामध्येत्यौपमिकम्।

पिपीलिका पेलतेर्गतिकर्मणः।

Y ska has derived the word 'virat' variously. He thought that as because this metre excells other metres therefore it may be derived from the $\sqrt{313}$ to excell with the prefix 'VI' or as because this meter is at variance with others, therefore it may be derived from the $\sqrt{312}$ 'to vary' with the prefix 'vi' or it may be derived from the $\sqrt{312}$ 'to extend' with the prefix '**a**i', because it is much extended. Y ska further justifies his explanation of the word Vir t, a type of vedic metre, by saying that the vir t is derived from \sqrt{r} j to excell because the syllables here are complete to express anything; or it is derived from the $\sqrt{312}$ to vary, because here the number of syllables varies; or it is derived from the $\sqrt{312}$ to extend because the number of syllables is very large.

Figuratively this metre is called as $Pip\bar{i}lik\bar{a}$, ant-waisted. This word is derived from the \checkmark pel, to go.

3.7.9.

Y ska conculdes his introduction to vedic gods by saying that the deities have been introduced to you. Here it is notewarthy to mention that some gods are only worthy of worship by mere recitation of hymns. These are called as *सूक्तभाज:* देवा: 1. On the other hand some gods are worthy of worship by mere oblations of offerings. These are called as हविर्भाज: देवा:. Some gods are worthy of worship by mere recitation of verses. These are called as the ऋग्भाज: देवा. Out of these three varieties of gods, the gods worshipped through verses outnumbered the other two varieties. There are certain gods which are seen to be incidentally worshipped. These are called निपातभाज:.

Y ska also points out to certain characteristics in the mode of recitaiton of verses

to gods.

(i) A sacrificer offers oblations to gods, having announced their name with their appellations.e.g.,

इन्द्राय वृत्रघ्ने। i.e. oblation to Indra, the killer of Vrtra.

Some make a list of these also. But they are too numerous to be collected together in a list. Y ska here explained ony those appellation which become conventional epithets .

(ii) A seer worships gods accodring to their manifold duties. e.g., वृत्रहा पुरन्दर: i.e. Indra is called so because he killed Vrtra, He is called purandara, because he shattered the cities.

Some make a list of these epithets too, but they are too numerous to be collected in a list. These epithets are mere appellations of gods as in the expression, give food to a hungry Brāhmaṇa or unguents to one who has taken bath or water to one who is thirsty. Y ska's expressions made here are as follows :

```
यथा ब्राह्मणाय बुभुक्षितायौदनं देहि।
```

स्नातायानुलेपनम्।

पिपासते पानीयमिति।

All these are common statements made so far in day to day life. These are not subject to worth recording, so there is no need of accounting of these works. Only the important appellations of work and service are to be noted to regard with the vedic divinities. Y ska has done it with commendable effort.

3.7.9 Summary

In this unit you are acquainted with the book Nirukta written by Yāska. This book is written as a running commentary on a book of vedic vocabulary known as the Nighantu or the Samamnaya. The Nirukta in its twelve chapters deals extensively with the explanations of vedic synomyms, homonyms and names of gods. Besides, it also shows principles of etymology of the vedic words. Moreover the discourse on vedic gods through etymologies also is a great contribution towards the field of vedic studies. You will learn a lot about the vedic gods discussed in this work.

THE NIBURTA

CHAPTER 1

A TRANSFORMAN list (of words) has been handed down (in m). It is in its thread applained. This mass list is estimal Number denotes." From what (must in (the word) No-plaughness denoted? They are words quoted from the Vedas (mi-generally)." Having been repeatedly gathered together? From Vedas (mi-generally)." Having been repeatedly gathered together? from Vedas kymns, they have been handed down by tradition. Apparentypes holds that, as there are the quoted words of the Vedas, they are called Nighe-photon as measure in the quoted words of the Vedas, they are called Nighe-photons as measure in the quoted words of the Vedas, they are called Nighe-photon as measured in their being quoted indepretently. Ge the (the word, Ni-photon bare the words) are tradition to reduce to the set of the in which they (the words) are fixed together, or collected together? of etc.

According to Andonharayana speech is personness to the organs ontro-(Fiere scale the first station.")

In that each the Fourfuld division (of words) will sub-bald good, nor the grammatical connection, nor the matual volumes of sounds which are not produced simultaneously.⁴ Words are used to designate objects, with regard to everyday affairs in the world, on assount of their samprehensive num and minutesizes.⁶ They, inc, are the names of gods as well as of horizon balags.⁴ On assount of the impermissions of briness knowledge, the stamp, otherting) the cocomplicities of subset, is the formal in the Vada.⁸

Assembling to Våreykynel, there are als modifications of harmologgenerate existence, alteration, growth, decay, and destatetion.* Generate dentes only the commonisment of the direct state, but within afferes are dented the lates. Existence afference is being that has been produced. Alteration committee the modification of alterative of alterate door doorpring being.* Growth denotes the interaction of one's own flucts or of algeories which are monisted (with more will), as he grows by makes of visitary, or he grows with his body. The structure decay denotes the antidaries. Destruction donotes the future (alterative states), but notifiers and denotes the future (alterative states) in the later mate, but notifiers affirms and denotes the future (affere each the second centure).

House, other modifications of according are only finites developments of these (management) along), and should be followed associling to the associat-"Unconnected propositions", anyw Skingayana, "have no moniting, but only express a subordinate same of norms and votas," ¹. They have earliers meanings," anyw Obegyn , "house, whichever their meaning, may be show supress blast meaning (which brings absent) multification in the second of the noun and the variate "the word at is based in the second of "hidden ward "the press and providing the antification and/or," towards "the second in the multification will and so, "approval", our and due are their antiticements of and and "developed", col is their antification are their antiticements of and and "developed", col is their antification area their antiticements of and and "developed", col is their antification and "subboarder", specified or or approximate "is antiticement over "statistication" and "subboarder", mps, "contact," upon "measurements", provid "bring all occurrent", which "subboarder", are "supersonary." "These they supress controls, presenting to which attention absorb is paid."

(Here and the third antion)

Next the problems ensure in continue measure," both in a meruparoidity manain a meruparative ensure," and as appletives. Of them, the following four are made in the measure of comparisons." <u>Two</u> this this measure both is the chassing and in the Vedro Semistrich : thus "like Agest", "Bloc Leden", dos. This wavel parline the ensure of respective to chassingly and both (i.e. the nester of respitting and enseparations) in Vedro Handerits, thus, in the parameter of respitting and encoparison) in Vedro Handerits.

Index as a god '2 is has the arms of negation." The established use in the place is immediately; helice that which it makes together. In the memory false loard drinkess of actus 2 it has the mass of sustancing. The mashliched use is its place it incerediately) after that with which it compares, The word gif has many mountings. In the managers Will the teacher kindly abydain it I is in that in the castle of respect. (From what cast, is raise teaditional precepts (double) ; or bospass he systematically arranges (d o'el a certici the various abjects (of lessericity), or belows be grantiatieally develops the intellectual feedbar? In the expression "like surely is is used in the sense of comparisons in theing even the same great it is used in the sense of matempt. Kul-milet's most graphs are selled homone they are wanted away induced in families dedeed." The want isy has many meanings. In the sectores "therefore he will do he, it is mail in assigning a renow.) In their pray will be do it it in adding a mass tion, so well as in ' has he really done it.?" It is sho used to the most of comparison (as followed ;

Of they like the beneather of a tree, O widely invidual one t*

Of these likes the bransfear of a true, G widely invoked one t

Vogeté means branches, (and) is desived from (the root) of (a move) - they serve in the wind? (McAub (branches) are as called barance they root in the sky (Maningshi), or (the word) may be derived from (the word) call (br be able)."

Now a conjunctive particle is that by whom addition separateness of actions is indeed rangelined, but not like an enuroscentive one, i.e. because of a separation by isolation.²⁹ The word on is used in the sense of " approgetion", and is joined ingelines with both, as "I and you, C slaper of Vytes 1"?" is used in the same sense, as "for getic and for means".¹⁹ The word at is used in the sense of defiberation, as "Ab shall I periodic each have a three 1"." Moreover, it is used in the sense of " sparsagetion " (as follows).

(New scale the franth autilate.)

¹ Vague and them, Monte and them^{1,1}. The words ofter and for three the sense of "sectional opposition", and spectrophysical with the former (monother), as "led this mean der this, the other that", and "this mean will do this, not that ", for. The latter is also used in the same sense, their grands with the latter is also used in the same sense, their ", is for this is a "the latter is also used in the same sense, their ", is for this is for the sense is a "the sense people tell a lie, there the truth", is in further meet as an applicative, is "there people tell a lie, there the truth", is in further meeting of the sense of "the sense" is also used in the sense of "the sense of the sense of the sense of the sense of "the sense of the sense of "the sense of the sense of

Moreover, it is samilated with the two (particles) as and serve is adding a quantum, as 'scale it not so t' and ' sear it so, pray t'. The word cot denotes probibilities, as 'do'not do it', and 'do not take.'. The word birds also idenotes probibilities, as 'accords of doing this ', and 'have done with it ', further, it is used as an expletive, as 'then it happened'. The word induce that the same of uncertainty is classical functories (in the contenue) ' was it even as t' it is used to an intervention of the matter is (in the contenue) ' was it even as t' it is used in an intervention (in the contenue) ' was it even as "pray t'. It is intervening in the matter is manual. The word minore has the same of uncertainty in the matter has been as induced by pray t'. It is intervening in the damated language, both, i.e. the same of uncertainty and that of an expletive, in Vadis Baushrit."

Agentlys, baving assignal an oblation to Indra, desired to offer it to the Maruta. Indra, having presented formelf, homental for follows/,"

Others and the Syste sections."

Three is sense, it does not exist ; there is no to morrow ; who knows that which is m? post? The mind of another is apt to waver. In ; the aspected is bas.⁴

There, it areflin, it does not exist, i.e. there is no to-day nos " indeed induction. To-lay, on this day. Dyth is a symmyin of day (as salial) because it is bright (s'dynt). To-morrow, the time that is still expected. Yastarday, the time that has expired. Who knows that which is not peel? I.e. who answe that which is yet to some it at the fatarast. This

ether word additions if wonderfull's a additions, i. a constituting which, as in work to unpresedented. "The minet of anothic is upt to waver', i.e. fickle. Another's a person net to be introduced its good peoplex. (Situate month) is derived from (the root) of (to Kayw), "Lot the suggested is last", (even the antigued thing is, but]? are parely 5. a. a thing to and if for afferings

Mercerer, it foundary is multiple on explotion-

Aftern some the starth arritry 3.

May that rish roward of thins. O listes ? milk overst hom for the sunger. By helpful to the worshippers, do not put an axide het good fortune (mentri to use may we speak locally in the associably with becaus."

May that (neward) of three wills every been for the singer. Hean, when is to be chosen. Hinger, protect. Bits reward, i.e. abounding in wealth. The word coughture is a synonym of wealth, it is derived from the result. The word coughture is a synonym of wealth, it is derived from the meri) deriv, manning to give.⁵ Scaledorf (reward) is derived from the meri) deriv, manning to cause to accomptiant is coused the imperfact to be actomptiched. Or class, it may be (so called) from encomptichting. With references to the quarter, dis remarks the quarter manned in the board. 1. It this right hands? Statistant (right) is derived from (the rest) shale, intenting to work strektionary, or from (file, meaning to give, Mastak Count) is derived from (the rest) has (to strike); it is quick to statks. Fully the descree of the ecceleriptics. Do not prev us seen, do not give, heaving an axide. Let great formule he for no. May we speak toully in our even assembly. We say that for the great formule he for no. May we speak toully in our even assembly. We say the descree of 'great's the great formule he for no. May we speak toully in our even assembly. We say to the second to the great formule he for no. May not speak toully in our even assembly. We say to to to the second to the great 's it is greater all reads. Hereing to the second hereing to derive a form, 't is in greater all reads. Maying because or heaving biomet hereins. A burn, he disposes (ri-erogent) the counties, or it (st-rea) may be derived from (the read) of, to the form (the read) of, to the great of, the great is go, or ferme of (to be proverial).²

The word and has the source of tetality; to be (need) as on explotion 4 Addge, note theory for it.²

Basis them forth, i. a sent them forth on all rides. And also :

-Prem all sides the wise and has readilested bright rays.1.

i.e. The sum has understand (share) on all sides. So variable instance the rays of the sum increating) on account of their brilliant light (so resource). Do show the word state's takes the ablative suffle (*160) without any meaning, the shares is a similarly, (which means) * from the homology, states account for the second between two constraints. The wild data brinds a presence with the means of 'opposition', is transmissified there half is to be a syneary of 'half'.

(Hree works the amouth metion.)

10월 27일 동안에서 이번 것이다.

One this increasing the store of startman a scenal charts the physical lignum is descent constitute. One, i. e. Brahmen, exposed a the intense of foling. Whilst module meters the momentee of the soundles.⁴

With Greek words, this status) designs the prodication of the duties of the priests. One aits increasing the store of stamme, i.u. the invokas, A statute (iv) is a mount of worshipping formation. A smuthl eligible the physics hyper in deleter measures, i.e. the elements. Sityperson is derived from (the rout) get, meaning to penine. Solvergod are standar, it is derived from (the root) due die to wahie). Di is horsen : beneuse with these he was able to also. Yeter, that is the elegenstariatio of the delevent operand." One, i.e. the Brahma, expounds the science of every being. Brahma is continuient. he knows aroughting, Brahmit is expressioners from knowtoday. Besherk is supercontinuit all around. One mores the minuture of the saterifies, i.e. the (performing) price. diffuon-pub (prices) a otherworpub, is to be directs the marifice, in is the loader of disc marifies, or view, in terms the excellent. Or (the word is formed) by the addition of (the calls) yeak its s'softill in the sense of studying . gashesine is a synonym of "escrittee's the very distribution to kill (and such denoted) the regention of it thilling). Associating to some, the word ((va) is a particle, then how sould it is a none of momental distant 1 it is clearly inforted. 'Lo' they will then,

standfast in Etendedip 3 them it is in the according ; for one do gialled for high 2 an the drives. Further, it is definited in the accordingtics given.

(three early the eighth section.)

Friends, having (similar) eyes and stark, were using all in the space of their minds. Some are like banks, which reach up to the month, and are suitable for a both, others indeed are like these which reach up to the breast, and (are manet) to be seen only.²

[Friends], having (doubler) eyes and ears. Abuil (eye) is derived from (the root) may the sent () is in from out) the barnishall," any a Ågettymes, is is well known. Therefore, they are as it were more bouilful? Known, it is well known. Therefore, they are as it were more bouilful? Known, (eve) is derived from (the rest) by (in ent): it has its microser toria anoder () is is from y (to get) have protouted in speed." They were unequal to the speed of their mireds. Busice reach up to the month, others up to the breast? Asymet? (month) is derived from (the rest) in (to there), or date (from diagonal, the first () from the tents, estimate in derived) it is very anoth worted. Busice reach up to the month, others up to the breast? Asymet? (month) is derived from (the rest) in (to there), or date (from diagonal, the first () from first sciences in *Dagbears* is derived from this point days, meaning to flow, or from out (to be wasted) it is very anoth worted. Busice are like tanks, estimate for bothing. Hubbles for factured from this could inder act) to be made a sound, or from Mind, meaning to make cod. Further, it (rest) is used in the same of "aggregation", as 'recurrences and generation of Astrias", " i.e. parameters of Advise, and restricted.

¹⁰ Now the words which are and --the arms being complete---to fill up a contance to press, and a voice in portic compositions, are appletives such as have, ere, of, and a."

(Here suits the winth unstan.)

Men without garmonta, and having many shildren, haing alraid of a wolf, as it were, longed for the dewy manor " to live,"

Drug annex to five. didictor in desired from the most ip the stack), or doe no put in end to).

He couldned it for presenting (1), s, he recented it for presenting (the association),

May our hymnes make him grow." May our hymne, i. a maige of pracise, make him grow. Giver (songs) is derived from (the root) go (to speak).

This periods when then approachest, is for then? Thiss is into many where they approachest. You is also used as an appletivel, as they all hanve it well?, and they both know is well?. Moreover the need we is sumbined with 66 in (the neare of) ' approximation '.

(Here such the truth section.)

With obtations some soil heavon from this would , others promising juless in samilles. The pires rejuins indeed with their rewards , parenting presided ways, but we should fail into ball.⁴

Hall is going downwards, i.e. falling harve and harver y or it doos not normal area slight room for happiness. Moreover the words on an are jound with the word of it noterropation, as 'do they are details wine t'. Surd. (wine) is derived from (the raci) as (to prove). Then they are madin various mannings, to which attaction should be paid.⁹

(direct state the alcounth active).

CHAPTER VII

Now, therefore, five shall appliably the antition (of the Nightingto) relating to define. The section, which connectates appellebons of dation, to which paraggreiss are primarily addressed, is called defenders, Le velocing to define. The full energy is the detailed connectation of the same. A particular stands is ould to belong to a deity, to whom a seconaddresses his paraggreiss? with a particular dester, and from whom he wishes to obtain his object.⁴ The standard to which references has just base maths,⁴ are of these kinds: (1) indirectly addressed, (5) directly addressed, (6) and sufficienceshings. Of these, the indirectly addressed standards are composed (it, jointed) is all the mass of momen has the work of the third permentionly).

(Harn anala the first sortion.).

Indra rates heaven, Indea the earth."

The abartars (make) very much Indef atoms?

Those Triam haing netive with Inden.4

Chapt the stans-stature for the sake of Indra-

Without Index, no plane whatecover is pass."

I will indeed produce the horses orphete of Index.¹

Our desires rest on Index.35 And so on.

Now the directly addressed stances are compositions in the second person and are joined with the word 'then' as the premium.

Thon, O Lodra, (art born) from strongth.11

O Indra slay our months,18 And 50 Oil.

Moreover, the praises are directly, while the objects of praise are indirectly, addressed

Do not praise say other."

Sing forth, O.Kaovaa¹⁴

Approach, O Kubikas, be canoful.¹

Now self-investitions are empositives in the first puriod and are joined with the word 'I' at the principal, e.g. the hyper of Indea Valkanija; " the liquin of Loca," or the hyper of Vala?"daughter of Archhype, and when

(Reve wash the second method)

Indicestly addressed and directly addressed shanas are by far the work introduces. Half-invariants are far and far between. Moreover, its sense standard there is only proise of the deby; without any bandiction (being invoked), as in the hypon: I will indeed proclaim the hereic exploits of Index." Fuellace, (in more standard) there is only benediction without only probe fields, on if May I are well with my eyes, any I be rediced in my fam, may I have well with any ears." This is mostly found to the Vajorrede collections and marificial formulas." Further, in some relevant these are approximations and improvedues:

May I die turday, if I be a inspling detron?

Now may he he deprived of ten heroes?

Further, cin none standard there is an intention of describing a particular state.

There was no death, now indeed incontably."

In the beginning (of constian) there was darkness, hittlers in darkness,³⁴ Further, in some stacked there is approximation arising from a particular 100.000

The benerolast god map fly both to-day and heres return." I do not know whether 7 am this or (the3).¹⁴ And mon. Further, the assoc manual) there are consister and probe: He alone is guilty who eats alone."

This dwolling-plass of a liberal passon is demonstrable like a letter-boll.¹⁰ Similarly, there is measure of graviting and praise of agriculture in the dimetry in 2th. In this measure and with various intentions, much have visions of their postic compositions new strengt¹⁰

(Bere ande the phird service)

With reference to this, the following in the secondition of the delty of these stands whole delty is not specified. Such stands belong to the name delty to obtain their particular mattifies, or a part of the martifies, is officed. Now ensurement that the metilities they belong to ProjApati according to the enoughts, and as Narideeper according to the styleologists.

Or she the delity may be an optimial one, or even a group of deliting! It is indeed, a very provident practice the everyday life) is the world, the sheling to things in comment insighting what is moved to gody, to greatly, and to the manual I As to the view that a status belongs to the delity to where the sacrifice is offered, its may be objected; that non-delities are also praised like delives a.g. the objects beginning with home and ending with being! tegether with the sight sales." But he (the student) should not think that matters relating to gods are advestitions as it wars. This is to be simply seen for the following: The second of the supersminence of the deity, a single and is prained in curtous ways. Other gods are the individual timbs of a single soul." Or clas, as people say, more peaks objects according to the multiplicities M their original nation, as well as from its universality. They are produced from each other." They are the original forms of wark others.¹ They are produced from (action (forward)),² they are produced from the soul. Bout is even their charlot, their house, their wington, these areover, and is indeed the all-in-off of gods.""

(Here vade the frankh mobility).

 \odot ? There are three define only 12 say the styrmologists: (1) Agai, when sphere is such : (2) Yaya or Indon, where sphere is charosphere : (0) the sucwhere aphres in heavies.¹² Of these, each receives musty appellations on account of his superaminones, or the diversity of his function, just as a priori, although he is one, is suffed the samether date; the director of the narrithm problem (pr), the processor of the married law (brakeed), and the standard (adjuty). Or size they may be distinct, for their principality or

well as their appellations are distinct.¹ As to the view that this redshows some appellationst on associated of the diversity of functions. Di may be considered that many sees also are do the actions, having divided them among thermalization. With sugard to it, the community of preddletion and orjoprosent should be noted, as for instance, the conservative of men and gods, with regard to with. Community of onjoprosent is seen in the followidg, the the enjoyment of earth by the shoult together with air and file new and of the other world together with Agest. There everything to like the kingdom of team also.

Lifere and the Afth action.)

. .

Now yes shall discuss the appearance of the gods. Bone my shut dray are anthropomorphic, for their panagyrin as well as their appellations are like those of sentient-beings. Moreover shoy are preled with reference to authrepresentable limits :

O Indea, the two areas of the mighty one are unlos."

"Thet phoneon and earth), which them hast minut, is thy fiel, O herd , of wealth,"

Moreover (they are prained) as assessibled with authropomorphic-

O Index, once with thy team of two bay stoods".

A taxatiful wife and delightful things are in thy hease."

Moreover tilloy are praised) with regard to anthropomorphic assions :

O Index, sat and daink the (some) placed before (thes)."

Huge one call. O find that hast listening energy-

(New suits the stoth section.) ;

Others may that they are not anthroprenaming bin. Ionaton whatever is seen of them, is manuforeprenample, as for ionizates, des, ele, the sum earth, the moon, &c. As to the view that their paraggries are like these of section beings, (we reply) that ionizates objects, beginning from desand analong with harbs," are likewise preterior. As to the view that they are period with coherence to anthroprenamples limbs, (we reply) that this (insufation) is associated to insuface objects also -

They shows with their grees noutles." This is a paregyris of stones.

As its the view that (they are present) as associated with anticepter morphic objects, (we explud that it is just the same do the ince of institute objects).

ilindha yehed ika simbertakia no, deeyo by a horas.¹

This is a panegorie of a effect. As to the view that (they are probably with regard to anticeportorphic actions (we exply) that it is mantly the same (in the case of itanimate objects).

Even before the secrifice, this inste the debuices oblations.⁴ This insis a paragyets of stores. We die they may be both detheroprocephie and unanthropomorphie. Or size this unarthropomorphic appearance) of the grids, who are really anthropomorphic,² is their constantial in the form of action. (diverse) as another in that of a sectificer. This is the web-somsidered ophytics of these who are well ented in lagordary law.

cRive and the associat automay-

It has been said before that there are three detting only? Now we shall explain their charse and comparisons. Now the following are due charse of Agai i this world, the morening illestifes apring the Gegore's matra, the triple hyper, the contents reactions and the group of give who are enumerated in the first phase.¹

Againstyl (with of Again, Pythtel (carifs), and Dit (peaks) are the woman. How the Faustion is to marry tributions and to involve the greis. And all that which relates to vision is the function of Again also. New the gods with when Again is jointly project are (1) index, (9) thems, 60 Varians, (6) Parjunys, and (5) the Marvin. There is a joint oblation efficient to but an joint paragyris addressed to, Again and Vision in the tas books (of the glassic).⁵ Moreover there is a joint oblation efficient to boltoning paragyris addressed to, Again and Vision in the tas books (of the glassic).⁵ Moreover there is a joint oblation efficient to blatter as joint paragyris addressed to Again and Piasa. With regard to this, the following status is sited (1) order to show theory separate press.

(Mere and the sight method)

May Physic, the wise, the generical of the outward, whose makin are never lost, cause thes to make forthwith from this world. May be hand they over to these makes, and may's Agel tentwents these to the beserviced goals.⁷

May Fissa, the wise, where saids are never but, who is the guardian

of the universe, i.e. i.e. its and, is indeed the grandian of all created brings, forthwrith same theo to nove from the world. The third wave, "May be based then over to the manne", is doubtful. According to asses, it refers to Piezza, (monthaned) in the preseding, hemistick (according to others this acteds Aged, (monthaned) subsequently. (May) Aged contrasts that to the basevednet goals.

Havidatrons manne wealbhy in may be derived from the energy of (in find) with one proposition (in) or from dit (to give) with two propositions (en and with

(Nore cucle the wouth certion-)

How the following are the shares of Indra : the atmosphere, the midday identics, the summer, the respect motes, the fifteenfold form. On great chart () and the gade who are momented in the middle place as well as the women. ' New his function is to release the unders and to sky Vybra. And all action that relates to strongth is Indra's function also,' New the gods with when Indea to strongth is Indra's function also,' New the gods with when Indea is jointly present are Ages, Homa, Varuos, Firm, Hybangati, Frabmanaparti, Farvata, Kuma, Vispa, Vaya. Mariavar, Mitch is jointly presed with Varuos; Some with Puests and Rodes; Phase with Vaya; and Parisons with Vate.

(Here each the teach sociality)

Now the following and the discos of Aditys 1 that world 0. c. however, the third illektion, the rainy sensers, the physicilitation that hypers, the Pedrige chain, and the guile commented in the bighest place as well as the women^A. 4.1 Introduction

In ancient times for preserving the texts of the Vedas, the teachers of the Vedic texts took recourse to two ways one practical and the other theorical. When the texts of the Vedas were orally transmitted to the students by the teachers, the teachers took great care in teaching the Mantras with correct pronunciation of each and every word as every well as syllable with proper use of accents. In course of time when the Vedas were written down, the teachers took measures for preserving the written texts by formulating rules for accurate pronunciation of the words and syllables. These rules were discussed in the Parişads i.e., assemblies of learned Vedic scholars. The discussions carried out in these Parişads led to the creation of particular texts called the Pr tis' khyas. As these texts came into being in the Parişads (assemblies) of learned Barhmins, they became known also as p rsada texts. From the point of view of their subject matter these texts are akin to *Siks Ved ga*.

4.2 Objective

Pr tis khyas are the most important and authentic treatises on the ancient Indian Science of phonetics. As the very name Pr tis khya suggests, these are the only treatises dealing with the correct pronunciation of the Mantras of the Vedas of different S kh s or recensions. Every Vedic recension has its own Pr tis

khya. The oldest of the Pr tis´ khyas is the *Rkpr tis´ khya*. From the point of view of its contents, it is the foremost of all the Pr tis´ khyas. The objective of this unit is to enable the students to acquaint themselves with the Pr tis' khyas in general and the *Rkpr tis´ khya* in particular.

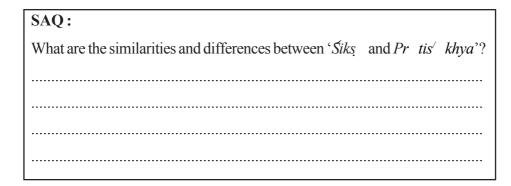

4.3 Siks and Pr tis' khya

The word $S_{\mathcal{C}iks}$ means phonetics. The *Ved* ga text which teaches the science of phonetics is also known as Siks. The word $S_{\mathcal{C}iks}$ has been defined by S yana as शिक्ष्यन्ते चेदनाय, उपदिश्यन्ते स्वरवर्णादयो यत्रासौ शिक्षा | Thus, $S_{\mathcal{C}iks}$ is a name given to works which contain rules for correct pronunciation of *svara*, *varna* etc. of a written text. The difference between a $S_{\mathcal{C}iks}$ and a Pr tis/

khya lies in the fact that the rules of pronunciation taught in the former are common to Vedic as well as secular texts and are applicable to all the S kh s of the Vedas, whereas the latter selects or specifies only those sounds which are peculiar to its own *S kh*. The word *pr tis' khya* may be explained as follows – शाखायां शाखायां भवं प्रतिनशाखम्। प्रत्तिशाखम्। So far as the pronunciation of Vedic texts is concerned, Pr tis' khyas are more authentic than the Siks s. Should there be any difference of opinion between a *Pr tis' khya* and a *Siks* on some phonetic peculiarity of a Vedic text, the *SÇiks* is looked upon as less authoritative. The scope of the Pr tis' khyas is much wider than that of the Siks s because, these works besides dealing with rules of pronunciation have also included in their fold grammatical and metrical aspects of the Vedas.

Stop to consider

The word \acute{s} kh applies to the text of a *Veda* as read and handed down in a particular school corresponding to our modern 'reading'. It has been said अध्ययनभेद एव शाखाभेदे निदानम्।

4.4. The number of Prātiśākhyas and their approximate date

As each *Pr* tis' khya deals with the phonetic peculiarities of the text of a particular *S* kh of a particular *Veda*, there should have been a large number of Pr tis' khyas corresponding to the Vedic texts of various *S* kh s. But we have only six treatises which can be called Pr tis' khyas in the true sense of the term. These are –

- 1. The Rgvedapr tis' khya
- 2. The Taittir ya Pr tis khya
- 3. The V jasaneya Pr tis' khya
- 4. S'aunak ya Catur dhy yik of the Atharvaveda
- 5. Atharvavedapr tis' khya
- 6. *Rktanatra* of the *S* maveda

Only an approximate date can be stated for these Pr tis' khyas. As Pata jali knew the *Taittir ya Pr tis' khya* and as his date has been accepted as 150 B.C., the lower limit for the age of the Pr tis' khyas can be stated as 150 B.C. The author of the *Rgvedapr tis' khya* has quoted Y ska the author of the Nirukta. The approximate date of Y ska, according to scholars is 800 B.C. to 500 B.C. Hence, the upper limit for the age of these treatises can be fixed at 800 B.C. The language of the *Rgvedapr tis' khya* and the V jasaneya Pr tis' khya is found to be crude in contrast with the concise style of P nini's Ast dhy y. P nini is placed in about 400 B.C. Therefore, these two treatises are admitted as pre-P ninian. So far as the Taittir ya Pr tis' khya is concerned, a few grammatical terms used by P nini are found in it. However, the substance of this work appears to be pre-P ninian. This is because, in its treatment of subject matter there is no trace of any influence of P nini. The core of the *Atharva Pr tis' khya* was probably earlier than P nini and in no case later than the V jasaneya Pr tis' khya. However, it is possible that some parts of the *Taittir ya Pr tis' khya* and

the Atharva Pr tis' khya are post P ninian. The Saunak ya Catur dhy yik seems to be later than the Atharva Pr tis' khya because, as can be seen, this work is indebted to the latter for its contents. Last of all comes the *Rktanatra* which is clearly post-P ninian.

SAQ: Discuss the probable age of the Prātiśākhyas.

4.5 Subject matter of the Prātiśākhyas

Among the six branches of learning know as the Ved gas, developed and treated as essential for Vedic studies, phonetics (*śiks*), grammar(*vy karana*) and prosody (*chandas*) got prominence. This was because, the Vedas could be preserved only with the help of these three. In earlier times the Pr tis[/]

khyas might have consisted of all these threadbranches of learning in order to give a Vedic scholar the required minimum materials for safeguarding the text and form of the Vedas. In the *Rkpr tis' khya* which is supposed to be the oldest of such works, are found topics on *śiks*, *vy karana* and *chanda*. In the other Pr tis' khyas there is no mention of *chanda*. In the two Pr tis' khyas of the *Atharvaveda*, *śiks* too has not been included. These two works have preserved only the grammar-part of the original system.

As we knew phonetics is the declared objective of *Ved nga Siks*. But it is only in the Pr tis' khyas that we find some very interesting observations on the ancient Indian science of phonetics. In the Pr tis' khyas we come across technical terms like *sam n ksara*, *sandhyaksara*, *sasth na*, *padavat*, *visarajn yavat*, *pluti-plavana*, etc. We also learn from these texts about the different phonetical categories. Studies on *ucc rana dosa* i.e. faulty pronunciation may also be mentioned as a noteworthy contribution of the Pr tis' khyas to the science of linguistics. So far as *Vy karana* is concerned these works have minutely dealt with the Sanhis that occurred during the formation of the *Samhit* text of recension (*s kh*) of a *Veda*. These treatises have also taken into consideration topics like cerebralisation (*natva* and *satvavidhi*) phonetic doubling (*yamavarna*) metrical lengthening and shortening of vowels, general principles of accentuation, formation of compounds and their identification in Vedic texts and so on. It should however, be remembered that in these works no attempt has been made to present structural analysis of Vedic words. We find the words *prakrti* and *pratyaya* in Pr tis[/]

khyas, but these words are used in them not in the senses in which these have been used in the later treatises on grammar. Similarly, topics like tenses, numbers, genders etc.have remained almost out of their purview. Furthermore, as the Pr tis'

khyas have dealt with the linguistic peculiarities of particular texts belonging to particular Vedic S kh s, there was no scope for any kind of general consideration of the structural aspect of the Vedic language as a whole.

Prosody, as it has been already mentioned is dealt with only in the *Rkpr tis' khya*. Prosody has been included in this Pr tis' khya because, prosody forms an integral part of any attempt at the preservation of Vedic Mantras. *P da* or the quarter of a metre is a constituent of a *mantra* or a *rk*. Two such quarters make up an *ardharca* or a half-*rk* and two such Ardharcas make a *rk*. The *mantra*-text can be preserved from omissions only when these constituents are well taken care of. In order to be able to do this knowledge of phonetics, grammar and prosody are equally necessary. This is because, phonetic change might occur in the text of a *mantra* due to the requirements of the metre in which it has be**a**n composed. Again metrical change might occur because of phonetic or grammatical regulations. Even accentual changes might take place because of euphonic combinations.

SAQ:

- Show your acquaintance with the general subject matter of the Pr tis/ khyas.
 What is the difference between the general subject matter is dealt with in the
- 2. What is the difference between the grammatical topics dealt with in the Pr tis' khyas and those found in works on grammar?

4.6 Some other works which bear the stamp of Pratisakhyas

There are a few other works which bear the stamp of phonetic treatises of the Vedic age. However, these cannot be called Pr tis' khyas in the true sense of the term. These works are -

- 1) *Puspas tra* of Maharsi Puspa This is a work consisting of ten parts and is a valuable treatise on accentuation.
- 2) The *Pratij as tra* and the *Bh sikas tra* of K ty yana–These two works teach phonetic elements regarding the general Vedic language.
- 3) *S* matantra written by Audavraj –This work deals with phonetic rules of Vedic music and rules of accentuation of the *S* maveda.
- 4) *Akṣaratantra* of pis'ali The subject matter of this work is similar to that of the *S* matantra.

4.7. The *Rkprātisākhya*

4.7.1 The s'ākhā of the *Rkprātisākhya*

The *Rgvedapr tis' khya* also known as *Rkpr tis' khya* belongs to the s´ais' r ya Upas´ kh of the S´ kalas´ kh of the *Rgveda*. This Upas´ kh has been named after its teacher S'ais'ir who was a disciple of S´ kala. The contents of this *Pr tis' khya* however, are equally applicable to the Rgvedic texts belonging to both the S´ kalas and the B skalas. This is so, because there existed very little difference between the texts of these schools of *Rgveda*, barring of course differences in the number of Mantras and in the chronological order of some of the Mantras.

Stop to consider :

The S' kala Samhit of the Rgveda consists of 1017 hymns. As can be learnt from works like As'val yana Gr.hyas tra, S kh yana Gr.hyas tra, Br.haddevata etc the B skala S hit, which is no longer available to us, consisted of 1025 hymns.

4.7.2 The author of the *Rkprātisākhya*

The author of the *Rkpr tis' khya* was saunaka, a learned teacher of the *Rgveda*, Viṣṇumitra the *Vrțtik ra* of this *Pr tis' khya* has made the following observation about the author of the work अत आचार्यो भगवान् शौनको वेदार्थवित् सुहृद् भुत्वा

पुरुषहितार्थम् ऋग्वेदस्य शिक्षाशास्त्रं कृतवान्। According to this statement $\bar{A}c$ rya S' aunaka who was well versed in the Vedas composed the treatise on Vedic phonetics in the best interest of posterity. For the preservation of the text and form of the *Rksamhit*, S'aunaka wrote as many as ten treatises. These are follows –

- 1. Ars nukraman
- 2. Chandonukraman
- 3. Devat nukraman
- 4. Anuv k nukraman
- 5. S kt nukraman
- 6. Rgvidh nam
- 7. P davidh nam
- 8. Br.haddevat
- 9. Rkpr tis' khya
- 10. Saunaka Smrti

5.7.3 Date of Saunaka

Just as it has not been possible to determine the exact dates of the great scholars and authors of ancient India, so also scholars have not been able to determine the exact date or period when S'aunaka flourished. The upper limit of his time may be stated as after 800 B.C. The reasons for making such a statement may be given as follows – (a) S'aunaka in his *Rkpr tis khya* has referred to Y ska the author of the *Nirukta*, by name and has quoted Y ska's views on the nature of the Vedic metres which have only one *p da*. (b) In his *Brhaddevat* S'aunaka has on a number of occasions mentioned Y ska's name and has refuted some of his views on the deities of the *Rgveda*. He has even used sentences from Y ska's *Nirukta* in toto. (c) Scholars have placed Y ska between 800 B.C. to 500 B.C. Hence, S'aunaka must have flourised at least after 800 B.C.

The lower limit of S'aunaka's time may be same as the time of K ty yana the author of the *Sarv nukraman*. This K ty yana was a disciple of S'aunaka. He has in his *Sarv nukraman* incorporated as many as thirty verses from S'aunaka's *Br.haddevat*, with very little changes in the text. According to scholars, K ty yana the author of the *Sarv nukraman* is different from K ty yana the *V rtikak ra* of P nini's *Ast dhy y* and is a predecessor of P nini. His time has been approximately fixed in 600 B.C. Therefore, the lower limit of S'aunaka's time may be some where between 800 B.C. to 600 B.C.

SAQ: What do you know about S´aunaka?

4.7.4 The literary style of the *Rkprātisākhya*

In the *Rkpr tis' khya* the S rtas are presented in stanzas written in the *k rik* style. The stanzas have been composed in three metres viz, *Anustup*, *Tristup*, and *Jagat*. Most of the verses are in *Anustup* and *Tristup* metres. There are a few irregular compositions. On the basis of the number of the P das in them, these can be assinged to one or the other of the above mentioned three metres. All the verses in the eleventh chapter of the work are in the *Jagat* metre.

Barring the fact that the use of the metres have at times led to some obscure constructions in the text, the style of the *Rkpr tis' khya* is on the whole a clear one. The S rtas have been presented in it in the form of strings of short sentences which are often without any finite verb. On many occasions the absence of a verb is the result of the requirements of the metre. Numbers of S rtas dealing with facts or topics which are not connected with one another are some times put together in the same sentence. And such sentences often do not have any word to indicate the transition from one fact or topic to another. Over and above this, in this *Pr tis' khya* no attempt has been made to use words at the expense of the meaning. Neither artificial nor any conventional technical terms like the one found in P nini's *Ast dhy yi* are seen in the *Rkpr tis' khya*. As a matter of fact, this treatise represents a stage in the *s tra* style of compositions which is pre-P ninian. It can be regarded as belonging to a transitional stage of the development of the later *s tra* style of writings used by authors like P nini and others.

Stop to consider :

A k rik is a concise statement in verse and has for its subject matter topics related to some doctrines or S´ stric views or opinions. Treatises on philosophy, grammar, phonetics are written in this style of composition. In a k rik can be presented a number of S tras which are as we know, by nature expressive of a number of meanings. K rik is defined as-संक्षिप्तसूत्रवह्वर्थसूचक: श्लोक: कारिका।

4.7.5 The arrangement of the Rkpratiśakhya and its contents

The *Rkpr tis' khya* consists of 429 verses and as may as 1067 S tras. The contents have been broadly arranged into three Adhy yas. Each of these Adhy yas comprises six sections called Patalas. Thus, there are eighteen Patalas in the work. A brief description of the contents of these Patalas is given below –

The first *Pațala* is known as *Sa j Paribh sa Pațala*. In it phonetic terms like *svara*, *vyanja a*, *svarabhakti*, *rakta*, *n min*, *pragrhya* etc. have been discussed.

The second *Pațala* is called *Sa hit Pațala*. In this *Pațala* has been described with apt examples different types of euphonic combinations like *pras'lista*, *ksaipra*, *padavrtti*, *udgr ha*, *bhugna*, *abhinihita* and the like.

The third *Patala* is known as *Svarapatala*. This *Patala* presents a comprehensive discussion on the various aspects of Vedic accents such as the number of accents, the process of their production, the definitions of the accents the nature of *svarita* etc.

The three Patalas from the fourth to the sixth are known respectively as *Sandhi Patala*, *Nati Patala*, and *Dhvany gama Patala*. The next three Patalas are collectively known as *Pluti* Patalas. These six Patalas (from fourth to the ninth) have dealt with topics like the production of sounds, changes of the *visarga*, and of the *s* and the \vec{r} into \vec{s} and \vec{n} under different circumstances and describes some rules of euphonic combinations like *karma*, *vyanja a*, *pluti* etc.

The tenth *Patala* is known as *Krama Patala* and the eleventh is called *Kramahetu Patala*. These two Patalas deal with *Kramap tha* and have described in a scientific manner the rules regarding the changes in the alphabets and the accents in the words in *Kramap tha*.

The twelfth *Patala* is known as S m *Patala* and the thirteenth is called *Siks Patala*. These two Patalas deal with the morphology of consonants.

The fourteenth *Patala* is known as *Ucc ranadosa Patala*. In this section S' aunaka has made some striking observations on the flaws of pronunciation of various sounds.

The fifteenth *Pațala* is called O k ra *Pațala*. It deals with the rules to be followed by both the teacher and the student at the time of studying the *Veda*.

The last three Patalas i.e. the sixteenth, seventeenth and the eighteenth Patalas are known as the *Chandah* Patalas and in them have been discussed in detail the rules of Vedic prosody.

Stop to consider :

Morphology is the study of forms of things especially of plants, animals and of words and their structure.

4.7.6 The importance of the *Rkpratiśakhya*

From the point of view of its antiquity and authority the *Rkpr tis' khya* is the foremost of all the Pr tis' khyas. No other work dealing with Vedic grammar, phonetics and prosody which is older than this *Pr tis' khya* has come down to us. While preparing his work S'anauka has taken into consideration every possible grammatical and phonetic characteristic and every metrical peculiarity found in the *Rksamhit*. As a large number of Mantras from the *Rksamhit* are found in the other three Vedas, the rules of grammar and phonetics formulated by Saunaka are equally applicable to the *Sa hit* texts of these Vedas also.

For covering all the aspects of the language of the *Rksamhit* S'aunaka has prepared three types of rules– (1) general rules (S m nyas tras) (2) exceptions (Apav das) and (3) the incidental rules (Nip tanas) for explaining irregular formations. For preserving the textual form of the *Rksamhit* the author of this treatise has prepared his s tras with great care and in a scientific manner. A reader of the *Rksamhit* the author of this treatise has prepared his S tras with great care and in a scientific manner. A reader of the *Rkpr tis khya* can see that the S tras are all based on minute observations of language. A study of this work also shows that since the time of Saunaka till date the text of the *Rksamhit* has remained free from textual corruptions.

4.7.7 Commentaries on the Rkpratiśakhya

Four commentaries on the *Rkpr tis khya* are avilable. These are-(1) *P rsada Vrtti* (2) Uvața's commentary called *P rsada Vy khy* (3) Vișnumitra's *Vargadvaya Vrtti* and (4) the *Vy khy* written by Pashupatinath Shastri. Of these the *P rsada Vrtti* is available only in manuscript from. It appears that this *Vrtti* has been closely followed by Uvața in his own work. Barring the first ten Karikas Uvața's commentary is available on the entire *Rkpr tis khya*. It is an exhaustive work which has taken into account all the aspects of Saunaka's treatise. In respect of its merit Uvața's *P rsada Vy khy* stands at par with works like the *Mah bh sya* of Pata jali and the *Bh sya* of Sabara on the *Mim s* S tras of Jaimin . Visnumitra composed his *Vrtti* on the first ten K rik s

of the *Rkpr tis' khya*. According to Baladev Upadhyaya a hand written manuscript containing Viṣṇumitra's *Vrtti* on the entire *Rkpr tis' khya* has been kept preserved at the Deccan Collage. And this *Vrtti* is known as *Rjvarthvrtti*. Pashupatinath sastri's *Vy khy* is based on the commentary of Uvața. It is a modern work published in 1927 from Calcutta.

SAQ:	
1.	Show your acquaintance with the characteristic features of the <i>Rkpr tis khya</i> .
2.	Why is this <i>Pr tis' khya</i> looked upon as the foremost of all the Pr tis khyas?
	ā
3.	Give a brief introduction to the commentaries on the <i>Rkpr tis' khya</i>

5.1 Introduction

The Vedic metres are Akṣaravṛttas. In case of these metres, the only criterion for distinguishing one metre from another is the number of syllables (Akṣaras) contained in the metres. There is no hard and fast rule for taking into account the order of syllable in a verse and it is also immaterial whether a vowel is long or short, heavy (*guru*) or light (*laghu*) as is the case with the metres used in classical Sanskrit poetry. The number of syllables in each succeeding metre increases by four syllables. Thus, while G yatr is made up of twenty-four syllables, Usnik consists of twenty eight syllables and in Anustup metre the number of syllables becomes thirty-two. The principal Vedic metres are seven in number. Those are G yatr , Usnik, Anustup, Brhat , Pankti, Tristup and Jagat . Each of these seven metres has a number of sub-varieties. The sub-varieties are determined on the basis of the number of P das, the number of syllables in each p da and the total number of syllables in the metre.

The *Rksanihit* is made up of hymns or S ktas meant for praising the deities. Each *S kta* comprises a number of Rks. And every *rk* is made up of a number of P das. These P das are made up of words, which in turn are made up of syllables. Thus the syllable is the basic unit of a *rk*.

Stop to consider :

In the *Rksa hit* there are a few *Rks* which have only one p da. Examples are *RV*, IV.17.15; V.41.20; V.42.17; X.20.1 etc.

5.2 Objective

The devout seers of the Vedas chose to extol the gods through metrical compositions. They did so, perhaps because of the fact that deep emotions are best expressed through poetry. Secondly, the primary aim of the hymns was to propitiate the gods and nothing could have been more pleasing to the gods than prayers clothed in a rhythmic language. Thirdly, the metrical limitations of the verses served the most practical purpose of memorising and preserving the hymns especially at a time when the art of writing was not in vogue. Hence, in ancient India it was mandatory for a reciter of Vedic Mantras to know the metre of each and every rk recited by him. As the metres like the accents formed an integral part of Vedic hymn poetry it is important for a student of the Vedas to have knowledge of the Vedic metres. The objective of this unit is to provide the students some ideas of the nature of the Vedic metres in general and of the three metres G yatr , Usnik and Anustup in particular as these have been treated in *Patala* sixteen of the *Rkpr* tis khya.

5.3 Meaning of the word chandas

The Sanskrit word used to mean a metre is *chandas*. The word is derived from the root *cad* – to gladden. It is the same root form which the word *candra* (the moon) comes. A metre is called *chandas* because, a composition clothed in it gladdens the heart of the listener. Y ska in his *Nirukta* has derived the word from the root *chad* to cover because, the Vedic hymns are covered by metres. According to a myth found in the *Ch ndogya Upanişad* the deities seeking protection from death covered themselves with the metres and therefore, the metres are called *chandas*. This myth may be interpreted as implying that the Vedic deities are *mantramay* i.e. they reveal themselves only through the Mantras of the Vedas. In this context it should be mentioned that the *mantra*-texts of the Vedas are metaphorically called *chandas*, because of the fact that their outer form is metrical.

5.4 The procedure of counting the syllables in a metre

The counting of syllables is done only in the Sa hit p tha and not in the *Padap* that of the Vedas in which the words stand by themselves without being joined together by the rules of Sandhi. As the basis of a syllable is the vowel, it is the number of vowels which decides the number of syllables in a word. For meeting the required number of syllables in a verse sometimes it becomes necessary to separate euphonically combined syllables. Thus, for example the word प्रेता may be read as प्र इता; the word सास्माकेभिः may have to be separated as स अस्माकेभिः; the word स्वस्मै may be separated into two words asस अस्मै and so on and so forth. On some occasions in between the यकार and the consonant to which it has been added is inserted an इकार i.e. the य is read as इय as in अश्व्यानाम् <अश्वियानाम्. In the same way the व is read as उव as in पर्व < परुव. In this context we draw the attention of the students to the following observations made by Max Muller-``If a syllable was wanted to compete the metre, a semi vowel, might be pronounced as a vowel, many a long vowel may be protracted so as to count for two syllables and short vowels might be inserted between certain consonants, of which no trace exists in the ordinary Sanskrit. If on the contrary, there were too many syllables, then the rules of Sandhi were observed or two short syllables were contracted by rapid pronunciation into one: nay in a few cases, a final m or s it seems, was omitted."

SAQ: 1. What are the basic characteristics of Vedic metres? 2. What is the meaning of the word *chandas*? 3. What practical purpose is served by the metre? 4. Show you acquaintance with the manner of counting syllables in a metre?

5.5 The Gayatri metre

Scholars believe that G yatr is the oldest of all the Vedic metres. The standard G yatr consists of twenty four syllables and three P das. The twenty four syllables are equally distributed in the three P das as 8+8+8=24. A number of sub-varieties of G yatr are created by either reducing or increasing the number of syllables as well as the number of P das.

5.5.1 Definition of *G* yatr

In the *Rkpr tis' khya.*, G yatr has been defined as follows –

गायत्री सा चतुर्विंशत्यक्षरा।

```
अष्टाक्षरास्त्रयः पादाश्चत्वारो वा षळ्क्षरा॥
```

The anvaya (prose order) of the verse is as follows-

[या] चतुर्विंशत्यक्षरा सा गायत्री [उच्यते]

[अस्याम्]अष्टाक्षराः त्रयः पादाः षड़क्षराः चत्वारो वा [पादाः भवन्ति]।

So number of syllables are 8+8+8 or 6+6+6+6.

The metre known as G yatr is generally made up of twenty four syllables. In it there are either three P das of eight syllables each or four P das each consisting of six syllables. Thus, from the point of view of the number of P das standard G yatr can be either tripad or catuspad. In both the types the total number of syllables remains the same. In the *Rksanihit* of the *S* kala S kh we find only tripad G yatr. No example of catuspad G yatr occurs in it.

An example of tripad G yatr –

अग्निमीळे पुरोहितम् । यज्ञस्य देवमृत्विजम् । होतारं रत्नधानमम् ॥

In this verse the number of syllables is to be counted as follows-

अ - ग्नि - मी - ळे - पु - रो - हि - तम्। य - ज्ञ - स्य - दे - वम् -ऋ - त्वि - जम्। हो - ता - रम् - र -त्न - धा - त - मम्॥

An example of *catuspad* G yatr as given in the *Rkpr* tis khya-

इन्द्रः शचीपतिः। बलेन वीळितः। दुश्च्यवनो वृषा। समत्सु सासहिः॥

In this examples the syllables are counted as follows-

इ - न्द्र: - श - ची - प - ति:। ब - ले - न - वी - ळि - त:। दु - श्च्य - व - नो - वृ - षा। स - म - त्य्य् - सा - स - हि:॥

5.6 Sub-varieties of G yatr

There are as many as nine sub-varieties of the *G* yatr metre. These are – (1) Padapankti (2) Bhurikpadapankti (3) Bhurik (4) Vir t or *P* danicr.t (5) Atinicr.t (6) Vardham n (7) Dvipad (8) Yavamadhy and (9) Usniggarbh .

5.6.1 Padapankti and Bhurikpadapankti

These two sub divisions of G yatr are defined in a single verse as follows-

पञ्चकाः पञ्चः षड्वान्त्यः पदपङ्क्तिर्हि सा भुश्कि्। द्वौ वा पादौ चतुष्कश्च षट्कश्च एकस्त्रि पञ्चकाः॥

The anvaya of the verse is as follows-

[यस्यां गायत्र्याम्] पञ्चकाः पञ्चः [पादाः सन्ति सा] पदपर्ङ्क्तिः [उच्यते];[यदि पञ्चपादानाम्] अन्त्यः [पादः] षड्[अक्षरपुक्तः स्यात्]सा हि मुरिक् [पदपर्ङ्क्तिः उच्यते];[यदि] वा द्वौ पादौ एकः चतुष्कः [अपरः] षट्कः[तथा अवशिष्टाः] त्रिः पञ्चकाः[इत्येवं पादव्यवस्था भवति तदा अपि सा पदपर्ङ्क्ति नामिका गायत्री भवति] The *G* yatr metre which consists of five P das and in each *p* da there are five syllables, it is known as *Pdapankti*. *Padapankti* consists of twenty five syllables. Again if any one of the five P das consists of four syllables and another *p* da has six syllables and the remaining three P das have five syllables each, then too the metre is called *Padapankti*. Thus, in *Padapankti* the arrangement of the P das can be follows–

(a) 5+5+5+5=25(b) 4+6+5+5=25or 4+5+5+5=25or 5+5+5+6=25or 5+5+5+4+6=25

and so on.

So far as *Bhurik Padapankti* is concerned in it each of the first four P das is made up of five syllables and the fifth p da has six syllables. This makes the total number of syllables in *Bhurik Padapankti G yatr* twenty six. (5+5+5+6=26)

Examples-

(A) Padapańkti-I

ā

शुर हरिह। पिबा सुतस्य। मतिर्न मध्व।

Padapankti-II

इन्द्र जुषस्व। प्र वहा याहि।

 (a) अधा ह्यग्ने । क्रतोर्भद्रस्य । दक्षस्य साधोः । रथीर्ऋतस्य । बृहतो बभूथ ॥

In this example the first and the fifth P das have respectively four and six syllables and the rest of the P das have five syllables each.

(b) अग्ने तमद्य। अश्वं न स्तोमैः। क्रतुं न भद्रम्। हृदिस्पृशम्। ऋध्यामा त ओहैः॥

In this example the first three P das have five syllables each, the fourth consists of four and the fifth p da is six syllabic.

(B) Bhurik Padapankti-I

घृतं न पूतम् । तनुररेपाः । शुचि हिरण्यम् । तत् ते रुक्मो न। रोचत स्वधावः ॥

5.6.2 Bhurik G yatr (8+10+7=25)

The definition of Bhurik G yatr is f as follows-

अष्टको दशक: सप्ती विद्वांसविति सा भुरिक्।

The anvaya of the passage is-

[यदि प्रथमपाद:] अष्टक: [द्वितीयपाद:] दशक:[तृतीय] सप्ती [इत्येवम् पादव्यवस्था भवेत् तर्हि] सा भुरिक्[उच्यते]. विद्वांसा इति [अत्र उदाहरणम्].

The metre in which the first p da is eight syllabic (astaka), second p da is ten syllabic (das'aka) and the third is seven syllabic (sapt), is known as Bhurik G yatr. Thus, Bhurik G yatr is tripad and the total number of syllables in it is twenty five.

The example of this metre given in the *Rkpr* tis' khya is-

विद्वांसाविद् दूर: पृच्छेत्। अविद्वानित्थापरो अचेता:। नु चिन्नु मर्ते अक्रौ॥

5.6.3 Virat G yatr (also known as P danicrt G yatr) (7+7+7=21)

In the *Rkpr tis' khya* this metre is defined as follows-

युवाकुहीति गायत्री त्रयः सप्ताक्षरा विराट्। सा एषा पादनिचृत् नाम गायत्री एकविंशिका॥

The anvaya of this verse will be as follows-

[यस्याः गायत्र्याः] सप्ताक्षराः त्रयः [पादाः सन्ति सा] विराट् गायत्री [इति उच्यते] सा [एव] एषा एकविंशिका गायत्री पादनिचृत् नाम। युवाकुहि इति [अत्र उदाहरणम्]

The *G* yatr metre in which there are three P das and in each p da there are seven syllables is called *Vir* t. This very metre consisting of a total number of twenty one syllables is also known as *P* danicrt.

Example-

युवाकु हि शचीनाम्। युवाकु सुमतीनाम्। भूयाम वाजदाव्नाम्॥

5.6.4 Atinicrt G yatr (7+6+7)

Atinicrt is defined as

षट्कः सप्तकयोर्मध्ये स्तोत्टृणां विवाचीति।

यस्याः सा अतिनिचृत् नाम गायत्री द्विर्दशाक्षरा॥

Anvaya : यस्या: [गायत्र्या:] सप्तकयो: [पादयो:] मध्ये षटक: [पाद: वर्त्तते] सा द्विर्दशाक्षरा अतिनिचृत् नाम गायत्री: [इति वेदितव्या]। स्तोत्टृणां विवाचि इति [अत्र सप्तकयोर्मध्ये षटकस्य उदाहरणम्].

The *G* yatr metre which has a *p* da of six syllables between two P das of seven syllables each, is known as *Atinicr*t. It consists of a total number of only twenty syllables. The word dvirdasa means two tens which make twenty. (10+10=20)

The example given in the *Rkpr tis' khya* is

पुरुतमं परुणाम् । स्तोत्टृणां विवाचि । वाजेभिर्वाजयताम् ॥

5.6.5 Vardham n G yatr (6+7+8=21)

The definition of *Vardham* n runs as follows—

उत्तरोत्तरिणः पादाः षट्सप्ताष्टौ इति त्रयः। गायत्री वर्धमाना एषा त्वमग्ने यज्ञानामिति॥

Anvaya : [यस्या: गायत्र्या:] षट्-सप्त-अष्ट इति त्रय: [अनुक्रमेण] उत्तरोत्तरिण: पादा: [सन्ति] एषा वर्धमाना गायत्री [भवति]। त्वमग्ने यज्ञानस्मिति [अस्या: उदाहरणम्].

The *G* yatr metre which is made up of three consecutive P das (*uttarottarinah* p d h) of six, seven and eight syllables respectively is called *Vardham* n. It is called *Vardham* n because, the number of syllables in the P das gradually increases by one syllable. The total number of syllables in the metre is twenty one.

Example-

त्वमग्ने यज्ञानाम्। होता विश्वेषां हित:। देवेभिर्मानुषे जने॥

According to the *Rkpr tis' khya*, there can be yet another type of arrangement of P das in *Vardham n G yatr* (8+6+8) in which the first and the third P das have eight syllables each and the middle *p da* consists of six syllables.

In the *Rksa hit* of the $S\zeta$ kala $S\zeta$ kha this kind of Vardham n G yatr is not found. Hence, the author of the *Rkpr tis* khya has not cited any example.

5.6.6 Dvipad G yatr (12+12=24)

As its very name suggests this variety of G yatr is made up of two P das. Dvipad G yatr is defined as follows-

स नो वाजेषु पादौ द्वौ जागतौ द्विपदा उच्यते।

The anvaya of this passage is as follows-

[यस्या:] द्वौ जागतौ पादौ[भवत:, सा गायत्री] द्विपदा उच्यते। स नो वातेषु [इति अत्र उदाहरणम्].

As stated in the definition $Dvipad \ G \ yatr$ consists of two $j \ gata \ P \ das$. The word $j \ gatap \ da \ means a p \ da$ with twelve syllables. Here a twelve syllabic $p \ da$ has been referred to as $j \ gata$ because, in the Jagat metre each of its four P das consists of twelve syllables. Thus, Dvipad is a metre consisting of twenty four syllables and two P das.

An example is-

```
स नो वाजेषु अविता पुरुवसुः।
पुरःस्थाता मघवा वृत्रहा भूवत्॥
```

5.6.7 Yavamadhy G yatr (7+10+7=24)

This variety of the G yatr metre has been defined in the *Rkpr* tis khya as follows–

आद्यन्तौ सप्तकौ यस्या मध्ये च दशको भवेत्।

यवमध्या च गायत्री स सुन्व इति दृश्यते॥

The anvaya of this verse is as follows-

च [यस्या:] आद्यन्तौ [पादौ] सप्तकौ [भवेताम्] मध्ये च दशक: [पाद:] भवेत् [सा] गायत्री यवमध्या [इति उच्यते],[अस्या उदाहरणम्] स सुन्व इति [मन्त्रे]. दृश्यते।

The *G* yatr verse in which there is a ten syllabic *p* da is known as Yavamadhy. The word Yavamadhy means that which has a bigger mid-region in comparison to its two ends just like a grain of yava. From the point of view of the number of syllables the middle *p* da of Yavamadhy *G* yatr is bigger than the first and the last P das and hence, the name Yavamadhy.

An example is-

स सुन्वे यो वसूनाम्। यो रायामानेता य इळनाम्। सोमो य: सुक्षितीनाम्॥

5.6.8 Uşniggarbha Gāyatrī (6+7+11=24)

The definition of this metre runs as follows-

षडक्षरः सप्ताक्षरः तत एकादशाक्षरः। एषा उष्णिगृगभाँ गायत्री ता मे अश्व्यानामिति॥

Anvaya : [प्रथम पाद:] षडक्षर, [द्वितीयापद:] सप्ताक्षर: तत: [तृतीयापाद:] एकादशाक्षर: [इत्येवं पादव्यवस्था यस्यां दृश्यते] एषा उष्णिग्गभाँ गायत्री। ता मे अश्व्यानामिति [अस्या उदाहरणम्].

That variety of G yatr in which the first p da has six syllables, the second has seven and the third p da consists of as many as eleven syllables is called Usniggarbh. This metre is called so probably because of the fact that just like the Usnik metre which has four more syllables than the first and second p das in its third p da, here too the third p da consists of four more syllables than the second p da. The example of this metre given by Saunaka is as follows–

```
ता मे अश्व्यानाम्। हरीणां नितोशना। उतो कृत्व्याना नृवाहसा॥
```

In this example in order to get six syllables in the first p da the word अख्यानाम् is read as अश्वियानाम्. And in the last p da in order to get eleven syllables the word कृत्व्यानाम् is read as कृत्वियानाम् **क**

5.6.9. Summing up

From the discussions made above we learn the following-

- 1. The sub-varieties of G yatr metre are made (a) by increasing or decreasing the number of syllables in the P das and also (b) by increasing or decreasing the number of P das.
- 2. The highest number of syllables found in *G yatr* is twenty six and the lowest is twenty.
- 3. When considered from the point of view of the number of P das G yatr can be of four types (a) dvipad , (b) tripad , (c) catuspad and (d) pañcapad .

SAQ: 1. What are the characteristics of the *G yatr* metre? 2. How many sub-varieties of *G yatr* are there? Show your acquaintance with them. 3. What procedures are followed for creating the subvarieties? Give examples.

5.7 Uşnik metre

Just like G yatr the standard Usnik consists of three P das. In fact Usnik has been created just by adding four more syllables to the third p da of the G yatr metre. Thus, while G yatr has twenty four syllables, Usnik has twenty eight.

5.7.1 Definition of *Uṣṇik* (8+8+12=28)

In the Rkpr tis khya Uṣṇik is defined as follows-

अष्टाविंशत्यक्षरा उष्णिक् सा पादैर्वत्तते त्रिभिः।

पूर्वो अष्टाक्षरौ पादौ तृतीयो द्वादशाक्षर:॥

When rendered into prose order this verse is read as follows-

उष्णिक् अष्टाविंशत्यक्षरा [भवति] । सा त्रिभिः पादैः वर्त्तते । [तस्याः] पूर्वौ पादौ अष्टाक्षरौ [भवतः],तृतीयः[पादः] द्वादशाक्षरः । As stated in this definition $U_{s,nik}$ consists of a total number of twenty eight syllables. It has tree P das. Of these the first and the second P das have eight syllables each and the third p da consists of twelve syllables.

An example is-

अग्ने वाजस्य गोमत:। ईशान: सहसो यहो। अस्मे धेहि जातवेदो महि श्रव:॥

5.8 Sub-varieties of Uşnik

A number of subvarieties of Usnik have been created on the basis of (a) the position of the twelve syllabic p da of the standard Usnik metre; (b) by increasing or decreasing the total number of syllables and also (c) by increasing or decreasing the number of P das. There are six subvarieties of Usnik. These are 1. Purausnik 2. Kakup, 3. Kakumnyankusir Nicrt, 4. Pip likamadhy , 5. Tanusir and 6. Anustubgarbh .

5.8.1 Purauṣṇik (12+8+8=28) and Kakup (8+12+8=28)

For defining these two sub-varieties of U_{snik} it is necessary to recall the arrangement of the P das in the standard U_{snik} metre. As it is seen in the definition of U_{snik} , the first two P das are eight syllabic and the last p da is twelve syllabic. *Purausnik* is created by rearranging these P das as 12+8+8=28. And *kakup* is created by rearranging the Padas as 8+12+8=28.

In the *Rkpr tis khya*. these two metres are defined as follows - पुरउषिणक् तु सा तस्मिन् प्रथमे गध्यमे ककुप्।

The anvaya of this passage will be as follows - तस्मिन् [द्वादशाक्षरे पादे] प्रथमे [सति] सा पुरउष्णिक् [भवति], तु [द्वादशाक्षरे पादे]मध्यमे [सति] ककुप् [भवति]।

This means that when the twelve syllabic $p \, da$ of Usnik is the first is the first $p \, da$ and by implication the eight syllabic two P das are the second and the third, the metre is known as *Purausnik*. But when this twelve syllabic $p \, da$ is placed between the two eight syllabic P das, the metre becomes known as *Kakup*.

Examples -

Purausnik-

```
तच्चक्षुर्देवहितं शुक्रमुच्चरत्। पश्येम शरद: शतम्। जीवेम शरद: शतम्॥
```

Kakup -

सुदेवः समहासति। सुवीरो न रो भरुतः

स मर्त्य: । यं त्रायध्वे स्याम ते ॥

In this example for getting the required number of twelve syllables the word मर्त्य should be broken up as मर्तिय । And in the last p da in order to get eight syllables the word स्याम is broken up as सियाम.

2.8.2 Kakumnyankusri Nicrt (11+12+4=27)

Kakumnyankuśri (Kakup Nyankuśir) Nicrt is defined as followed -

ददी रेक्ण इति तु एषा ककुम्न्यङ्कुशिरा निचृत्।

एकादशोऽस्याः प्रथमः उत्तमः चतुरक्षरः॥

The anvaya of the verse is as follows -

ददी रेक्ण इति एषा [ऋक्] तु ककुप् न्यङ् कुशिरा निचृत् [इति विज्ञेया]। अस्या: [ऋच:] प्रथम: [पाद:] एकादश:, उत्तम: [पाद:] चतुरक्षर:।

The *r*,*k* ददी रेक्ण etc. is in the metre called *Kakup Nyankusir Nicr*. In it the first *p* da is made up of eleven syllables, the last *p* da of four syllables. So far as the number of syllables in the middle *p* da is concerned, because of the word *kakup* in the name of the metre, the number should be twelve. Thus, in this metre the P das are arranged as 11+12+4 and the total number of syllables in the metre is twentyseven. In this connection we may refer to Uvata who says - नाम्नि ककुप् शब्दात् द्वितीयो द्वादशाक्षर: 1 The verse ददी रेक्ण etc. is the only example of this metre found in the *Rksamhit*. The complete verse is as follows –

ददी रेक्ण तन्वे ददिर्वसुः । ददिर्वाजेषु परुहूतः वाजिनम् । नूनमथ॥

ā

Stop to consider

Whenever the world *nicrt* is seen in the name of a metre, it should be known that the metre consists of a lesser number of syllables. The word *nicrt* is derived as $ni-\sqrt{crt-kvip}$. The root *crt* is used in the sense of cutting off.

5.8.3. Uşnik Pip likamadhy (11+6+11=28)

In Usnik Pip likamadhy the first and the third P das have eleven syllables each, but the middle p da consists of only six syllables. The definition of this metre is as follows –

एकादशाक्षरौ च द्वौ मध्ये च एक: षळक्षर:। उष्णिक् पिपीलिकमध्या हरी यस्य इति दृश्यते॥

The anvaya of the verse is as follows – [यस्या उष्णिह:] एकादराक्षरौ च द्वौ [पादौ भवत:] मध्ये च एक: [पाद:] षड़क्षर: [स्यात्, सा] उष्णिक् पिपीलिकमध्या [इति जानीयात्]। हरी यस्य इति [मन्त्रे अस्या उदाहरणम्] दृश्यते। This sub-variety of Usnik is called Pip likamadhy because just like an ant which always has a thinner

midregion, so also the middle p da of this metre is considerably smaller than the first and the last p da. The example of this metre given in the *Rkpr* tis khya is as follows –

हरी यस्य सुयुजा विव्रता वे:। अर्वन्तानु रेपा। उभा रजी न केशिना पतिर्दन्॥

5.8.4 Tanus'ir Uşnik (11+11+6=28)

This metre is called *Tanus'ir* because, one of its end (*sira*) is thin (*tanu*). This sub variety of *Usnik* has been created by re-arranging the P das of the *Pip likamadhy Usnik*. *Pip likamadhy* is made up of three P das. Of these the first and the last P das are of eleven syllables each whereas ,the *middle* p da is six syllabic. In *Tanus'ir* the first two P das have eleven syllables each and the last p da is of six syllables.

The definition of Tanus'ir Usnik is as follows -

ताभ्यां पर: षळक्षर: प्र या तनुशिरा नाम।

The anvaya of this passage will be-

ताभ्यां [पिीलिकमध्यगताभ्याम् एकादशाक्षराभ्यां पादाभ्यां] पर: [यदि] षड़क्षर: [पाद: स्यात् तर्हि सा] तनुशिरा नाम [उष्णिक् भवति]। प्र या [इति अत्र उदाहरणम्]

The example given in the *Rkpr tis khya* is

```
प्र या घोषे भृगवाणे नशोभे।
यया वाचा यजति पज्रियो वाम्।
प्रैषयुर्न विद्वान्॥
```

5.8.5. Anustup Garbha Usnik (5+8+8+8=29)

Anustup Garbh Usnik is called so because, as in the *Anustup* metre so in it there are four P das.

This metre has been defined as follows-

आद्यः पञ्चाक्षरः पादः उत्तरे अष्टाक्षराः त्रयः।

अनुष्टुब् गर्मा उष्णिक् सा आगस्त्ये अस्ति पितुं नु इति।

Anvaya of the verse will be -

[τ स्या:] आद्य: [τ प्राद:] τ ज्वाक्षर: [τ भवति तथा] उत्तरे त्रय: [τ पादा:] अष्टाक्षरा: [τ भवन्ति, सा] अनुष्टुप् τ मी उष्णिक् [τ इति उच्यते] सा पितुं नु τ इति [τ क्वक्] आगस्त्ये [τ स्वते] अस्ति । Thus, in this metre the first *p da* is made up of five syllables. It is followed by three P das, each of which consists of eight syllables. This makes the total number of syllables in this metre twentynine.

The example is –

पितुं नु स्तोषम् । महो धर्माणं तविषीम्। यस्य त्रितो व्योजसा। वृत्रं विपर्वमर्दयत्॥

In the *Rksamhit* this is the only verse composed in *Anustup Garbh* Usnik. It occurs in *RV*, I.1.87 and the seer is Agastya. In this verse in order to get the required number of eight syllables in the third p da the word व्योजसा should be read as वि ओजसा ।

5.8.6. Summing Up

From the above discussions it is seen that -

- 1. The standard *Uṣṇik* metre and five of its v**a**rieties viz. *Purauṣṇik*, *kakup*, *Kakumnyanikuśir Nicṛt*, *Pip likamadhy* and *Tanuśir* are *tripad*.
- 2. Only Anustup Garbh is catuspad .
- 3. The only sub-variety of *Usnik* with lesser number of syllables is *kakumnyankus'ir*.
- 4. Anustup Garbhr is the only sub-variety with a greater number of syllables.

SAQ 1. Show your acquaintance with the *Usnik* metre and its sub-varieties. 2. What is the relation between *Pip likamadhy* and Tanusı́r Usnik?

5.9 *Anustup* metre (8+8+8+8=32)

Anustup metre occupies a significant place among the Vedic metres. This metre was created simply by adding an eight syllabic p da to the three light syllabic P das of the G yatr metre. This fact has been taken note of in the Nirukta of Y ska. Y ska has explained the significance of the word anustup as अनुष्टुबनुष्टोभनात्, गायत्रीमेव त्रिपदां सतीं चतुर्थेन पादेन अनुष्टोभति I

Thus, the word is derived from the root *stubh* (to praise, to enhance). *Anustup* is called so for, it enhances the *G yatr* with an additional eight syllabic p da. In the *Aitareya Br hmana* also it has been said that *Anustup* was born form *G yatr*.

Stop to consider :

The root stubh is listed in the Nighantu 3.14. It is not used in classical Sanskrit,

although the word *stobha* derived form it is in use.

5.9.1 Definition of Anustup metre

The metre known as Anustup is made up of four P das and thirty two syllables. Each p da consists of eight syllables. In the *Rkpr tis khya*, Anustup is defined as-

```
द्वात्रिंशदक्षरा अनुष्टुप् चत्वारोऽष्टाक्षराः समाः
```

When rendered into prose order the passage runs as follows -

अनुष्टुप द्वात्रिंशदक्षरा [भवति]। [अस्याः] चत्वारः अष्टाक्षराः समाः [पादाः सन्ति]।

In this definition the P das are referred to as \overline{xun} : i.e. of equal dimension. This is because, all of them are made up of eight syllables. An example of *Anustup*-

```
गायन्टि त्वा गायत्रिण: । अर्चन्ति अर्कमर्किण: ।
ब्रह्माणस्त्वा शतक्रतो । उद्वंशमिव येमिरे ॥
```

5.10 Sub-varieties of Anustup

There are six subvarieties of *Anustup*. These are 1. *Krti*, 2. *Pip likamadhy* 3. *K vir t*, 4 *Nastar p*, 5. *Vir t* and 6. *Mah padapankti*.

5.10.1 Krti Anustup (12+12+8=32)

Krti consist of three P das. The definition of krti is as follows -

कृर्तिद्वौ द्वादशक्षरौ एकश्च अष्टाक्षरः परः।

The anvaya of the passage is as follows -

[यस्या: अनुष्टुभ:] द्वौ द्वादशक्षरौ [पादौ भवत:, तथा] एक: अष्टाक्षर: [पाद:] पर: [भवति, सा] कृति: [इति उच्यते]. As stated in this passage the first P das of *Kr*,*ti* consist of twelve syllables each and these are followed by a *p* da of eight syllables. In the entire *R*,*ksamhit* there is only one *r*,*k* (I.120.8) composed in *Kr*,*ti* Anustup. The *r*,*k* is as follows –

```
मा कस्मै धातमभ्यमित्रिणे न:।
मा कुत्रा नो गृहेभ्यो धेनवो गु:।
स्तनाभुजो अशिश्वी:॥
```

In this verse in order to get the required number of twelve syllables in the first $p \, da$ the word अभ्यमित्रिणे should be broken up as अभि अमित्रिणे. Similarly, in the second $p \, da$ the word माकुत्रा should be separated as मा अकुत्रा. In the last $p \, da$ to get eight syllables the word अशिष्वी: should be pronounced as अशिष्वीह i.e., the *visarga* should be lengthencd.

ā

5.10.2 *Pip likamadhy Anustup* (12+8+12=32)

The arrangement of the P das in *Krti* is 12+12-8=32. When these very P das are re-arranged as 12+8+12=32, we get the metre called *Pip likamadhy*

In the *Rkpr tis' khya*. this sub-varieties of *Anustup* is defined as follows –

यस्यास्तु अष्टाक्षरो मध्ये सा पिपीलिकमध्यमा.

The anvaya of this passage is as follows-

तु यस्याः [अनुष्टभः द्वादशाक्षरयोः पादयोः] मध्ये अष्टाक्षरः [पादो भवति] सा पिपीलिकमध्यमा [इति विज्ञेया].

The word *tu* has been used in the definition of this metre to indicate its relation with as well as its difference from *Krti*.

An example of Pip likamadhy Anustup-

परि उु षु प्र धन्व वाजसातये।

परि वृत्राणि सक्षणि: ।

द्विषस्तरध्या ऋणया न ईयसे॥

5.10.3 K vir t Anustup (9+12+9=30)

K vir t Anustup consists of thirty syllables and three P das.

In the *Rkpr tis' khya*, it is defined as follows –

नवकौ द्वादशी दुयूना ता विद्वांसा इति काविराट्

The anvaya of this passage is as follows -

[यस्या:] नवकौ [द्वौ पादौ भवत:] द्वादशी [एक: पाद:, सा अनुष्टुप्]काविराट् [इति वेदितव्या]। [एषा] दुयूना [भवति]। ता विद्वांसा इति [अस्या: उदाहरणम्]।

In this metre any two of its three P das can have nine syllables each. And the remaining p da is made up of twelve syllables (dv das'). It has two syllables less. Hence, it has been referred to as दुयूना which means द्वाग्याम् अक्षराभ्याम् ऊना. ऊना means हीना।

The only example of *K* virat found in the *Rksanihit* is I.120.3. The verse runs as follows -

> ता विद्वांसा हवामहे वाम्। ता नो विद्वांसा मन्म वोचेतमद्य:।

ā

प्रार्चत् दयमानो युवाकुः ॥

In this verse the first p da is nine syllabic, so is the last p da, whereas the middle *p* da is twelve syllabic.

2.10.4 Nastr p Anustup (9+10+13=32)

For creating this sub-variety of Anustup the P das of the metre called K vir t are arranged as 9+9+12=30. Then the number of syllables in the second and the third P das are increased by one syllable each as follows-

9+10+13=32

The definition of *Nastr* p is stated in the *Rkpr* tis' khya as follows–

तेषाम् एकाधिकौ अन्त्यौ नष्टरुपा वि पृच्छामि।

Its anvaya is as follows-

तेषां [काविराट् गतानां नवकद्वादशीनां पादानाम्] एकाधिकौ अन्त्यौ [यदि भवतः, तदा सा] नष्टरुपा [नामिका अनुष्टुप् भवति]। वि पृच्छामि [इति अस्या: उदाहरणम्]।

Thus, it is said in this passage that when the syllables of each of the last two P das of the metre called *K* vir t are increased by one syllable, the metre becomes known as *Nastr* p. In this definition it has not been stated that the P das of *K* vir t have to be arranged as 9+9+12 before increasing the number of syllables of the last two P das of the metre. It is from the commentary of Uvata we learn that the P das of *K* vir t have to be rearranged as the first step towards creating the metre *Nastr* p. Uvata says–

नवाक्षर: प्रथम: पाद:, दशाक्षरो द्वितीय:, त्रयोदशाक्षरोऽन्तिम:, सा अनुष्टुप् नष्टरुपा। The only example of this metre found in the *Rksamhit* is I.120.4. The verse is as follows-

वि पृच्छामि पाक्या न देवान्। वषट्कृतस्याद्भूतस्य दस्र। पातं च सह्यसो युवं च रभ्यसो नः॥

5.10.5 Vir *t* Anustup (10+10+10=30 or 11+11+11=33)

In *Vir t Anustup* there are either three P das of ten syllables each or three P das of eleven syllables each. The first type of *Vir t* is called *das kṣar* and the other is known as *ek das kṣar*. From the point of view of the total number of syllables *Vir t* can thus be either of thirty syllables or of thirty three syllables.

Vir tAnustup is defined as follows-

दशाक्षराः त्रयो विराट् त्रयो वा एकादशाक्षराः।

The anvaya of the passage is-

```
[यस्याः अनुष्टुभः] दशाक्षराः त्रयः [पादाः सन्ति] वा एकादशाक्षराः त्रयः [सा
अनुष्टुप्] विराट् [इति उच्यते]।
```

An example of thirty syllabic Vir t

श्रुधी हवं विपिपानस्यद्रे:।

बोधा विप्रस्यार्चतो मनीषाम्।

कृष्वा दुवांस्पन्तमा सचेमा॥

An example of the thirty three syllabic Vir t

अग्न इन्द्रश्च दाशुषो दुरोणे।

सुतावतो यज्ञमिहोप यातम्।

अमर्धन्ता सोमपेयाय देवा॥

5.10.6 Mah padapańkti Anustup (5+5+5+5+5+6=31)

This subvariety of *Anustup* metre consist of as many as six P das but the number of syllables in it is thirty one. Of the six P das each of the first five P das are of five syllables. And the sixth p da consists of six syllables.

Mah padapankti is defined in the Rkpr tis khya. as follows-

षण् महापदपङ् क्तिस्तु षट्कोऽन्त्यः पञ्च पञ्चकाः।

When rendered into prose order the passage runs as follows-

तु [या अनुष्टुप्] षट् [पदा, सा] महापदपर्ङ्क्तिः [इति उच्यते]।[अस्याः] अन्त्यः [पादः] षटकः [भवति]।[आद्याः] पञ्च [पादाः] पञ्चकाः।

Example-

तव सादिष्ठा। अग्ने संदृष्टिः। इदा चिदहणः। इदा चिदक्तोः। श्रिये रुक्मा न। रोचत उपाके॥

5.10.7 Summing up

Although the standard *Anustup* metre is made up of four P das, majority of its subvarieties is of three P das. The only subvariety with a greater number of P das is *Mah padapankti* which has three P das. Two of the subvarieties viz. *K vir t* and *Das ksar Vir t* are thirty sy abic. *Ek das ksar Anustup* comprises thirty three syllables. Rest of the varieties are all of thirty two syllables each. It is the standard *Anustup* metre which has been extensively used in the *Rksamhit*

SAQ: 1. How was the *Anusţup* metre created? 2. What is the derivative meaning of the word *anusţup*?

3.	Define Anustup with an illustration.
4.	Show your acquaintance with the sub-varieties of <i>Anustup</i> .
5.	How was the <i>Nastr p Anustup</i> created?
6.	What is the relation between <i>Krti</i> and <i>Pip likamadhy Anustup</i> ?

6.1 Introduction

This unit is designed in such a way as to help you in getting acquainted with essay. The essay is a branch of literature. It is a literary composition or a treatise, usually in prose which may be of varying length and it discusses a topic or varieties of topics. The word 'essay' has been developed from the original French word 'essai'. Different scholars like Bacon, Montaigne, Addison, Johnson, Murry, Goldsmith, Charles Lamb etc. have expressed their views regarding the form and characteristics of essay. Most of them became famous by writing some popular essays. The essay, as a literary form was firmly established by Joseph Addison. It is distinguished from other branches of literature as it posseses the essential quality of persuasion. There is a continuous flow of writing essay not only in English, but also in some other languages from a very long time. This branch is available in Sanskrit literature also. A number of valuable essays has written in Sanskrit. By studying these valuable writings the students may acquire a detail knowledge for writing निबन्ध in Sanskrit.

6.2.1 What is an Essay?

An essay is a written composition giving expression to our personal ideas or opinions on some topic. Etymologically the word 'essay' connects the trail (प्रेचष्टा) of a subject or an attempt (प्रयास) towards it, and not a final and thorough examination of it. According to Britannica Ready Reference Encyclopedia, essay is an analytic, interpretative or critical literary composition, usually dealing with its subject from a limited and often personal point of view. The essay has been the vehicle of literary and social criticism for some, while for others it could serve semi political nationalistic, or polemical purposes and could have a detached, playful earnest or bitter tone.

6.2.2 Synonymous words for essay in Sanskrit:

The Sanskrit synonyms of the word essay are प्रबन्ध, निबन्ध, रचना etc,. Amongst these the word प्रबन्ध is found to be mostly used. The derivation of the word प्रबन्ध is प्रकृष्टं (superior, excellent) बन्धनम्(binding or tying). Again it can be said that स्वाभिप्रायस्य निबन्धनमेव निबन्ध which means binding of someone's own ideas or thinking i.e. the ascertainment of what is intended to state about a subject is called निबन्ध.

Generally men are attached with nature, they are investigators, thoughtful, considerate and searching after knowledge. As a result of this some ideas, opinions and facts appear in their minds. When these ideas and facts about something, after proper examination are expressed in words in a systematic way it is called a निबन्ध.

6.2.3 Some essay-writers in English and Sanskrit:

Like Bacon, Gold Smith, Charles Lamb etc, who became famous by writing essays in English, some Sanskrit scholars also have popularized this branch of literature by their valuable contributions to it. Some of these निबन्धकारs are– Dr. R.C. Shukla, Dr. K.D. Dvivedi, K.K. Avasthi, Dr. B.S. Pandey, Dr. G. Pathak etc.

SAQ:

Differentiate प्रबन्ध & निबन्ध

6.1 Objectives:

This unit will help you to know about an essay and how to write it (निबन्ध) in Sanskrit. After going through this unit you will be able to-

- 1. understand the meaning of essay
- 2. be acquainted with the Sanskrit synonyms of essay
- 3. know the names of some essay-writers in English and Sanskrit.
- 4. classify the different निबन्धऽ into different categories.

6.3 How to write an essay (निबन्ध)

6.3.1 Selection of topics:

At first you should select the subject or topic on which you are eager to write. In one essay one topic should be discussed.

6.3.2 Preparation of an outline

After selecting the topic you think over it and plan out what you want to write on the topic. Thus you are to prepare an outline of the essay.

6.3.3 Arrangement of the points

You should have a clear observation of the topic because observation makes the description beautiful and interesting. You should think over the topic again and again until some points appear your mind. Note down the points. Arrange your points in their natural order.

6.3.4 Elaboration of the headings

Include the points under some headings systematically. After this arrangement you are to elaborate each heading in clear and simple language. Each heading should have at least one paragraph itself. You begin a new paragraph when a new heading is entered upon.

6.3.5 Revision and correction

After finishing the essay it should be revised and all the errors of spelling and grammar should be corrected.

6.4 Language of the निबन्ध

Language is the carriage of the feelings or ideas. Generally writing about anything is more difficult than talking. During conversation one can use some signs of expressions. But it is difficult to express one's feelings in writing. A student has to express his ideas in words. Therefore, the student should know proper words to fit the expressions. The language of a निबन्ध should not be rigid. It should be simple, precise and within the reach of the ordinary students. Every word should be used carefully so that the language becomes charming, clear and attractive. It will enable the student to master it without much effort. The repetition of words or ideas should be avoided.

6.5 Parts of a निबन्ध

You can divide the contents of a निबन्ध into three main parts viz. Introduction, Discussion and Conclusion.

The Introduction of a निबन्ध which is termed as सूचना, परिचय:, भूमिका, प्रस्तावना, अवतरणिका, विषयावतरणी etc. should be in short. A paragraph of a few sentences is sufficient for introduction. Generally it is started with the definition, very short description, a hint to the usefulness and sometimes with certain important part of the selected topic. You should try to make it attractive and meaningful.

Excluding the Introduction and the Conclusion, the remaining portion of a निबन्ध is considered as main body (शरीर or मध्यभाग). This section may be subdivided into some heads namely प्रकार, प्रकृति, महत्व, गुणदोषौ, उपयोगिता etc. as required by the subject. In this portion the description is found to be developed in proper order and proper place.

Like the Introduction the Conclusion, which is denoted by the term उपसंहार, निष्कर्ष etc., also should be attractive and short. The writer may express his own comment with arguments. मधुरेण समापयेत् i.e. the निबन्ध should be concluded with sweet remark indicating bright future.

6.6 Kinds of निबन्ध

Like other essays, the essays in Sanskrit are also divided mainly into three classes namely Descriptive (वर्णनात्मक), Narrative (विवरणात्मक) and Reflective (विचारात्मक). But some divide those into five classes adding two classes to the earlier group, namely. Imaginative (कल्पनात्मक) and Mythical (आख्यानात्मक).

Again some other divisions of निबन्ध are Literary (साहित्यिक), Philosophical (दार्शनिक) etc. But all other types are included in the aforesaid three main groups.

6.6.1 Subject of the Descriptive निबन्ध

The subject of a describtive essay may be some natural objects animate or inanimate such as- creature (प्राणी), thing (पदार्थ), plant (उद्भिद्), nature (प्रकृति), season (ऋतु), time (काल) etc, some place (स्थान) or country (देश), or some subject of interest.

6.6.2 Subject of Narrative essay

The subjects relating to some incidents or interesting experience of the writer like worship (पूजा), ceremony or festival (उत्सव-पार्वन), some legendary (पौराणिक) and historical (ऐतिहासिक) incident or any current event e.g. journey (भ्रमण) and the life and works of some eminent person etc, may be the subject of a narrative essay.

6.6.3 Subject of Reflective निबन्ध

Reflective essays are the writer's reflections or thoughts on any subject which is generally of an abstract nature. In such essays the opinions expressed by the writer must be supported by arguments and illustrations and the essay should end with a definite conclusion. The subjects of this class are, as a rule, of an abstract or general character or proverbial truths. For example, knowledge (विद्या), honesty (साधुता), good conduct (सदाचार), the concept regarding Health is the chief element for achieving duty (शरीरमाद्यं खलुधर्मसाधम्) etc. are included in this section.

SAQ:
How are निबन्धऽ classified ?

6.7 A General Scheme of some निबन्धऽ :

Descriptive essay (वर्णनात्मकनिबन्धः)

वसन्तःऋतुः

सूचना- वसन्तस्य आविर्भावकाल: वसन्ते प्राकृतिकशोभा- मनुष्येषु वसन्तप्रभाव:- उपसंहार:।

आदिकाव्यं रामायणम्

साधारणपरिचयः – रामायणशब्दस्यार्थः – रामायणस्याविर्भावः – रामायणस्य रचनाकालः – रामायणस्य कलेवरः कथावस्तु च – रामायणस्य काव्यसौन्दर्यम् – रामायणस्य महत्वं लोकप्रियता च – उपसंहारः।

महाभारतम्

परिचयः – महाभारतस्य विकाशे त्रयः स्तराः – महाभारतस्य प्रतिपाद्यविषयाः – महाभारतस्य रचनाकालः – महाभारतस्य विशिष्टता – उपसंहारः।

Narrative essay (विवरणात्मक निबन्धः)

असमस्य जातीय उत्सवः विहुः

सूचना- विहुशब्दस्य उत्पत्तिः - विहूत्सवस्य त्रयः प्रकाराः - विहुपालनप्रक्रिया - विहूत्सवस्य तात्पर्यम् - उपसंहारः।

कविकुलगुरुः कालिदासः

परिचय: – कालिदासविषयकजनश्रुति: – तस्य स्थितिकाल: – कालिदासस्य कृतय: – ग्रन्थानां संक्षिप्तं विवरणम् – कालिदासस्य काव्यशैली – उपसंहार:।

Reflective essay (विचारात्मकनिबन्धः)

विद्या परमं धनम् – का नाम विद्या ? – वेदानुसारं विद्यायाः प्रकारद्वयम् – विद्याधनं महाधनम् – विद्यायाः प्रभावः – विद्यायाः परमं लक्ष्यम् – उपसंहारः ।

सदाचारः को नाम सदाचार? – सदाचारान्तर्गताः सद्गुणाः – समाजे सदाचारिणां स्थानम् – सदाचाररहितानां सामाजिकस्थिति: – सदाचारस्य महत्वम् – साम्प्रतिककाले सदाचारस्य उपयोगिता – उपसंहार: ।

वसन्तर्तुः

सूचनाः

अस्माकं देशे भारतवर्षे एकस्मिन् वर्षे षट् ऋतवो भवन्ति। एते ऋतवः क्रमेण ग्रीष्मः-वर्षा-शरत्-हेमन्तः-शिशिरः-वसन्ताश्च।। एतेषु वसन्त ऋतुः (वसन्तर्तुः) अतीव मनोहरोऽस्ति। अस्य रमणीयता अनुपमा। अतो वसन्त ऋतुराज कुसुमाकरश्च इति उच्यते।

वसन्तस्य आविर्भावसमयः

द्वयोः द्वयो मासयोः एक ऋतु र्भवति। वैशाखमासादारभ्य चैत्रमासपर्यन्तेषु द्वादशमासेषु द्वौ द्वौ मासौ क्रमेण ग्रीष्मादिऋतूनामाविर्भावकाल इति निर्धार्यते। तदनुसारं फाल्गुनचैत्रे तिमासद्वयं वसन्तस्य आविर्भावसमय:। शिशिरऋतोरनन्तरं वसन्तस्य आगमनं भवति। वसन्तागमनस्य वर्णनं कृतं महाकविना कालिदासेन तस्य ऋतुसंहारनाम्नि गीतिकाव्ये-

> प्रफुल्लचूताङ्कुरतीक्ष्णसायकः द्विरेफमालाविलसद्धनुर्गुणः । मनांसि वेद्धं सुरतप्रसङ्गिनां वसन्तयोद्धा समुपागतः प्रिये॥

यथा कश्चन वीर: धनुर्गुणस्योपरि शरं निधाय हृदयानि वेद्धुं समायाति तथैवायं वसन्त: भ्रमरमालारूपधनुर्गुणोपरि प्रफूल्लिताम्रमुकुलरूपं शरं निधाय सुरतप्रसङ्गिनां मनांसि प्रहर्तुं समागत: ।

वसन्ते प्राकृतिकशोभा :

शिशिरऋतौ वृक्षाः पत्राणां निपतनेन नग्ना इव प्रतिभान्ति । आगते सति वसन्ते तरवः लताश्च सर्वे नवजीवनं नवशोभां च प्राप्नुवन्ति । वृक्षे वृक्षे नूतनानि पल्लवानि विकसन्ति, नवीनानि कुसुमानि अङ्कुरितानि सन्ति । कुसुमे कुसुमे अपूर्वः सुगन्धः आयाति । सर्वेषामेव वृक्षाणां पुष्पसमृद्धिः अस्मिन् समयेएव भवति । पवनविक्षिप्तेषु पादपेषु षट्पदाः गुञ्जनं कुर्वन्ति । वने वने कोकिलाः कुजन्ति । सर्वेषु क्षेत्रेषु सर्षप-आतसी-चणक-यव-गोधुमानाम् अन्येषां धान्यपादपानां च पुष्पराशयो विलसन्ति । अस्मिन् समये मदलोलुपाः भ्रमराः रसान्बेषणाय रसपानाय च स्वकीयाभिः भ्रमरीभिः सह पुष्पेषु गुञ्जन्त्यः भ्रमन्ति । अतो माघेनोक्तम्-

(वालकाण्डम् १-२-१५)

तदनन्तरं तत्रोपस्थितेन ब्रह्मणा प्रेरितः सन् वाल्मीकि रामचरितसम्वलितं रामायणाख्यं महाकाव्यमरचयत्।

रामायणस्य रचनाकालः

उपयुक्तप्रमाणसौलभ्याभावात् रामायणरचनाकालंनिर्णयो यद्यपि अतिदुष्करस्तथापि अस्यान्तरंग– वहिरंगविषयकाभिर्युक्तिभिरेतत् पर्यवसितं भवति यत् ख्रीष्टपूर्वपञ्चमशतकात् प्रागेव रामायणस्य रचना अभवत्। पाणिनिकृतव्याकरणलक्षणरहितभाषायाः प्रयोग एव सिद्धान्तमिमं पोषयति।

रामायणस्य कलेवरः कथावस्तु च

साम्प्रतमुपलभ्यमानं रामायणं चतुर्विंशतिसहस्रश्लोकनिबद्धसप्तकाण्डात्मकञ्च। एतानि सप्तकाण्डानि क्रमेण यथा– बालकाण्डम् अयोध्याकाण्डम् अरण्यकाण्डम् किष्किन्धाकाण्डं सुन्दरकाण्डं युद्धकाण्डम् उत्तरकाण्डञ्च। अत्रेदमुल्लेखनीयं यत् याकोविमहोदयेन सह कैश्चित् पण्डितै: वालकाण्डमुत्तराकाण्डञ्चेति काण्डद्वयं गच्छति काले प्रक्षिप्तमिति मन्यते। रामायणे मर्यादापुरुषोत्तमस्य श्रीरामचन्द्रस्य लोककल्याणकरं समुज्वलं चरितं सरलभाषया चित्रितं दृश्यते। अत्रोपवर्णिता: प्रमुखा: कथा: यथा– रामस्य जन्म तद्विवाह:, तदीय: राज्याभिषेक:, सीतया लक्ष्मणेन च सह रामचन्द्रस्य वनगमनम्, पञ्चवटीवर्णनं खरदूषणादिराक्षसवध: हनुमत: समुद्रसन्तरणं लंकावर्णनं हनुमता अशोकवाटिकायां सीतादर्शनं समुद्रे सेतुनिर्माणं युद्धे रामेण रावणवध: सीताया उद्धार अग्निपरीक्षा च अयोध्यायां पुनरागमनं रामस्य राज्याभिषेक: सीतापरित्याग: रामेण सह लवकुशयो: सम्मेलनं सीताया: भूमिप्रवेश इति प्रकारका: ।

रामायणस्य काव्यसौन्दर्यम् :

रामायणस्य काव्यसौन्दर्यमपि अतुलनीयम्। अत्र शव्दार्थयोर्ललितसन्निवेशो माधुर्यप्रसादादिगुणानामुपगुम्फनं च दृश्यते। रामायणी भाषा सहजा सरला विशुद्धा परिष्कृता च। क्वचित् क्वचिच्च उपयुक्तालंकारमण्डितापि वर्तते। अत्र यथास्थानंम् उपयुक्त रसानामभिव्यक्ति: अस्माकं दृक्पथमायाति। उक्तञ्च-

'हास्य-शृङ्गार-कारुण्य-रौद्र-वीर-भयानकैः।

विभत्साद्भूतसंयुक्तं काव्यमेतदगायताम्॥' (बालकाण्डम् ४-९)

रसान्तरविद्यमानत्वेऽपि अत्र करुणरसस्य प्राधान्यं दृश्यते। स्वभावचित्रणे चरित्रचित्रणे मानवमनोगतभावविलासप्रदर्शने वन-पर्वत-सरिताश्रमादि- प्रकृतिचित्रणे च कवे: नैपुण्यं परिलक्ष्यते। सुशोभितप्रकृतेरपरूपा वर्णना यथा-

'खर्जूरपुष्पाकृतिभिः शिरोभिः पर्णतण्डुलैः।

शोमन्ते किञ्चिदालम्वाः शालयः कनकप्रभाः॥' (अयोध्याकाण्डम्-२६)

रामायणस्य मधुस्नाविन्यां काव्यधारायां मज्जनं कृत्वा सहृदयानां हृदयानि आप्लुतानि भवन्ति।

रामायण्स्य महत्वं लोकप्रियता च :

काव्यमिदं विविधविषयविभूषितं कविकर्म। अत्र आगम-उपनिषत्-स्मृति-धर्मनीति-दर्शन-विज्ञान-आयुर्वेद-धनुर्वेद-तन्त्र-मनोविज्ञान-ज्योतिषादीनाम् अनेकानां विषयानां सारस्तथा तत्सम्पर्किता उपयोगिनो विषयाः समुपस्थाप्यन्ते। विविधविषयसंवलिते अस्मिन् महाकाव्ये भारतीयसंस्कृतेः तत्कालिकसभ्यतायाः समुज्वलं मनोहारि सुस्पष्टं स्वाभाविकञ्च चित्रं प्रतिफलितं वर्तते। अत्र सामाजिकदृष्ट्या दम्पत्योः पितापुत्रयोः गुरुशिष्ययोश्च सम्वन्धाः, भातृणां पारस्परिकसम्वन्धः पितृभक्तिः भातृप्रेम सुहृत्प्रेम देशप्रेम जनानां पारस्परिकसौहार्द्यञ्च सुन्दररूपेण चित्रितानि दृश्यन्ते। भातृप्रेम्न आदर्शप्रकाशिका रामस्योक्तिः रामायणे प्रकाश्यते यथा-

देशे देशे कलत्राणि देशे देशे च बान्धवः।

तं तु देशं न पश्यामि यत्र भ्राता सहोदरः ॥ (युद्धकाण्डम् १०१-१५)

'जननी जन्मभूमिश्च स्वर्गादपि गरीयसी' इत्यादिरूपाणि धर्म-नीति-कर्तव्यविषयकानि वहूनि सुभाषितानि पाठकानाकर्षयन्ति। रामायणस्योच्चतमशिखरासीनं महत्वमवलोक्य भास-कालिदास-भवभूति-दिङ्नाग-भट्टि-मूरारि-क्षेमेन्द्रप्रभृतयः परवर्त्तिनः नाट्यकाराः कवयश्च रामायणकथामुपजीव्य नाटकानि काव्यानि च रचयन्ति।

उपसंहारः :

वाल्मीकिकृतमिदं रामायणम् पुण्यसलिला गंगा इव भुवनत्रयं पुनातीति अस्य महिमा प्रशस्यते-

वाल्मीकिगिरिसभ्भूता रामाम्भोनिधिसङ्गता।

श्रीमद्रामायणी गंगा पुनाति भुवनत्रयम्॥

ईदृशं पावनं रमणीयं रामायणं सवत्र सर्वे आद्रियते। रामायणस्य स्थायित्वविषये सत्यमेव उक्तमस्ति अस्मिन्नेव महाकाव्ये-

यावत् स्थास्यन्ति गिरयः सरितश्च महीतले।

तावत् रामायणकथा लोकेषु प्रचरिष्यति॥ (बालकाण्डम् २-३६)

महाभारतम्

परिचयः :

महाभारताख्यं महाकाव्यम् भारतीयानां राष्ट्रियेतिहास: । विविधविषयात्मकं धर्मार्थकाममोक्षाख्य पुरुषार्थचतुष्टयस्य वर्णनेन रमणीयमुपादेयञ्च महाकाव्यमिदं 'पञ्चमो वेद' इति नाम्नाऽपि आख्यायते । लक्षश्लोकविद्यमानत्वादयं ग्रन्थ: शतसाहस्रीसंहितेत्यपि अभिधीयते । ग्रन्थस्यास्य कर्तृत्वेन कृष्णद्वैपायनव्यास: संक्षेपेण व्यास इति प्राधान्येन प्रकीर्त्यते । वेदानां यथायथविभाजनात् स वेदव्यास वेति नाम्नाऽपि ज्ञायते । व्यासो वर्षत्रयेण विशालकायं महाकाव्यमिदं रचितवानिति उक्तमस्ति अस्मिन्नेव महाकाव्ये–

> त्रिभिर्वर्षैः सदोत्थाय कृष्णद्वैपायनो मुनिः। महाभारतमाख्यानं कृतवानिदमुत्तमम्॥ (महाभारतम् १-५६-३२)

महाभारतस्य विकाशे त्रयः स्तराः :

महाभारतस्य प्रौढिप्राप्तिः अवस्थात्रयपूर्विकेति ज्ञायते। अस्य विकासे त्रिस्र अवस्थाः त्रयः स्तराः वा सन्ति– जय–भारतं–महाभारतञ्चेति। महाभारतस्य प्रथमे श्लोके 'ततो जयमुदीरयेत्' इति महाभारतस्य जयशब्दव्यवहार्यतामाह। व्यासोऽमुं जयनामकं ग्रन्थं तस्य पञ्चसंख्यकेषु शिष्येषु अन्यतमं वैशम्पायनमध्यापयामास। जयाख्यं काव्यं सूक्ष्मकलेवरम् आसीत्। तत्र ८८०० श्लोका आसन्। मौलिके काव्येऽस्मिन् इतिहासस्य प्राधान्यम् आसीत्, न तु उपदेशप्रधानता। पाण्डवानां विजय एव काव्यस्यास्य जयनाम्रः सार्थकता इति वक्तुं शक्यते। ततः वैशम्पायनः जयकाव्ये स्वरचितसंवादादीनां संयोजनं कृत्वा चतुर्विंशतिसहस्रश्लोकयुक्तं भारताख्यं काव्यं जनमेजयस्य नागयज्ञे श्रावयामास। इयं द्वितीया अवस्था। पुनः तृतीयपर्याये महाभारतनामकमहाकाव्यमेतत् एकलक्षश्लोकपरिमितं नैमिषारण्ये यज्ञकाले सौतिना शौनकादिभ्य ऋषिभ्यः श्रावितमभवत्। भारतीग्रन्थश्रवणकाले तत्पृष्टप्रतिवचनैः लक्षश्लोकसंवलितं कृर्तामदं महाकाव्यम्।

महाभारतस्य प्रतिपाद्यविषयाः :

महाभारतस्य प्रतिपाद्यविषयाः प्रधानतः कौरवपाण्डवानामितिवृत्तं विवादश्च, युद्धविमुखं अर्जुनं प्रति भगवतः श्रीकृष्णस्य तात्विकोपदेशः कुरुक्षेत्रयुद्धे कौरवानां पराजयः पाण्डवानां विजयप्रापिश्च सन्ति। मूलकथायाः आनुषङ्गिकरुपेण वहूनि आख्यानोपाख्यानानि अत्र संयोज्यन्ते। तेषु शकुन्तलोपाख्यान-मत्स्योपाख्यान-रामोपाख्यान-शिविकथा-सावित्रीकथा-गंगावतरणोपख्यान-नलोपाख्यानादीनि महाभारते वर्णितानि वर्तन्ते। महाभारतीयकथावस्तु अष्टादशसु पर्वसु विभक्तं वर्तते। तानि खलु आदि-सभा-वन-विराट्-उद्योग-भीष्म-द्रोण-कर्ण-शल्य-सौप्तिक-स्त्री-शान्ति-अनुशासनाऽश्रमवासि-मौसल-महाप्रस्थानिक-स्वर्गारोहणाख्यानि अष्टादशपर्वाणि। अथ अष्टादशपर्वव्यतिरिक्तं हरिवंशंनामकं परिशिष्टभूतमिव एकोनविंशपर्व महाभारतमन्वीयते यत् खिलपर्व इत्यपि उच्यते।

महाभारतस्य रचनाकालः

एतस्य विशालकायमहाकाव्यस्य रचनाकालसम्वन्धे पण्डितेषु मतानैक्यं दृश्यते यतः तिस्रः अवस्थाः समनुभूय महाभारतस्य सामग्रिकं रूपं जातम् । सम्प्रत्युपलभ्यमानं महाभारतं जयाभिधानात् मूलकाव्यात् परतः वहुषु शतकेषु व्यतीतेष्वेव निर्मितं स्यात् । पण्डितानां समीक्षया महाभारतम् ५०० ई.पू. समयतः परतो न निर्मितं किन्तु तत् पूर्वमेव निर्मितमिति प्रतीयते ।

महाभारतस्य विशिष्टताः

व्यासकृतं महाभारतं सुन्दर इतिहासो रुचिरं धर्मशास्त्रं रमणीयञ्च काव्यं वर्तते। ग्रन्थोऽयं मानवान् बहुधा उपकरोति। इतिहासत्वादयमस्माकं समक्षे पूर्वजानामितिवृत्तं वीरगाथां च उपस्थापयति, धर्मशास्त्ररूपेण ऐहिकामुष्मिकनि:श्रेयसमार्गं प्रदर्शयति, ललितया काव्यशैल्या भारतीयसंस्कृते: सभ्यतायाश्च मनोज्ञं रुपं निदधाति। ग्रन्थस्यास्य महत्वं अभिदधाति यथा-

धर्मे ह्यर्थे च कामे च मोक्षे च भरतर्षभ।

यदिहास्ति तदन्यत्र यन्नेहास्ति न तत् क्वचित्।

व्यासदेवो विविधै आख्यानै रत्र उपस्थापयति यत् धर्म एव भारतीयसंस्कृतेर्मूलम्। अधर्मेण राष्टस्य विनाशस्तथा धर्मेण च तस्योत्थानं भवति। धर्मस्य अत्याज्यतां तेन वर्ण्यते यथा-

> 'न जातु कामान्न भयान्न लोभाद् धर्म जह्याज्जीवितस्यापि हेतोः। धर्मो नित्यः सुख–दुःखे त्वनित्ये जीवो नित्यो हेतुरस्य त्वनित्यः॥'

पुनः 'प्रकाशलक्षण देवा मनुष्याः कर्मलक्षणाः' इत्यादिवाक्यद्वारा मानवान् कर्म प्रति चोदयति। महाभारते अन्तर्भूक्तं गीतारत्नं न केवलं अर्जुनं प्रति परन्तु समस्तान् मानवान् प्रति श्रीकृष्णस्य अमृतमयोपदेशोऽप्यस्ति। महाभारते राजधर्मस्य सविस्तरवर्णनेन ज्ञानं सञ्जायते यदस्मदीयपूर्वजानां राजनीतिविद्यायां विशिष्टं ज्ञानमासीत्। ग्रन्थेऽस्मिन् अहिंसायाः शोभा दयाया आभा तपसः प्रभा दानस्य वन्धुरता त्यागस्य पेशलता इत्यादयः रमणीयरूपेण प्रकाश्यन्ते। अस्य कवेः चरित्रचित्रणमपि प्रशंसनीयम्। अत्र स्वाभिमानशालिनः प्रेमपरायणाः धर्मनिष्ठाः ज्ञानवन्तः पुरुषार्थिनः भाग्यवादिनश्च इत्यादीनि भिन्नरुचिपरायणानि चरित्राण्युपलभ्यन्ते।

उपसंहारः

महाभारतम् भारतीयसंस्कृतेः दर्पण इव। अस्य विविधविषयावगाहि ज्ञानम् अर्थगौरवं भावगाम्भीर्यं च प्रति आकृष्टो भूत्वा बहवः कवयः महाभारते वर्णितां कथामवलम्व्य काव्यानि नाटकानि च रचयन्ति। ज्ञानाग्निसमेधितत्वाच्च एतस्य महत्वं कथंचिदपि अल्पयितुं न शक्यते। अतएव अस्य महत्वमुद्गायता प्रोच्यते–

महत्वाद् भारवत्वाच्च महाभारतमुच्यते।

असमस्य जातीयोत्सवः विहुः

सूचनाः

यदि विविधभाषाभिः बिभिन्नवर्णसम्प्रदायादिभिः परिपुष्टा काचित् जातिः कंश्चिद्विशिष्टमुत्सवं सार्वजनीनरुपेण हृदयेन आलिङ्गयति, तदा स उत्सवः जातीयोत्सव इति कथ्यते। साम्प्रतिककाले असमप्रदेशे विहुः निःसन्देहेन जातीयोत्सवस्य मर्यादां लभते। विहुः 'असमीयजनानां वापति– साहोन्' इत्यभिधीयते। सौन्दर्यमण्डितायाम् असमभुमौ स्थितानां विभिन्नानां भाषा–धर्म–सम्प्रदाय– भूतानां मानवानां समन्वयेन पालित एष विहूत्सवः जातीयोत्सवमर्यादां प्रापृवान्।

विहुशब्दस्य व्युत्पत्तिः :

विहु शब्दस्य व्युत्पतिः विभिन्नैः पण्डितैः भिन्नरूपेण प्रदीयते। संस्कृतविषुवशब्दात् विहु शब्दस्योत्पत्तिर्भवतीति युक्त्या विषुव अर्थात् अहोरात्रं यदा समपरिमाणं भवति तस्मिन् समये वहागविहुः कातिविहुश्चेति विहुद्वयं उद्याप्यते इति यद्यपि उल्लेखं कर्तुं शक्यते, मार्घविहुपालनविषये इयं युक्तिः निराधारा। कैश्चिदन्यैश्च वडोभाषायाः वैचागुशब्दात् वैशाखशब्दाद्वा विहु शब्दस्योत्पत्तिरिति मन्यते। तिवालोकाश्च विहुं 'विचु' इति वदन्ति। तेषां भाषानुसारेण 'विचु 'शब्दस्य अर्थः 'वसुमत्याः पूजा' अथवा 'भूमिपूजा' अस्ति। यथा तथा अस्तु, असमप्रदेशे आर्या अनार्याश्चेति उभयश्रेण्याः लोकाः विहूत्सवं जातीयोत्सवरूपेण पालयन्ति।

विहूत्सवस्य प्रकाराः :

प्रतिवत्सरं त्रिधा उत्सवोऽयं पाल्यते। यथा चैत्रवैशाखमासयोः संक्रान्तौ 'वहागविहुः' आश्विनकार्तिकमासयोः संक्रान्तौ 'कातिविहुः' तथा पौषमाघमासयोः संक्रान्तौ माघविहु उद्यापिताः भवन्ति। एतेषां त्रयाणां विहू त्सवानां पालनसमये असमीयलोकानां मानसिकसामाजिकावस्थाविषयकचिन्तनेन एतत् विहुत्रयं क्रमेण 'रडाली विहुः' कडालीविहुः भोगालीविहुश्चेति नामभिः आख्यायते।

विहुपालनप्रक्रिया

रडाली कडाली भोगालीति विहूत्रयस्य पालनप्रक्रियासु यद्यपि भिन्नता अवलोक्यते परन्तु त्रिषु विहुषु सकलानाम् असमीयजनानां आनन्दोत्साहौ परिलक्ष्येते एव। वहागविहुरेव रडालीविहुः । शीतकाले गते वसन्तकालस्य समागमकाले जनानां मनःसु अधिकतरोत्साहः उद्यीपना च संजायते। प्रकृतिजगत् सुशोभिता भवति। अस्मिन् सौन्दर्यमण्डिते पर्यावरणे मानवाः विशेषतः युवकाः युवत्यश्च आनन्दाप्लुता भवन्ति, गायन्ति नृत्यन्ति च। चैत्रसंक्रान्तिदिवसात् आरम्भ वैशाखमासस्य षष्ठदिनपर्यन्तं जनैः रडालीविहुरुद्याप्यते। अस्य विहूत्सवस्य प्रथमं दिनं 'गरु विहु' इत्युच्यते। अस्मिन् दिवसे गोस्वामिनः प्रातरुत्याय गवां शरीरे मासहरिद्राख्यद्रव्यद्वयं विलेपयन्ति, तदनन्तरं ग्रीवायां मालां विधाय ताः जलाशयं नीत्वा स्थानं कारयन्ति। सन्ध्याकाले ताः नूतनरज्जुभिः गोशालासु बघ्नन्तियच। वहागविहोः द्वितीयं दिनं 'मानुहविहु' इति कथ्यते। तद्दिनं प्रत्येकम् असमीयजनः नूतनं वस्त्रं धारयति, कनिष्ठजनः गुरुजनान् ज्येष्ठजनाञ्च प्रति सन्मानं प्रदर्शयति, ज्येष्ठजनाः कनिष्ठजनान् प्रति आशीर्वचनानि उच्चारयन्ति। असमीयस्त्रियः सन्मानीयजनान् आत्मीयजनान् प्रति 'विहुवान' इत्याख्यातानि वस्त्राणि उपहरन्ति। मध्याहनसमये देवालयाः कीर्तनध्वनिभिः मुखरिताः भवन्ति। तद्दिनात्परवर्तिदिवसषट्कें जनाः मित्राणि आमय सुस्वादु द्रव्यादिभिः भोजनं कारयन्ति आन्तरिकं स्नेहमभिनन्दनञ्च ज्ञापयन्ति। वर्तमानकाले रडालीविहूत्सवपालनावसरे सांस्कृतिकानुष्ठानानामपि आयोजनं क्रियते।

द्वितीयविहु : अर्थात् कातिविहुः एकस्मिन्नेव दिने आश्विनकार्तिकमासयोः संक्रान्तिदिवसे उद्यापितो भवति। (तत्समये शस्यक्षेत्राणि धान्यशस्येन श्यामलानि भवन्ति।) तदा लक्ष्मीदेव्या आमन्त्रणार्थं पूजनार्थं वा शस्यक्षेत्रो गृहे च प्रदीपाः प्रज्वालिताः भवन्ति। सन्ध्यासमये स्वीयांगनरोपिततुलसीवृक्षसमीपे नामकीर्तनं भवति। अस्मिन्समये साधारणतः कृषिजीविनोऽ समीयजनाः आर्थिकभावेन दुर्बला जायन्ते। अत अस्यामवस्थायां पालितः विहुः कडालीविहुः इति नाम्नाऽपि प्रथितोऽस्ति।

तृतीयविहुः माधविहुः अथवा भोगालीविहुः अस्ति। पौषमाघमासयोः संक्रान्तिदिवसः माघविहुरूपेण उद्यापितोऽस्ति। अस्मिन् समये असमीयजनाः कियद्दिनपर्यन्तं कृषिकार्यात् विरताः सन्तः विश्रामं लभन्ते। शस्यक्षेत्रे वालकाः मेजिनिर्माणं कृत्वा विहुदिवसात् पूर्ववर्तिरात्रेः उत्तरार्धे स्नानं कृत्वा मेजिं प्रज्वाल्य तत्समीपे भोजनं कुर्वन्तीति प्राचीना रीतिः। साम्प्रतिककाले प्रायः स्वगृहे एव भोजनं चलति। ऊषा काले मेजिदाहनसमये बहवः ग्रामवासिनः मिलित्वा अग्निसेवां कुर्वन्ति। स्थानविशेषे विभिन्नाः कीड़ा अपि क्रीड्यन्ते। माघविहुसमये गृहे गृहे भोजनव्यवस्था आयोजिता भवति, आनन्देन गच्छन्ति दिवसाः। जनाः मन्दिरेषु भगवन्तमपि पूजयन्ति।

विहूत्सवस्य तात्पर्यम् :

असमीयजनाः प्रायः कृषिजीविनः सन्ति । अयमुत्सवोऽपि कृषिणा सहैव विशेषभावेन सम्पर्कितः । कृषिकार्यस्य विभिन्ने पर्यायेषु अस्य उत्सवस्य पालनं प्राचीनकालादेव प्रचलितं वर्तते । विहुपालनसमये नृत्यगीतवाद्यादिभिः पृथिवी अधिकतरा उर्वरा भवतीति लोकविश्वासोऽस्ति ।

उपसंहारः

अनेन उत्सवेन असमीयजनाः ऐक्यसूत्रेण वद्धाः भवन्ति। साम्प्रतिककाले अनुष्ठितः मञ्चविहुः असमस्य प्रत्येकं जनगोष्ठीं निकटतरमाकर्षयति तथा सर्वेषु ऐक्यभावं जनयति। असमस्य सामग्रिकस्वार्थरक्षार्थम् अयमेकः वलिष्ठः पदक्षेप इति वक्तुं शक्यते।

अयमुत्सवः प्रतिवत्सरं यद्यपि पाल्यते तथापि वर्तमानसमये विहूत्सवपालने विसंगतिः अपि परिलक्ष्यते। कुरुचिपूर्णपरिस्थितेरपि उद्भवः परिलक्ष्यते कदाचित्। दुष्कार्यं विहाय सुचिन्तया प्रकृतम् आदर्शम् अग्रे कृत्वा विहूद्यापनस्य चेष्टा वर्तते चेत् एष विहुः प्रकृततः जातीयोत्सवरूपेण सम्यक् पालितो भवतीति वक्तुं शक्यते।

कविकुलगुरुः कालिदासः

परिचयः

संस्कृतसाहित्ये कालिदासः कविषु मूर्धन्योऽस्तीति सर्वैः स्वीक्रियते। भारतीयैः पण्डितै आलंकारिकैश्च 'महाकविः' 'कविकुलगुरु' 'कविशिरोमणि' 'कविसम्राट्' इत्यनेकैउपाधिमिरलंकृतो भवत्येष कविः। आंगलसाहित्ये शेक्सपीयेइत्यस्य यत् स्थानमस्ति संस्कृतसाहित्ये कालिदासस्यापि तदेव स्थानं र्वतते। अतः स भारतीयशेक्सपीयेर इति नाम्रापि आख्यायते।

कालिदासविषयकजनश्रुति :

अयं महाकविः कदा कुत्र अजायत एतदद्यावधि निश्चितरूपेण न ज्ञायते। जनश्रुत्यनुसारेण प्रारम्भिकावस्थायां स अतीव मूर्ख आसीत्। तस्य विदुष्या पत्न्या विद्योत्तमया (विद्यावत्या वा) अपमानिकः स गृहात् निरगच्छत्। ततश्च कालिस्वरूपायाः भगवत्याः सरस्वत्याः प्रसादेन सोऽचिरादेव विद्वान् अभवत्। परवर्तिकाले स बहूनां ग्रन्थानां ग्रन्थकाररूपेण तथा श्रेष्ठनाटककाररूपेण ख्यातिं लब्धुं समर्थोऽभवत्।

तस्य स्थितिकाल :

कालिदासस्य आविर्भावकालमधिकृत्यापि निश्चितं विवरणं न प्रदत्तम् । तथापि ख्रीष्टपूर्वप्रथमशताब्द्याः ख्रीष्टानन्तरं चतुर्थशाताब्द्याश्च अन्तर्वर्ती कालः तस्य समय इति स्थिरीक्रियते । स दितीयचन्द्रगुप्तस्य (विक्रमादित्यस्य) राजसभायाः नवरत्नानामन्यतमं रत्नमासीत् इति स्वीक्रियते ।

कालिदासस्य कृतयः

महाकाव्य-गीतिकाव्य-नाटकेतित्रिविधकाव्यस्य कर्ता आसीत् कालिदासः । तस्य सप्तसंख्यकाः कृतयः प्राधान्येन स्वीक्रियन्ते । महाकाव्यद्वयम्-कुमारसम्भवम् रधुवंशञ्च, गीतिकाव्यद्वयम्-मेघदूतम् ऋतुसंहारञ्च नाटकत्रयञ्च अभिज्ञानशकुन्तलम् विक्रमोर्वशीयम् मालविकाग्निमित्रञ्च ।

ग्रन्थानां संक्षिप्तं विवरणम्

कालिदासरचितं कुमारसम्भवं सप्तदशसर्गनिबद्धं महाकाव्यमस्ति । अत्र उमाशंकरयोः विवाहस्य कार्तिकेयजन्मनः कुमारेण कार्तिकेयेन तारकासुरवधस्य च कथा वर्णिताः सन्ति । अस्य ग्रन्थस्याद्या अष्टौ अध्याया एव कालिदासेन रचिता इति केषांचित् पण्डितानां मतम् । एकोनविंशतिसर्गात्मकं रधुवंशमहाकाव्यम् कालिदासस्य चरमा तथा श्रेष्ठतमा काव्यकृति इति मन्यते । अत्र राज्ञः दिलीपादारभ्य अग्निवर्णपर्यन्तम् उनत्रिंशत्संख्यकानाम् ईक्ष्वाकुवंशीयसम्राजां वर्णनमुपलभ्यते । मेघदूतमशंसयं हि कालिदासस्य प्रौढं गीतिकाव्यम् । अस्मिन् काव्ये विरहसन्तसस्य यक्षस्य मानसी व्यथा अतीव मार्मिकतया वर्णिता । पूर्वमेघम् उत्तरमेघञ्चेतिखण्डद्वयस्य मध्ये पूर्वमेघे वाह्यप्रकृतिः चित्रिता तथा उत्तरमेघे अन्त:प्रकृति: । ऋतुसंहारे ग्रीष्मादारभ्य वसन्तपर्यन्तं षट्संख्यकानाम् ऋतूनां सुन्दरं वर्णनमुपलभ्यते । सव्वेषु ऋतुषु परिवर्तितानि विभिन्नानि चित्राणि कविनात्र प्रस्तूयन्ते यानि पाठकानां हृदयानि रञ्जयन्ति एव ।

कालिदासस्य नाटकेषु अभिज्ञानशकुन्तलमित्याख्यं नाटकं श्रेष्टतममिति परिगण्यते। निखिलायां नाटकजगत्येव नाटकमिदं दिनमणिरिव विभासते। अस्मिन्नाटके दुष्यन्तशकुन्तलयो: मिलन– विरह–पुनर्मिलनादय: कथा: रोचकशैल्या वर्णिता: सन्ति। तदेव उक्तमस्ति–

काव्येषु नाटकं रम्यं तत्र रम्या शकुन्तला।

तत्रापि च चतुर्थोऽङ्कस्तत्र श्लोकचतुष्टयम्॥

मालविकाग्निमित्राख्ये लधुकाये नाटके विदर्भराजकन्यामालविकायाः शुङ्गवंशीयराज्ञोऽग्निमित्रस्य च प्रेमकथा मनोहरया शैल्या उपनिवद्धा। पुनः विक्रमोर्वशीये नाटके उर्वशीपूरुरवसोः प्रेमकथा चित्रिताऽस्ति। अत्र नाटके प्रायशः दिव्यानि पात्राणि सन्ति। इदं नाटकं महाकवेः नाटकेषु आद्या कृतिरित्युच्यते।

कालिदासस्य काव्यशैली :

कालिदासकृतानि काव्यानि स्वकीयानवैशिष्ट्येन रमणीयानि सन्ति। तस्य काव्येषु नैसर्गिकं सौन्दर्यम् अकृत्रिमा सुषमा मनोरमं चारुत्वञ्च प्रतिपदं संलक्ष्यन्ते। कालिदासेन तस्य रचनायां सा भाषा प्रयोज्यते या जनताया विद्वन्मालायाश्च हृदयमाहलादयति। तस्य भावाभिव्यक्त्यां मधुरता सरलता निरभिमानभाव जनमानसमाकर्षयितुं समर्थो भवति। तस्य नैतिकताया: उज्वलतमं रूपं जीवननिर्माणकारिणामाचाराणां दिव्या चारुता आत्मतत्त्वस्य हृदयङ्गमं स्वरूपं निरवधि प्रवहति। तस्य काव्येषु या:रवलु सूक्तय: प्रयुक्ता: सन्ति ता मधुरा: सरसा मञ्जर्य इव सचेतसां चेतांसि हरन्त्येव। तदिदं सत्यमुक्तं वाणभट्टेन-

> निर्गतासु न वा कस्य कालिदासस्य सूक्तिषु। प्रीतिर्मधुरसान्द्रासु मञ्जरीष्विव जायते॥ (हर्षचरितम्, श्लोक-२६)

कालिदासस्य काव्यस्य सर्वश्रेष्ठं वैशिष्ट्यमस्ति- उपमालंकारस्य प्रयोगः । तथा ह्युक्तमस्ति-' उपमा कालिदासस्य' इति । तस्य उपमा सहृदयानां रसज्ञानां च कृते विशेषरूपेण आह्लादकारिणी वर्तते । तस्य उपमासु न केवलं रमणीयता यथार्थता विविधता पूर्णता च विद्यन्ते अपि तु सर्वत्रैव लिंगसाम्यम् औचित्यं चापि प्राप्येते । तस्य मनोवैज्ञानिक्या उपमायाः निदर्शनं प्राप्यते श्लोकेऽस्मिन् यथा-

> गच्छति पुर: शरीरं धावति पश्चादसंस्थितं चेत: । चीनांशुकमिव केतो: प्रतिवातं नीयमानस्य॥

(अभिज्ञानशकुन्तलम् १-अत्तिमः श्लोकः)

रधुवंशमहाकाव्ये दीपशिखेत्युपमया इन्दुमत्याः वर्णनेन स कवि 'दीपशिखा कालिदास' इत्यभिधानमवाप। उपमां व्यतिरिच्य रूपकयमकोत्प्रेक्षार्थान्तर न्यासादय अलंकारा अपि कालिदासेन निपुणतया प्रयुक्ताः।

कालिदासस्य काव्यं ध्वनिप्रधानम्। तस्य वर्णने व्यञ्जनायाः श्रीः समवलोक्यते। तस्य भाषा रसानुकुला भावानुसारिणी च। तस्याः पदमाधुर्यं लयात्मकत्वं संगीतात्मकत्वं च पदे पदे अवलोक्यते। तस्य कविता प्रसादगुणगुम्फिता वैदर्भीरीत्या ललिता च। तस्य काव्ये तस्य रससिद्धताऽपि पर्यवलोक्यते। संयोगविप्रलम्भश्चेति उभयप्रकारौ शृङ्गारौ तेन चारु चित्रितौ। कथावस्तुनिर्माणे चरित्रचित्रणे च कालिदासस्य महत्पाटवमवलोक्यते।

उपसंहार :

महाकवेः कालिदासस्य कवित्वविषयकेन अनेन वर्णनेन तस्य सुनिपुणकाव्यकुशलता प्रकटिता भवति। तस्य कलात्मिका तुलिका नीरसेऽपि सरसताम् कठिनेऽपि सुकुमारतां कोमलतां वा, दुर्बोधेऽपि सुबोधताम् आपाद्य काव्यमतीव मधुररूपेण प्रकाशयति। अस्मादेव कारणात् अद्यप्रभृति तस्य कविचक्रवर्तित्वं सिद्धं वर्तते। तदुक्तमस्ति–

> पुरा कवीनां गणनाप्रसंगे कनिष्ठिकाधिष्ठितकालिदास:। अद्यापि तत्तुल्यकवेरभावात् अनामिका सार्थवती बभूव॥ इति।

विद्या परमं धनम्

का नाम विद्या ?

विद्ज्ञाने इति धातो: निष्पण्णस्य विद्याशब्दस्य अर्थोऽस्ति ज्ञानम् । कस्यचिद् वस्तुन: विषयस्य वा ज्ञानं विद्या इत्याख्यायते । वेदादिशास्त्राणां साधु अनुशीलनं तत्वार्थज्ञानञ्च विद्या इति स्वीक्रियते ।

वेदानुसारं विद्यायाः प्रकारद्वयम् -

विद्यायाः परापरेति प्रकारद्वयं वेदे निर्दिश्यते। मुण्डकोपनिषदि उक्तमस्ति-

'द्वे विद्ये वेदितव्ये परा चैवापरा च। तत्रापरा ऋग्वेदो यजुर्वेदः सामवेदोऽथर्ववेदः शिक्षा कल्पो व्याकरणं निरुक्तं छन्दो ज्योतिषमिति। अथ परा यया तदक्षरमधिगम्यते। (मु. उप. १-१-४५)

वेद वेदाङ्गादिकोऽपरविद्याविषय:, परन्तु ब्रह्मविषयकं ब्रह्मप्राप्तिविषयकं वा ज्ञानं पराविद्या इत्युच्यते। लौकिकी विद्या यथा साहित्य-विज्ञान-राजनीति-भूगोल-शिल्प-वाणिज्यशास्त्रादीनां विद्या अपराविद्यायामन्तर्भूक्ता अस्ति। निरन्तरम् अम्यासहेतो: द्वयो: विद्ययो: साफल्यं लब्धुं शक्यते। अपराविद्याया 'अविद्या' इत्यपि नाम अस्ति।

विद्याधनं महाधनम् -

विद्यारूपं धनं महाधनमस्ति । जगति ईदृशं किमपि वस्तु नास्ति यत् विद्यायाः समानतां कुर्यात् । यद्यपि संसारे धनस्य महती प्रतिष्ठा वर्तते तथापि धनात् विद्या गरीयसी इति सूक्तिः सर्वजनसम्मता वर्तते । धनानि बहुप्रकारेण विनष्टानि भवन्ति । तानि आत्मीयेषु विभज्यन्ते, चौर-लुण्ठक-शासकादिद्वारा अपहृतानि भवन्ति, भूकम्पप्लावनादिभिरपि विनष्टानि भवन्तीति धनिकानां हृदयेषु धनविषयिकी भीतिः सर्वदैव विद्यते । परन्तु विदुषाम् एतादृश्यः भीतयः न सन्ति । विद्याधनं न भ्रातृभाज्यं न नृपहार्यं न च भारकारि वर्तते । अन्यानि धनानि व्यये क्रियमाणे क्षीणानि भवन्ति, परन्तु विद्या यथा दीयते विभज्यते व्ययीक्रियते वा, विद्यायाः भण्डारः तथातथैव बृद्धिमश्नुते । उक्तं च सुभाषितग्रन्थे-

> न चौरहार्यं न नृपहार्यं न भ्रातृभाज्यं न च भारकारि। व्ययंकृते वर्धत एव नित्यं विद्याधनं सर्वधनप्रधानम्॥

विद्यायाः प्रभावः-

विद्यायाः गुणाः लाभाश्च अगणयीयाः सन्ति। विद्यया हृदये मनसि वचसि च प्रकाशः भवति। विद्या विनयं ददाति। विनयेन पात्रतां पात्रत्वाद्धनं धनाद्धर्मः धर्मप्रभावेन च सुखलाभो भवति। तदुक्तं-

विद्या ददाति विनयं विनयाद् याति पात्रताम्। पात्रत्वाद् धनमाप्नोति धनाद्धर्मः ततः सुखम्॥ इति। विद्याप्रभावेन मानवानां कर्तव्याकर्तव्यज्ञानं धर्माधर्मपरिज्ञानं पुण्यापुण्यविवेक: लाभालाभवोधश्च भवन्ति । सैषा विद्या पितृ–मातृ–कान्तावत् हितकारिणी, वैभवकीर्तिप्रदायिनी । इत्थं सर्वमनोरथपूरणात् सा विद्या कल्पलतया उपमीयते ।

> 'मातेव रक्षति पितेव हिते नियुड्क्ते कान्तेव चाभिरमत्यपनीय खेदम्। लक्ष्मीं तनोति वितनोति च दिक्षु कीर्तिम् किं किं न साधयति कल्पलतेव विद्या ?' (भोजपबन्ध-५)

विद्याधनं गुप्तं धनम्। विदेशगमनसमये विद्या वन्धु इव सहायिका भवति यतो विद्या अपरिचितान् जनान् परिचितानिव निर्माति। बिद्याधिष्ठात्री देवी प्रसन्ना सती मनुष्यं सफलं करोति। विद्वान् राजभिरपि सम्मानं लभते। विद्यायारभावे एतेषां गुणानामपि अभावः परिलक्ष्यते, अतः विद्याहीनजनः पशुतुल्यो भवतीति उच्यते भर्तृहरिणा–

> 'विद्या नाम नरस्य रूपमधिकं प्रच्छन्नगुप्तं धनम् विद्या भोगकरी यश:सुखकरी विद्या गुरूणां गुरु: । विद्या वन्धुजनो विदेशगमने विद्या परं दैवतम् विद्या राजसु पूजिता न तु धनं विद्याविहीन: पशु: ॥'

(नीतिशतकम् श्लोक २०)

विद्यायाः परमं लक्ष्यम्

विद्यायाः परमं लक्ष्यमस्ति भौतिकसुखसाधनेन सममेव मुक्तेः संसाधनम्। विद्या वै ज्ञानावाप्तिसाधनम्, ज्ञानेनैव मोक्षाधिगमः। पक्षान्तरे यथा मोक्षाधिगभः सैव विद्या। अतएव उच्चते 'सा विद्या या विमुक्तये'। विद्यया तत्वज्ञानमधिगम्यते। तेन ज्ञानेनैव ब्रह्मज्ञानम् अमरत्वं च प्राप्येते। अतो उच्यते- 'विद्यया ज्ञानमश्नुते', 'विद्यया विन्दतेऽमृतम्।'

उपसंहार :

जगति विद्यायाः अपरिसीमः प्रभावः परिलक्ष्यते। विनयः विवेकः शीलं सदाचारः शिष्टता सहृदयता चेति गुणसमूहोऽपि विद्याप्रभावेनैव मनुष्ये समागच्छत्ति। अतएव विद्वान् सर्वत्रैव पूजितः प्रतिष्ठितश्च भवति। पृथिव्यां यदि विद्यायाः प्रकाशो न स्यात् तदा समग्रमपि विश्वम् अज्ञानान्धकारे निमग्नं जायेत तथा मानवजीवनं पशुजीवनसमानं सम्पद्येत। अतः स्वस्य सफलतायै तथा मानवानां मध्ये सुखशान्तिसमृद्धये च विद्यायाः प्रसारोनीव आवश्यक इति वकृं शक्यते।

सदाचारः

को नाम सदाचारः

सतंा सत्पुरुषाणामाचारः सदाचारः अर्थात् सज्जनाः यथैवाचरन्ति व्यवहरन्ति च तद्वदाचरणं सदाचार इति कथ्यते। य आचार उत्तमो भवति, येन मनुष्याणां जीवनं सफलं भवति स एव सदाचारधर्मः। वेदस्मृत्यादिषु 'आचारः परमो धर्मः' 'आचाराल्लभते चायुः' इत्यादिभिः उक्तिभि आचारः सदाचारो वा प्रशस्यते। सदाचारस्य श्लाघा सर्वेष्पपि शास्त्रेषु कृता दृश्यते। विद्वांसः साधवो महात्मानो धर्मात्मनश्च सर्व एव सदाचारं प्रशंसन्ति। सदाचारी जनः कुरूपो निर्धनो दुर्बलो वा भवति चेत् स सर्वेषामपि मानवानाम् आदरास्पदं प्रशंसापात्रञ्च सञ्जायते।

सदाचारान्तर्गताः सद्गुणाः

सदाचारे प्रायः सर्वेषामेव सद्गुणानां समावेशो दृश्यते। सञ्चरित्रं सत्संगतिः स्वाध्यायः इन्द्रियसंयमः भगवद्भक्तिः त्याग–दान–धैर्य–विनयाः कृतज्ञताप्रकाशनम् मानवसेवा अहिंसा तपः सत्कर्मप्रवृत्तिः दुष्कर्मनिबृत्तिश्च एतेषांगुणानां प्राधान्येन सदाचारे समावेशोऽभीष्यते। महात्मना बुद्धेनापि निर्दिश्यते यत् योऽधर्मात् विरमति इन्द्रियाणि संयच्छते बह्मचर्यमुपास्ते वाक् कायमनोभिश्च सुसंयतः स सदाचारवान् इति।

समाजे सदाचारिणां स्थानम्

मानवजीवने सदाचार एव सर्वार्थसाधकोऽस्ति। अतः सदाचारी पुरुषः समाजे सम्मानीयं स्थानमधिकरोति। यो जनः गुरुजनान् सेवते, श्रेष्ठजनस्य सत्कारं करोति, मातुः पितुश्च आज्ञायाः पालनं करोति, सत्पुरुषैः सह सम्मिलति, स्वाध्याये रतो भवति, इन्द्रियाणि वशे रक्षति, भगवद्भक्तिपरायणोऽस्ति, सदा सत्यं वदति, मानवसेवासु तत्परोऽस्ति, संकटे अपि सन्मार्गं न परित्यजति तस्य जीवनं सुखमयं शान्तिमयं श्रेष्ठं वरिष्ठं च भवति। एतादृशाः सदाचारपरायणाः यत्रैव गच्छन्ति तत्रैव सत्कारं प्रतिष्ठां सर्वोत्तमं च पदं प्राप्नुवन्ति। सदाचारिणः दीर्घायुष्यमुक्तमस्ति विष्णुस्मृतौ–

'सर्वलक्षणहीनोऽपि यः सदाचारवान् नरः।

श्रद्दधानोऽनसूयश्च शतं वर्षाणि जीवति॥'

सदाचारी: स्वदेशे परदेशे परलोके वा निर्भयं निरापदञ्च विचरितुं समर्थो भवति।

सदाचाररहितानां सामाजिकस्थितिः

ये जनाः सदाचार विरुद्धमाचरन्ति गुरुजनानां प्रति सेवारहिताः भवन्ति मातापित्रोः आदेशमुलङ्घयन्ति सन्मार्गं परित्यज्य कुमार्गे चलन्ति सदा असत्यं वदन्ति परधनेषु परस्त्रीषु च लोलुपाः भवन्ति तेषां जीवनं सर्वथा गर्हितमपमानितं सुखशान्तिरहितञ्च भवति। दुराचारी ऐश्वर्यवान् सन्नपि सर्वत्र विभेति। इह जगति परलोके वा न तेषां सद्गतिर्भवति। सदाचार- विमुखितायाः फलमुक्तमस्ति यथा- 'य सदाचारमुत्सृज्य वर्तते कामतो जन:।

श्रियं स लभतां काम श्रेयस्तस्य न विद्यते॥' इति

सदाचारस्य महत्वम्

जगति सदाचारस्य महत्वमपरिमितम्। सदाचारादेव समुन्नतिः साधिता भवति श्री-धन-आयुष्प्राप्तिर्भवति कुलक्षणनिवृत्तिश्च भवति। सदाचारप्रसङ्गे सच्चरित्रस्य प्रभाव अपरिसीमः। चरित्रमेव पुरुषस्य सर्वस्वम्। सच्चरितस्य मानवस्य समाजे याद्रृशी प्रतिष्ठा वर्तते न तादृशी अन्यस्य। विनष्टे चरित्रे सर्वं विनष्टं भवति। आंगलभाषया सूक्तं केनापि-

'If wealth is lost nothing is lost

If health is lost something is lost.

If character is lost everything is lost.'

सदाचारस्याभिगमनार्थं तत्साधनरूपायाः सत्संगतेः फलं वर्ण्यते भर्तृहरिणा-

'जाड्यं धियो हरति सिश्चति वाचि सत्यम्

मानोन्नतिं दिशति पापमपाकरोति।

चेतः प्रसादयति दिक्षु तनोति कोर्तिम्

सत्संगति: कथय कि न करोति पुंसाम्॥'

स्वाध्यायस्यापि प्रकृष्टतरमुपादेयत्वमस्ति सदाचारे। स्वाध्यायात् ज्ञानशक्तिर्वर्धते विविधा विषया वैशद्येन अवगम्यन्ते। हृदयस्य संकीर्णता च अपह्रियते।

सदाचारस्यान्यतमो साधनोऽस्ति त्यागः येन मानवः अतीव शोभितः सञ्जायते। त्यागीः दीनदुःखितानाम् उद्धर्ता असहायानां रक्षिता चास्ति। केनापि विद्वद्वरेण साधु स्तूयते एष त्यागः-

'त्याग एको गुण: श्लाघ्य: किमन्यैर्गुणराशिभि:।

त्यागाज्जगति पूज्यन्ते पशुपाषाणपादपाः॥'

ईशोपनिषद्यपि त्यागार्थं प्रचोदयति यथा-

'ईशा वास्यमिदं सर्वं यत्किञ्च जगत्यां जगत्।

तेन त्यक्तेन भुञ्जीथाः मा गृधः कस्यचिद्धनम्॥'

तथा सदाचाराङ्गीभूतेन इन्द्रियसंयमनेन सर्वाभीष्टावाप्तिः मनोरथानां सिद्धिश्च भवति। अजितेन्द्रियजनः भौतिकीमुन्नतिम् आमुष्मिकीञ्च उन्नतिं कर्तुं न प्रभवति। पुनः भगवत्कृपां विना सत्कर्मसु प्रवृत्तिर्न जायते। मानवजीवने कल्याणमपि भगवत्प्रेमापेक्षम्। अतो भगवत्चरणयोः प्रणतिः सर्वदा आवश्यकीया। तथा सतता-विनय-धैर्य-क्षमोदारतादयः गुणाः मानवानां भूषणानि यैः नराः श्रेष्ठत्वं प्राप्नुवन्ति।

साम्प्रतिककाले सदाचारस्य उपयोगित्वम्

अस्माकं देश: सदाचारप्रधानोऽस्ति। दधीचि-शिवि-दीलिप-रधु-रामादय राजान: ऋषयश्च तथा तिलक-मालव्य-माहात्मागान्धीप्रभृतय: महापुरुषा: सदाचारभूषणेनैव विश्वविख्याता अभवन्। परन्तु सम्प्रति केषाञ्चिज्जनानां सदाचारपालनं प्रति शिथिलता परिलक्ष्यते। वहुषु स्थानेषु दुराचारस्य एव प्रसकृि: दृश्यते। चौर्य-लुण्ठन-हिंसा-वञ्चना-व्यभिचारसंयोगात् अस्मिन् भारतीये समाजे संकटावस्थायास्तथा अशान्ते: पर्यावरणं विराजितं वर्तते येन देशस्य समुन्नयनकार्थं विघ्नितं जातम्।

उपसंहार :

'सदाचाराद् यशो लोके सदाचारात् सुखं दिवि। सदाचाराद् भवेन्मोक्षः सदाचारो हि कामधुकु॥' इति

सदाचारपालनेन जन: श्रेष्ठत्वं गुणोत्कृष्टत्वं प्राप्नोति। सदाचारसहायेन सिद्धिसमुदायम् अधिगन्तुं शक्नोति। सदाचारिण एव सर्वत्र आदरं लभन्ते। अत: समाजे सदाचारस्य सम्यक् परिणालनाय यथाशक्ति सर्वै: प्रयत्नं कर्तव्यम्।

6.8 Summing up :

At the end of this unit you have got an idea on

- 1. origin of the English word 'essay'.
- 2. the equivalent words of essay in Sanskrit
- 3. how to write an essay i.e essential elements for writing an essay such as selection of the topic, arrangement of the subject into some headings and the placement of the topics.
- 4. the language of an essay
- 5. various types of essay
